

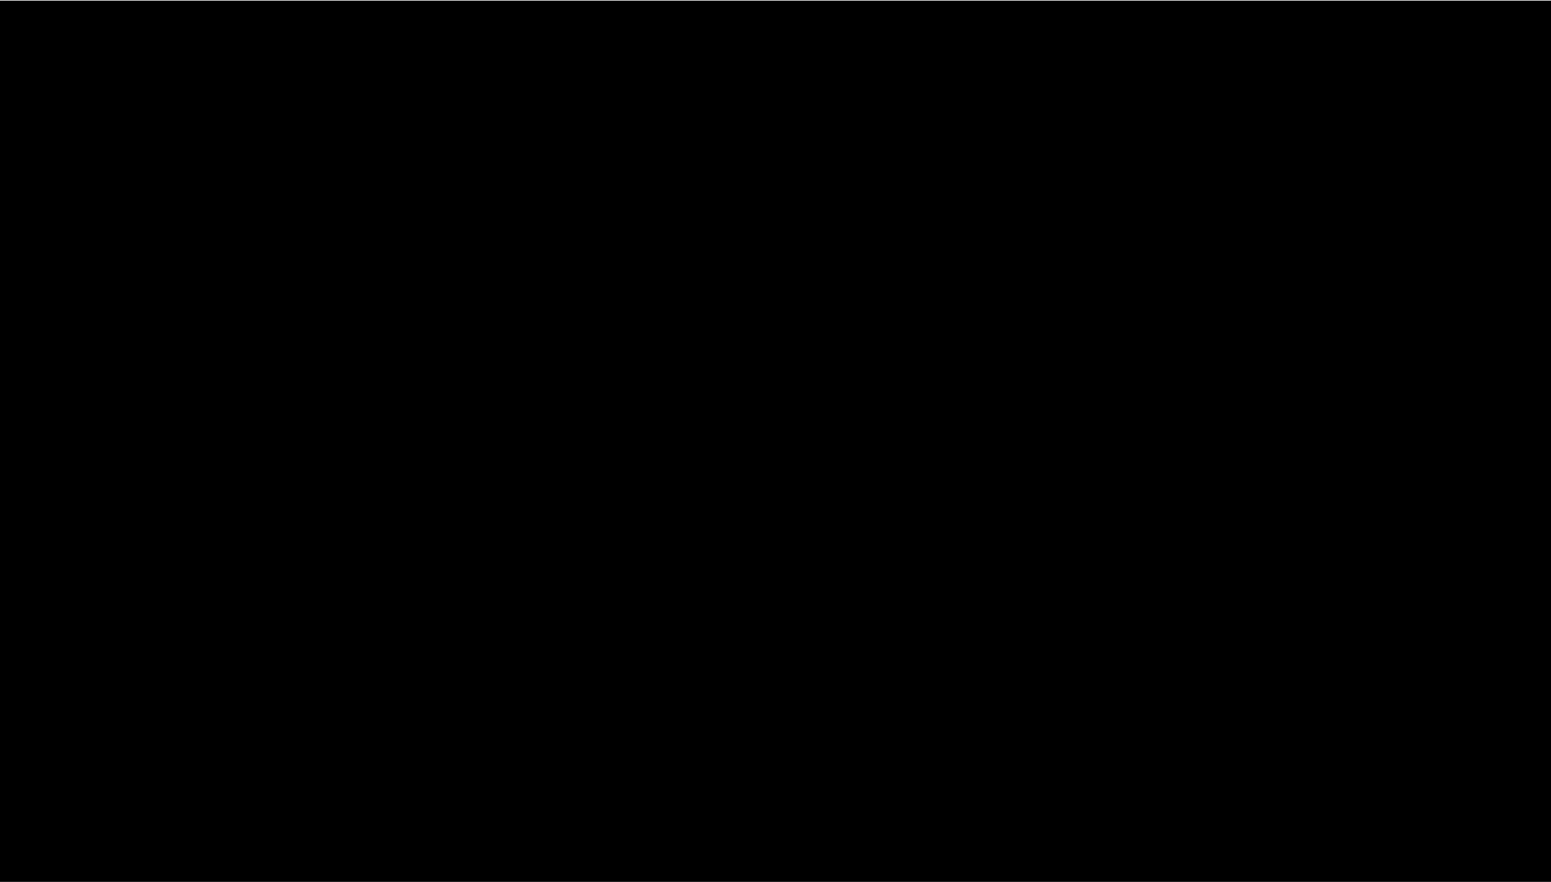

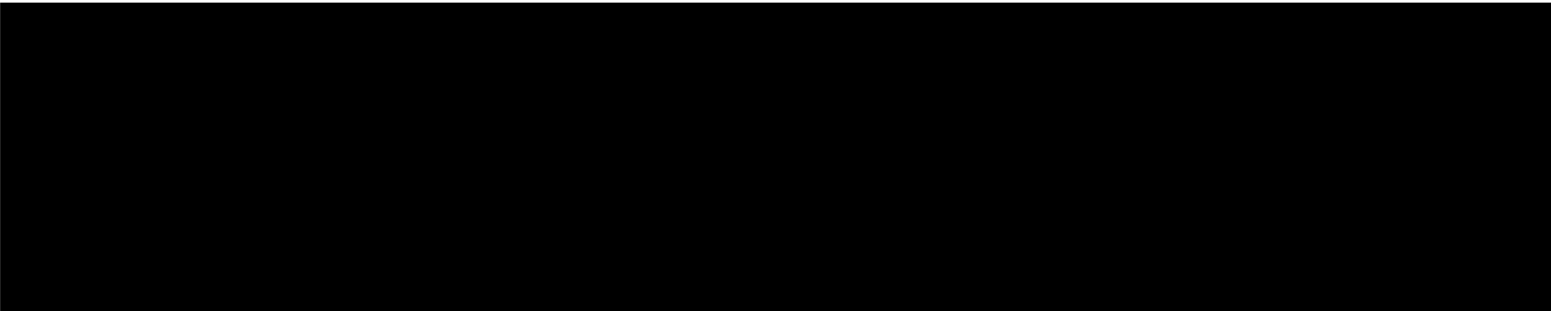

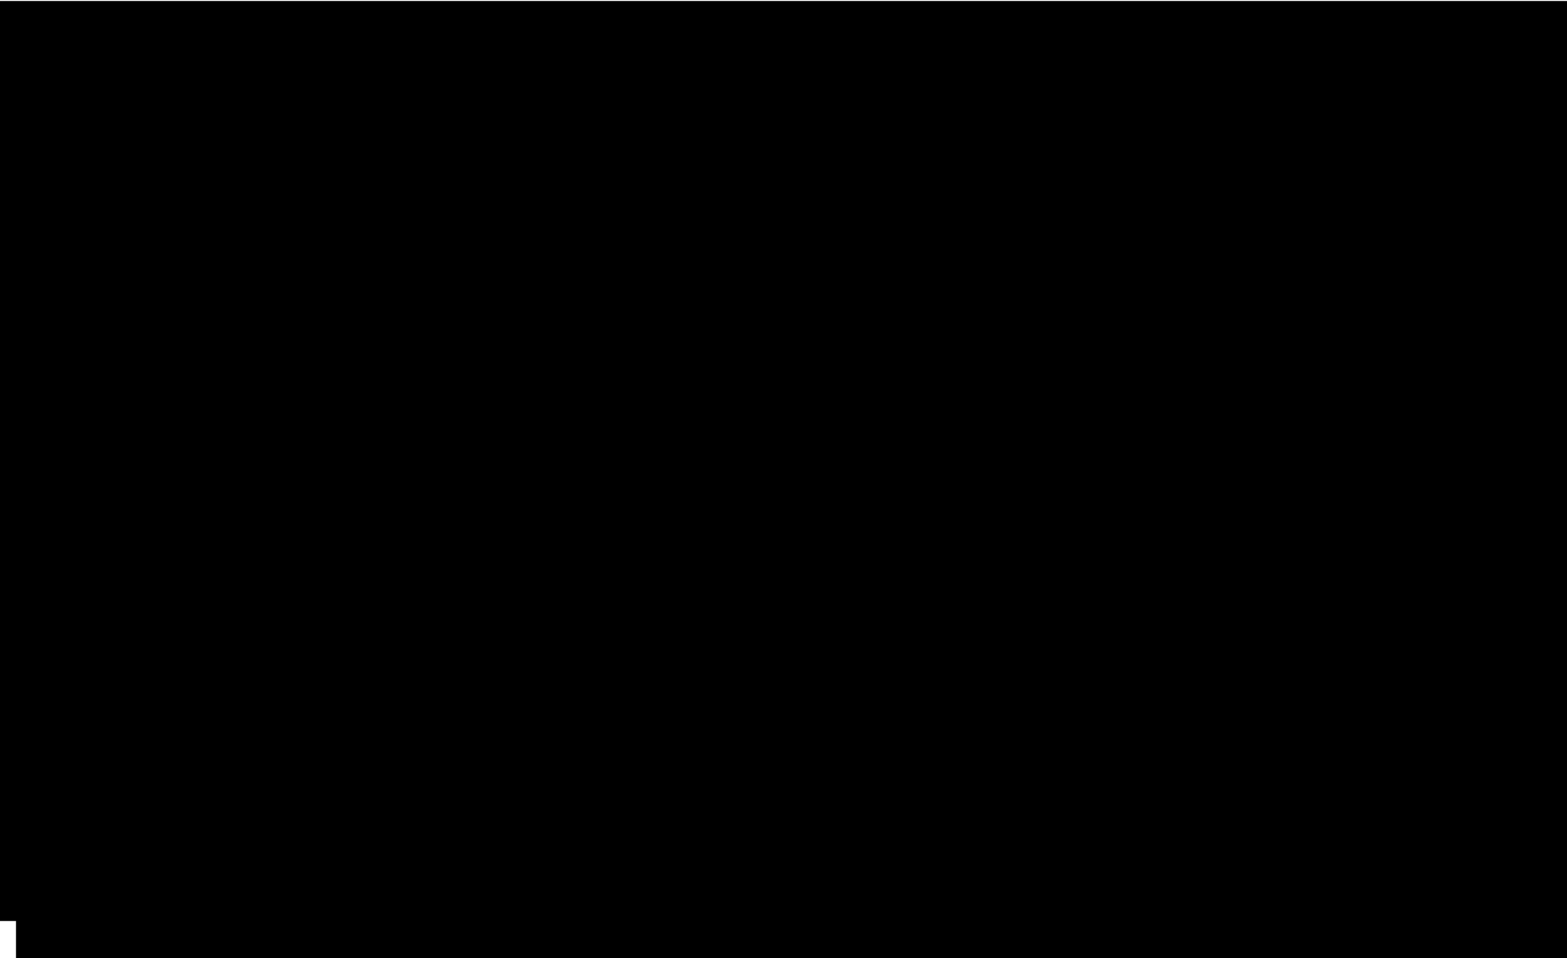

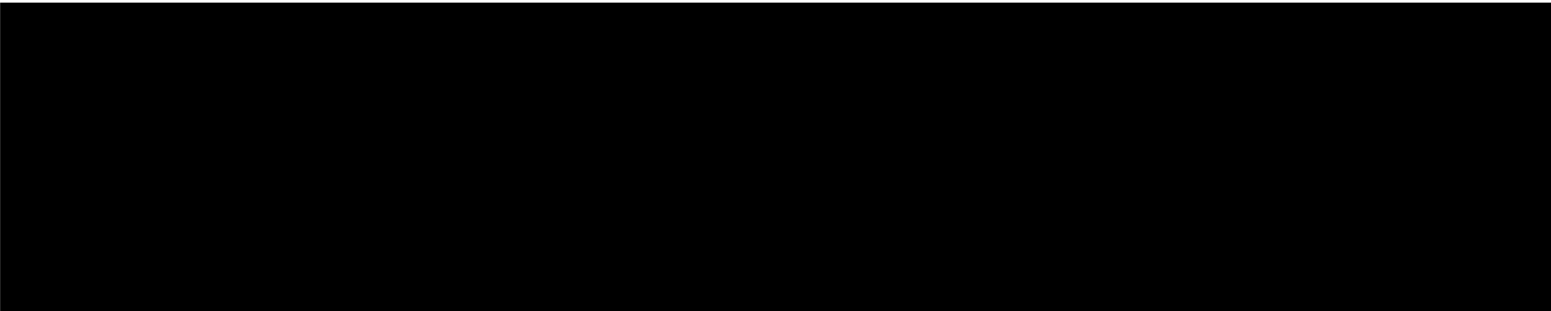

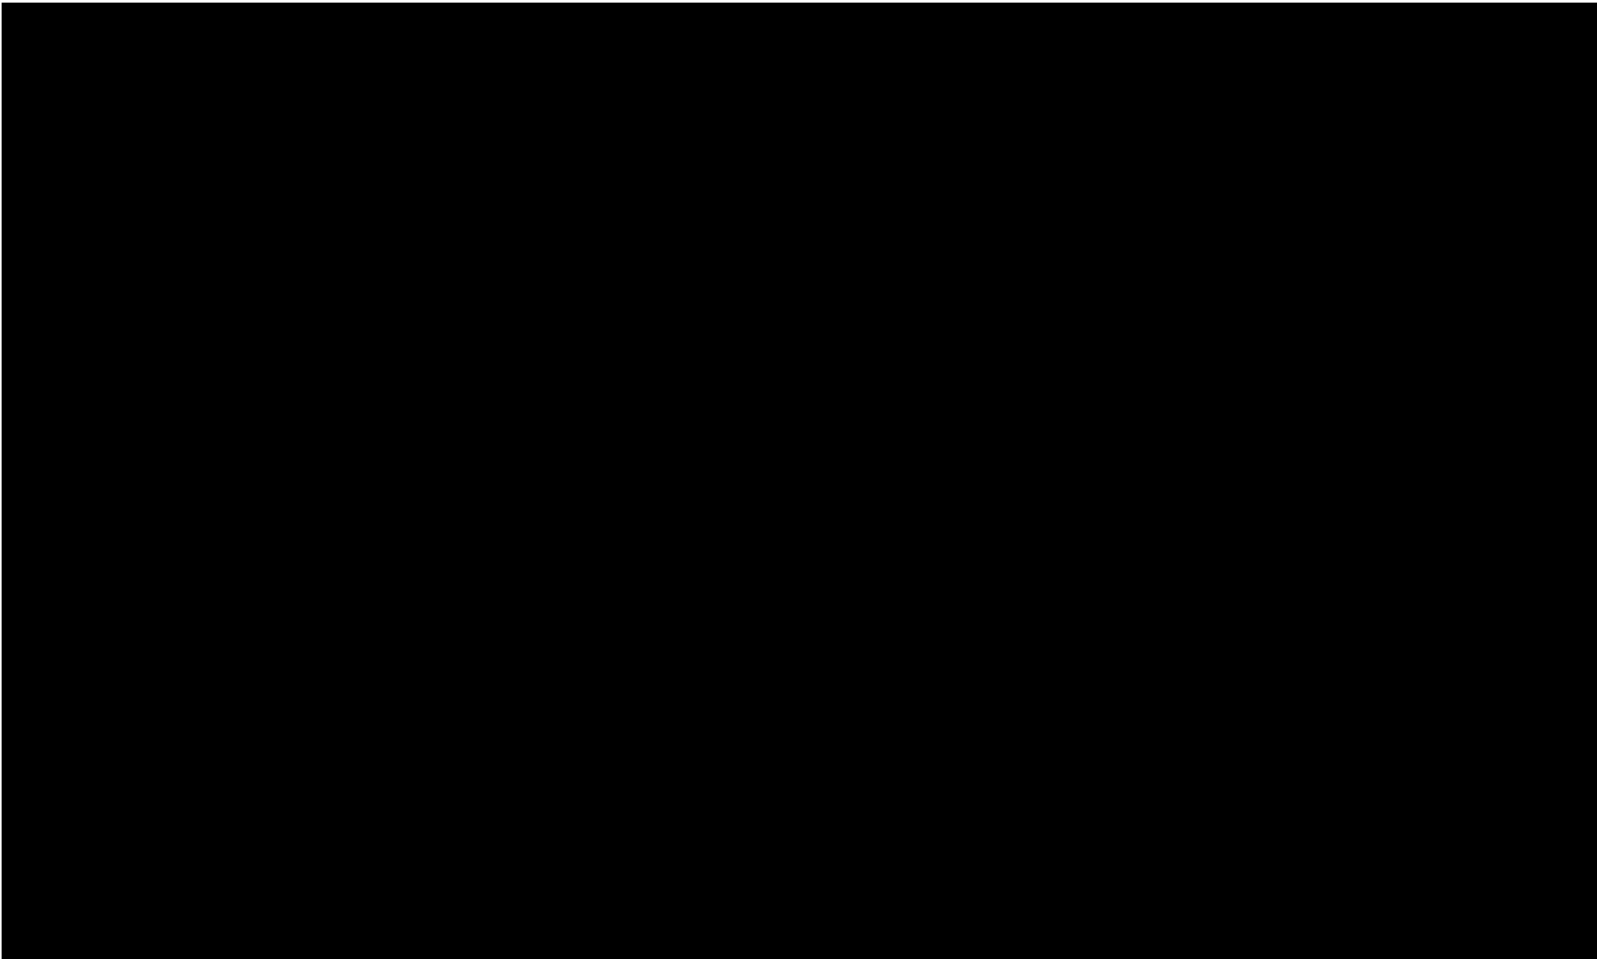

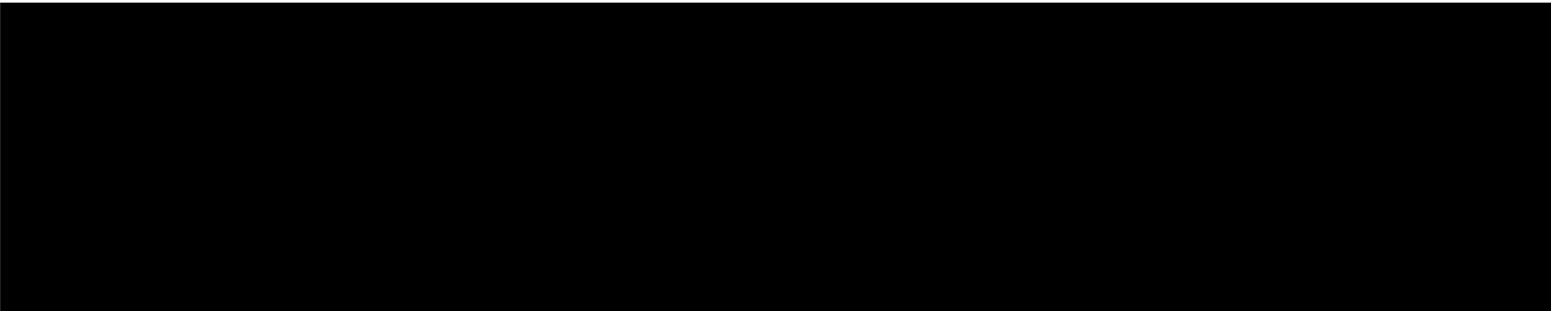

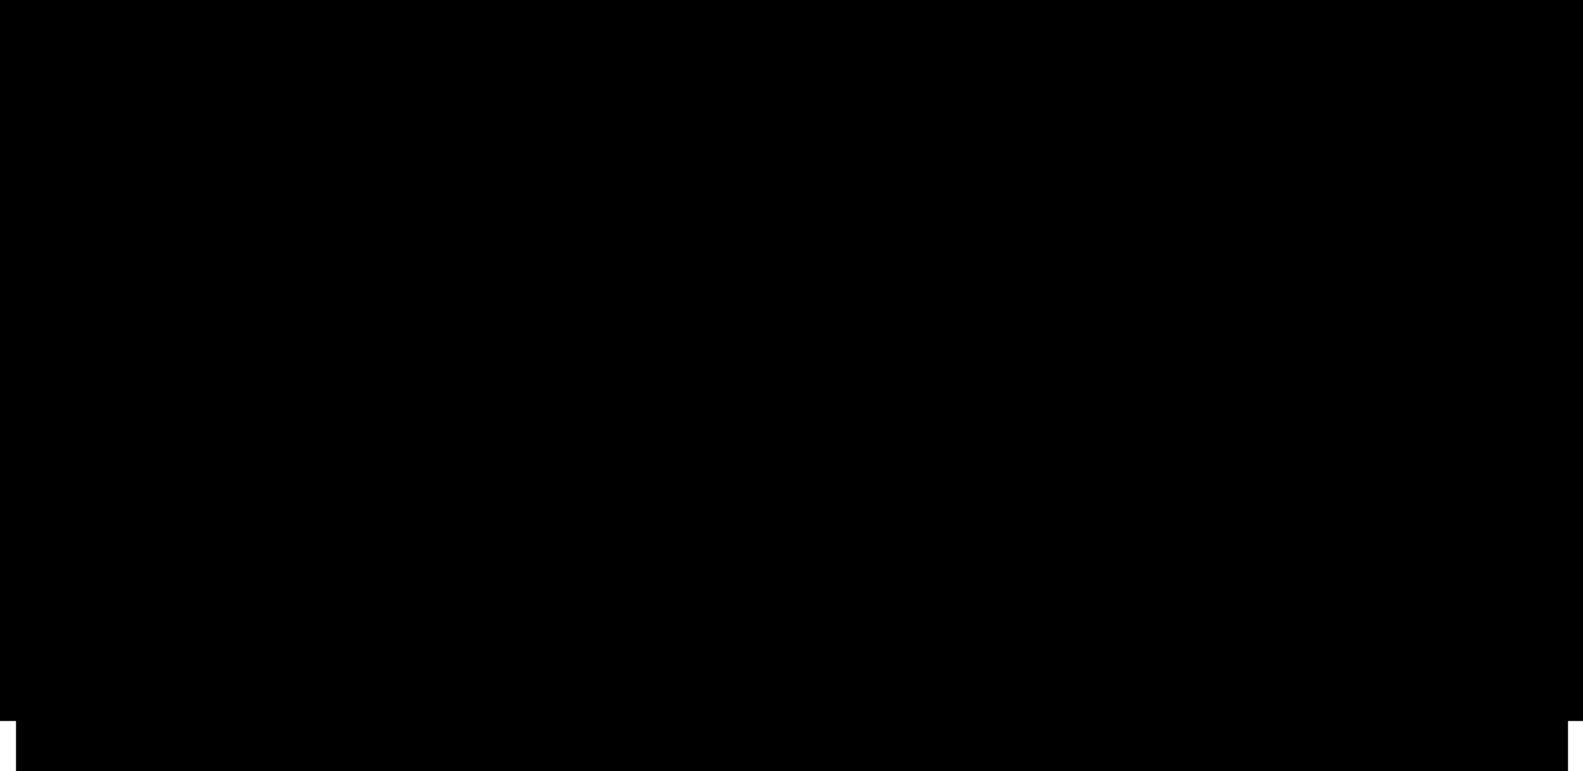

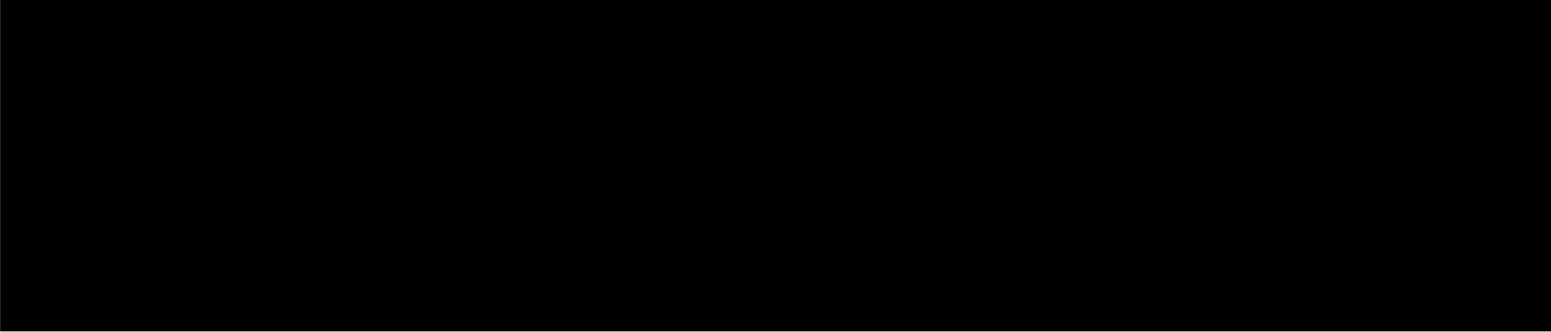

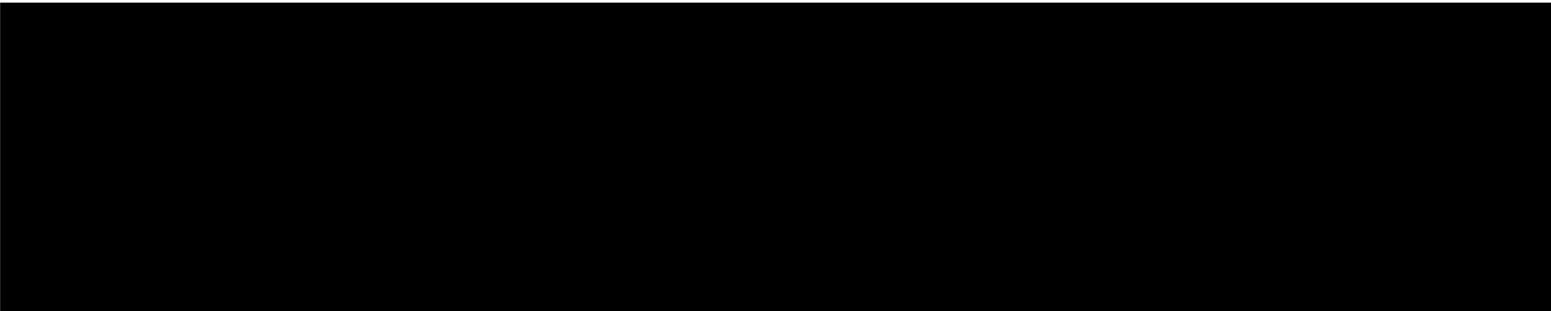

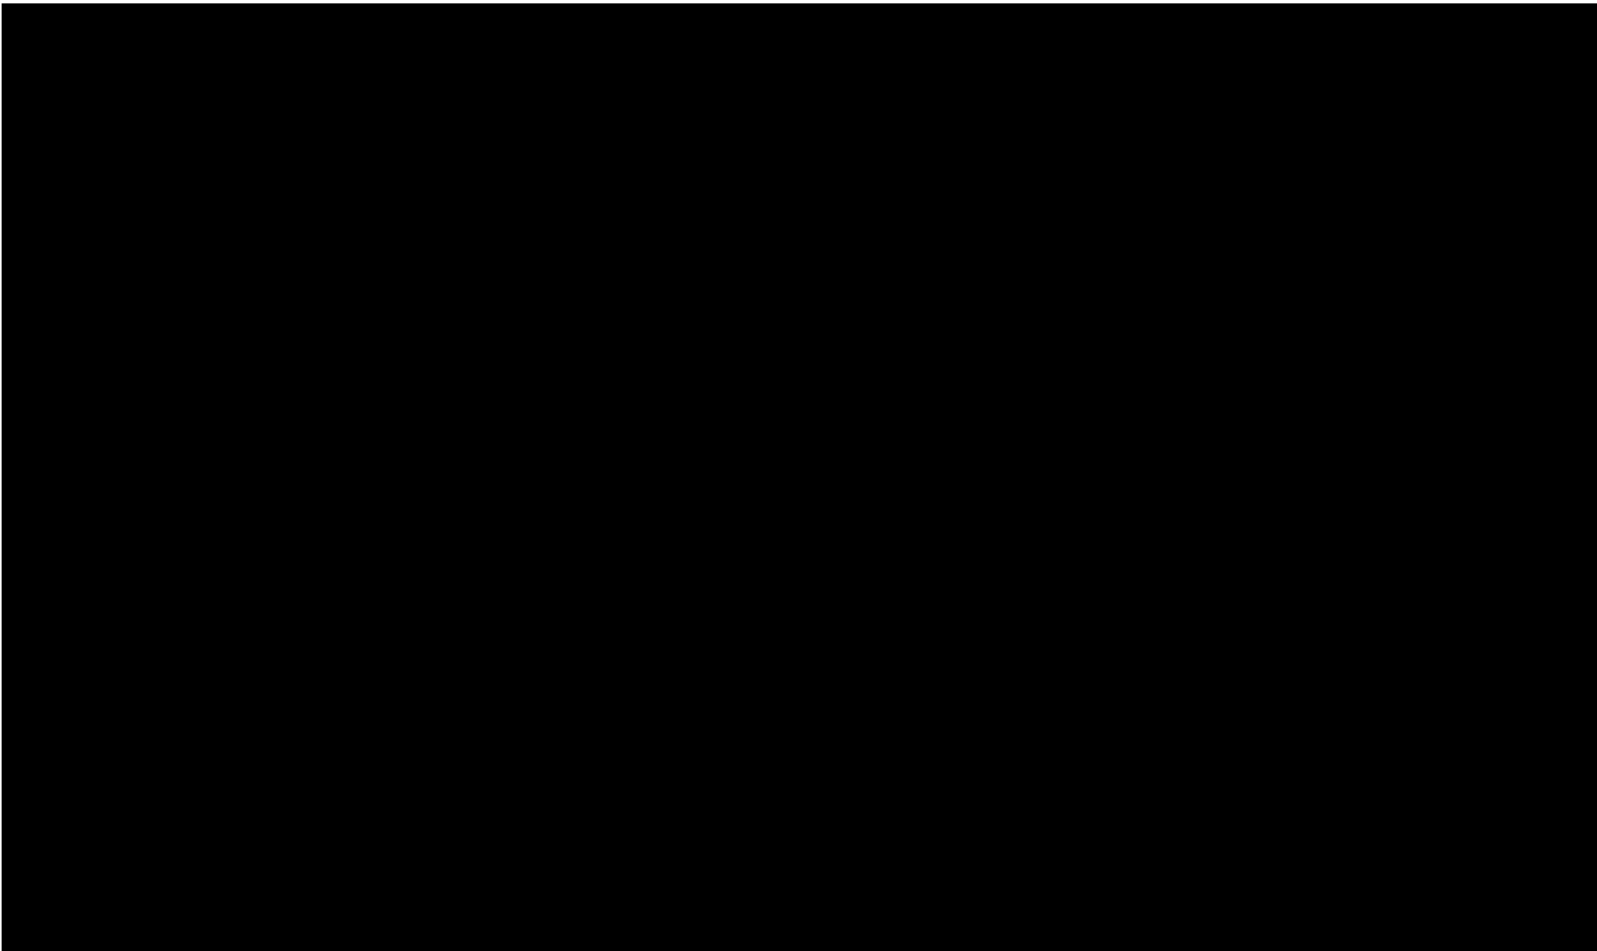

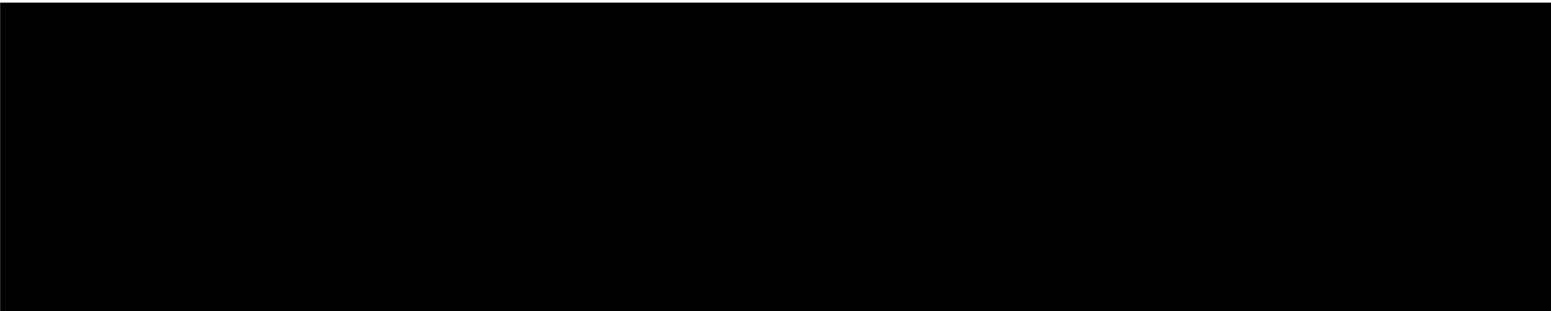

# Exhibit 239

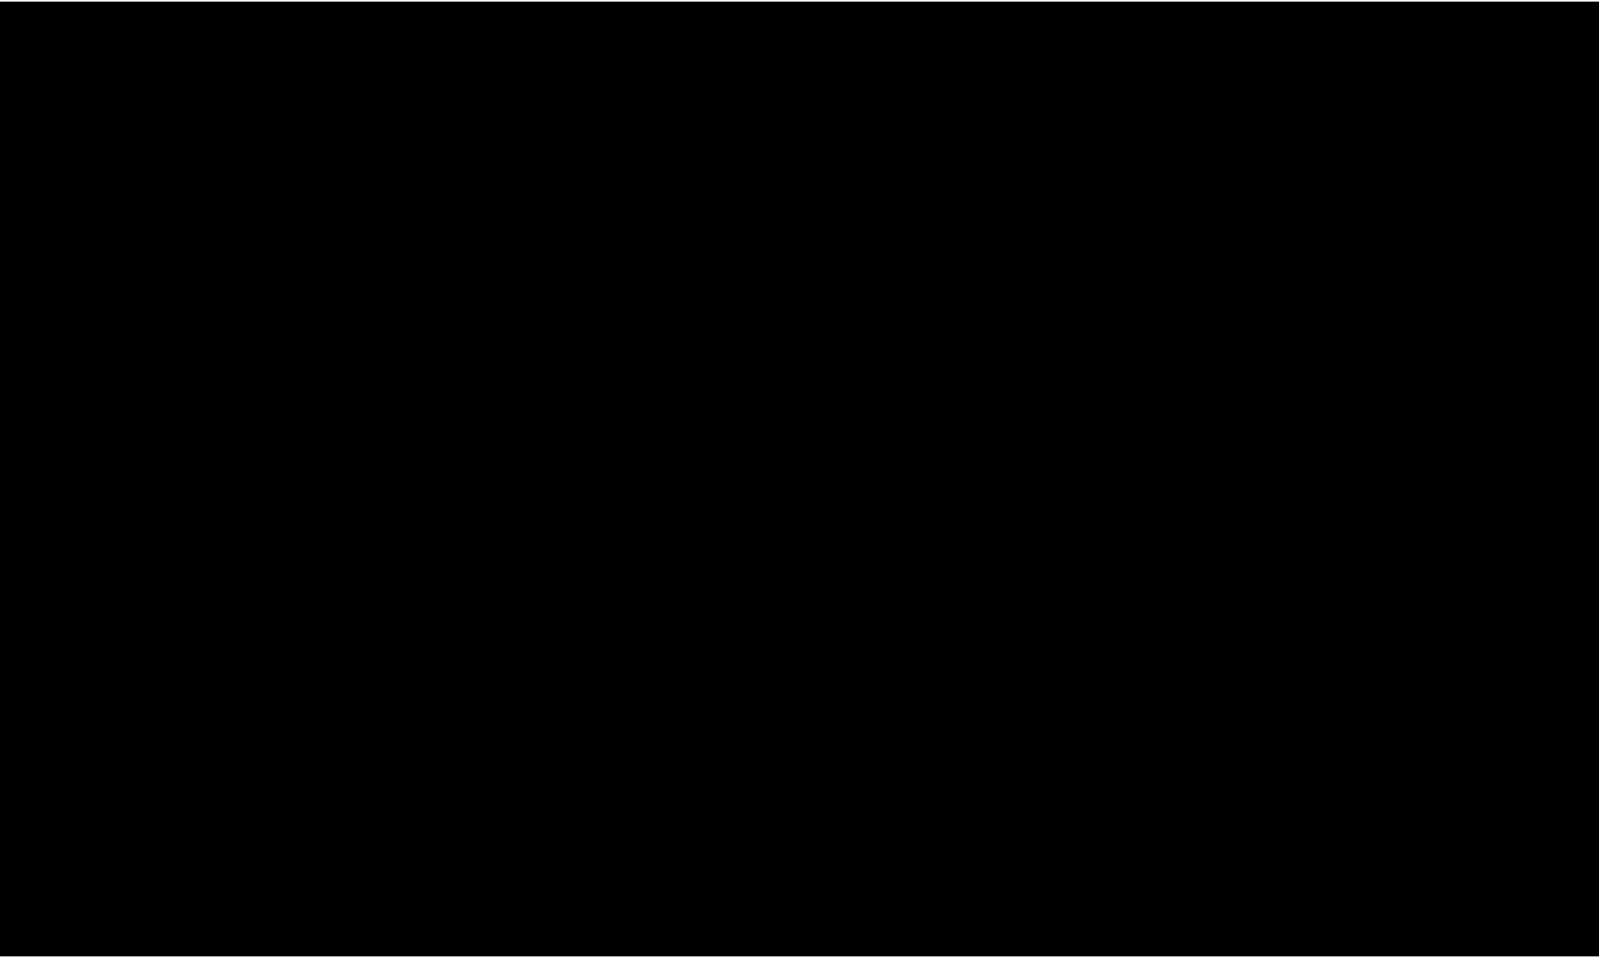

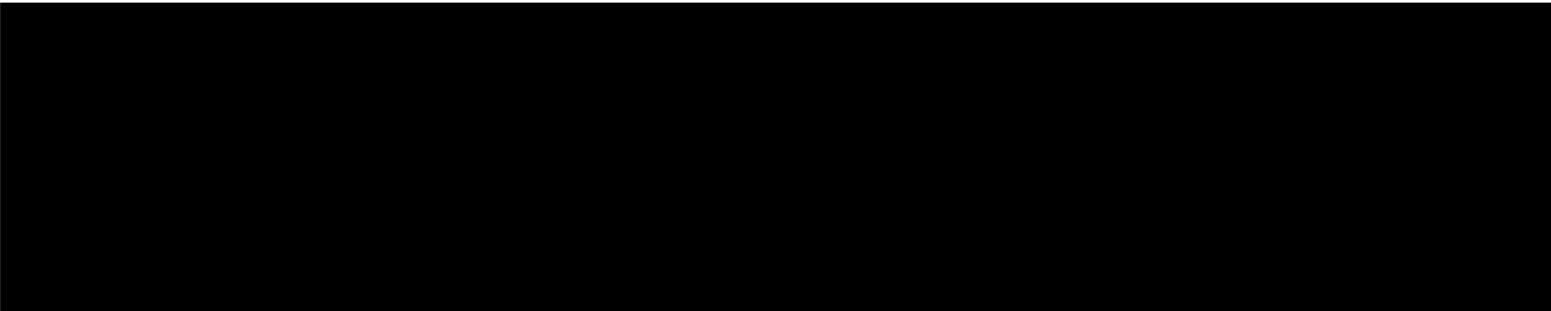

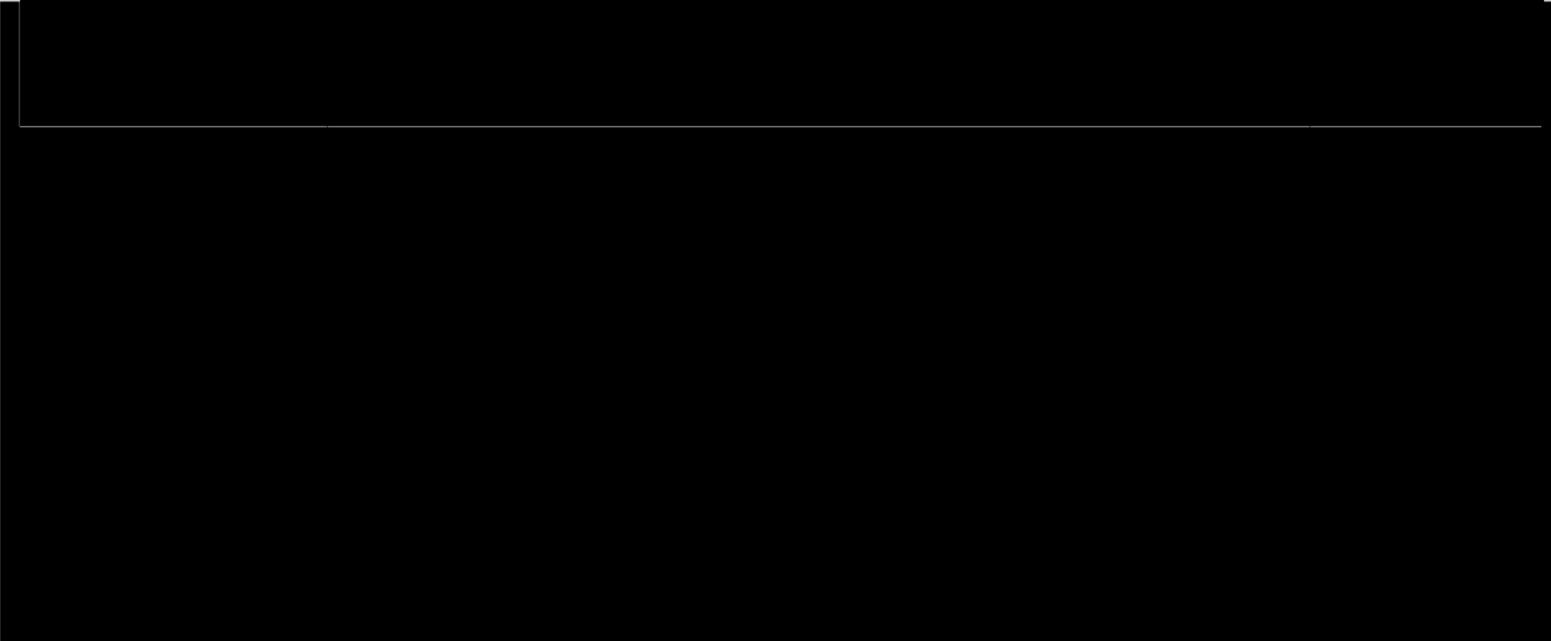

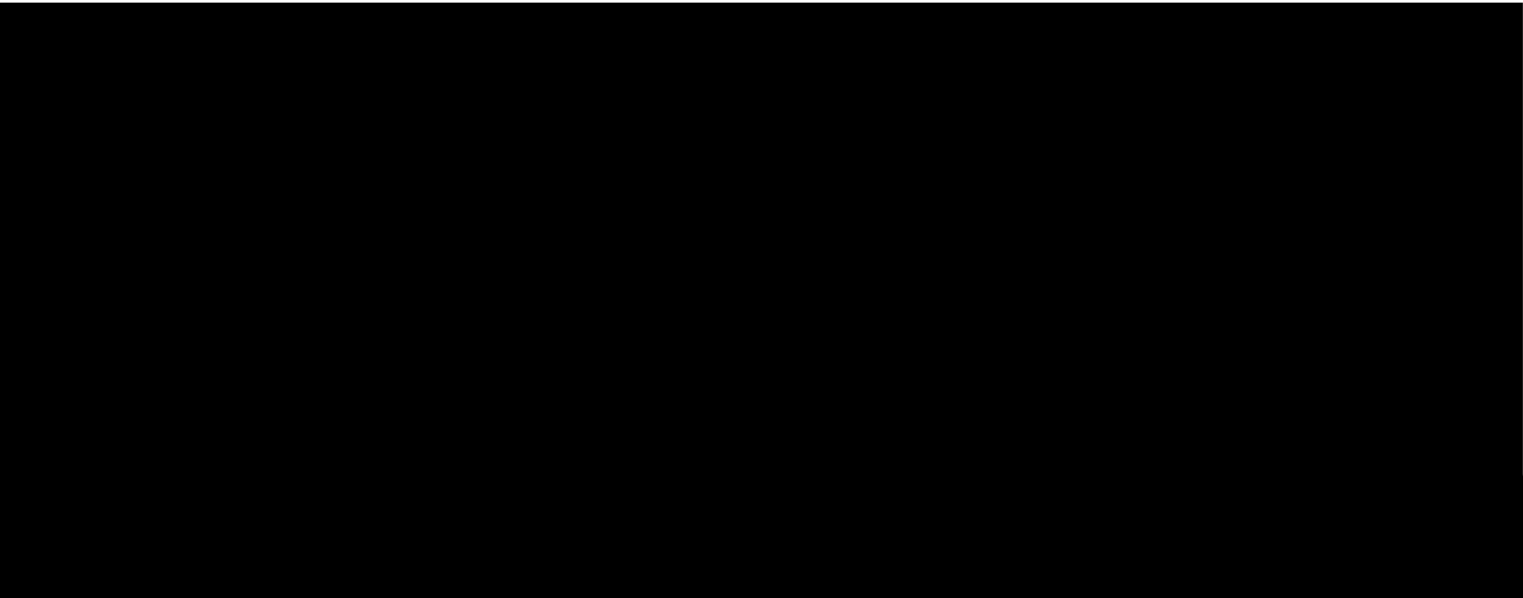

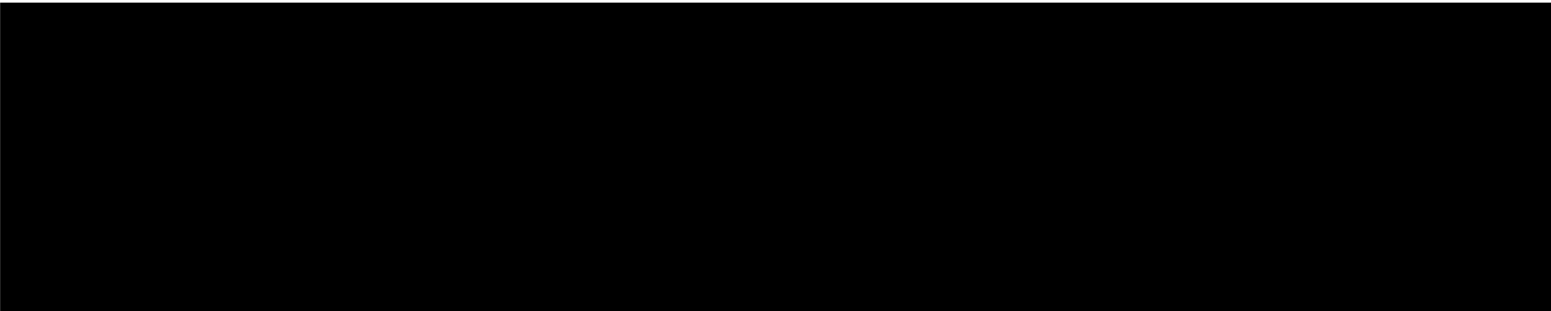

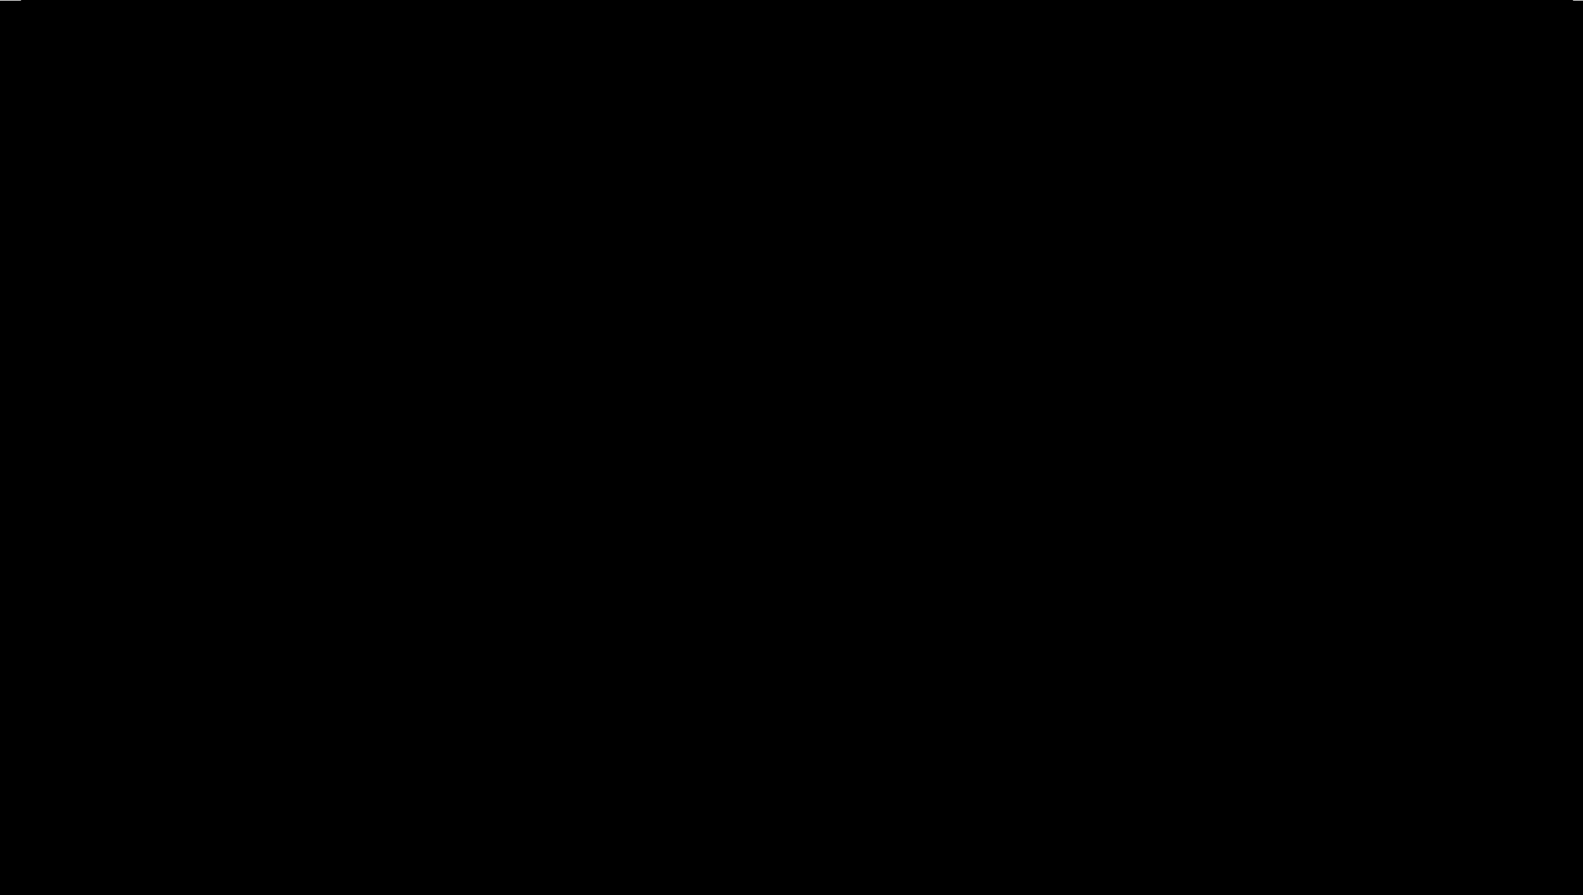

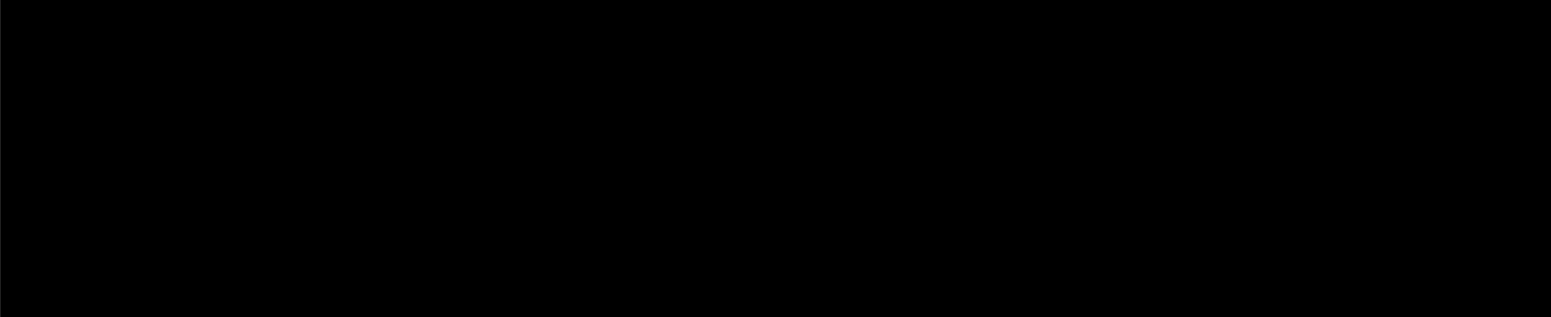

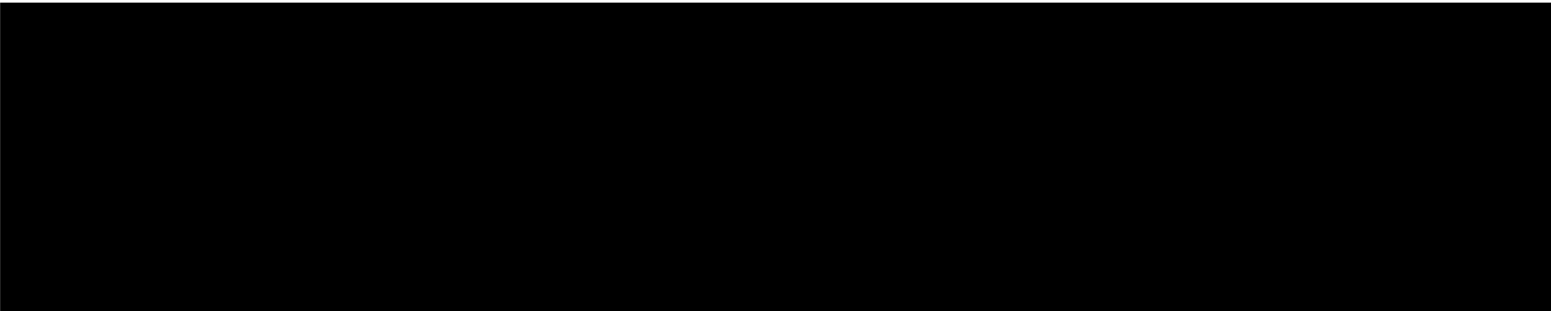

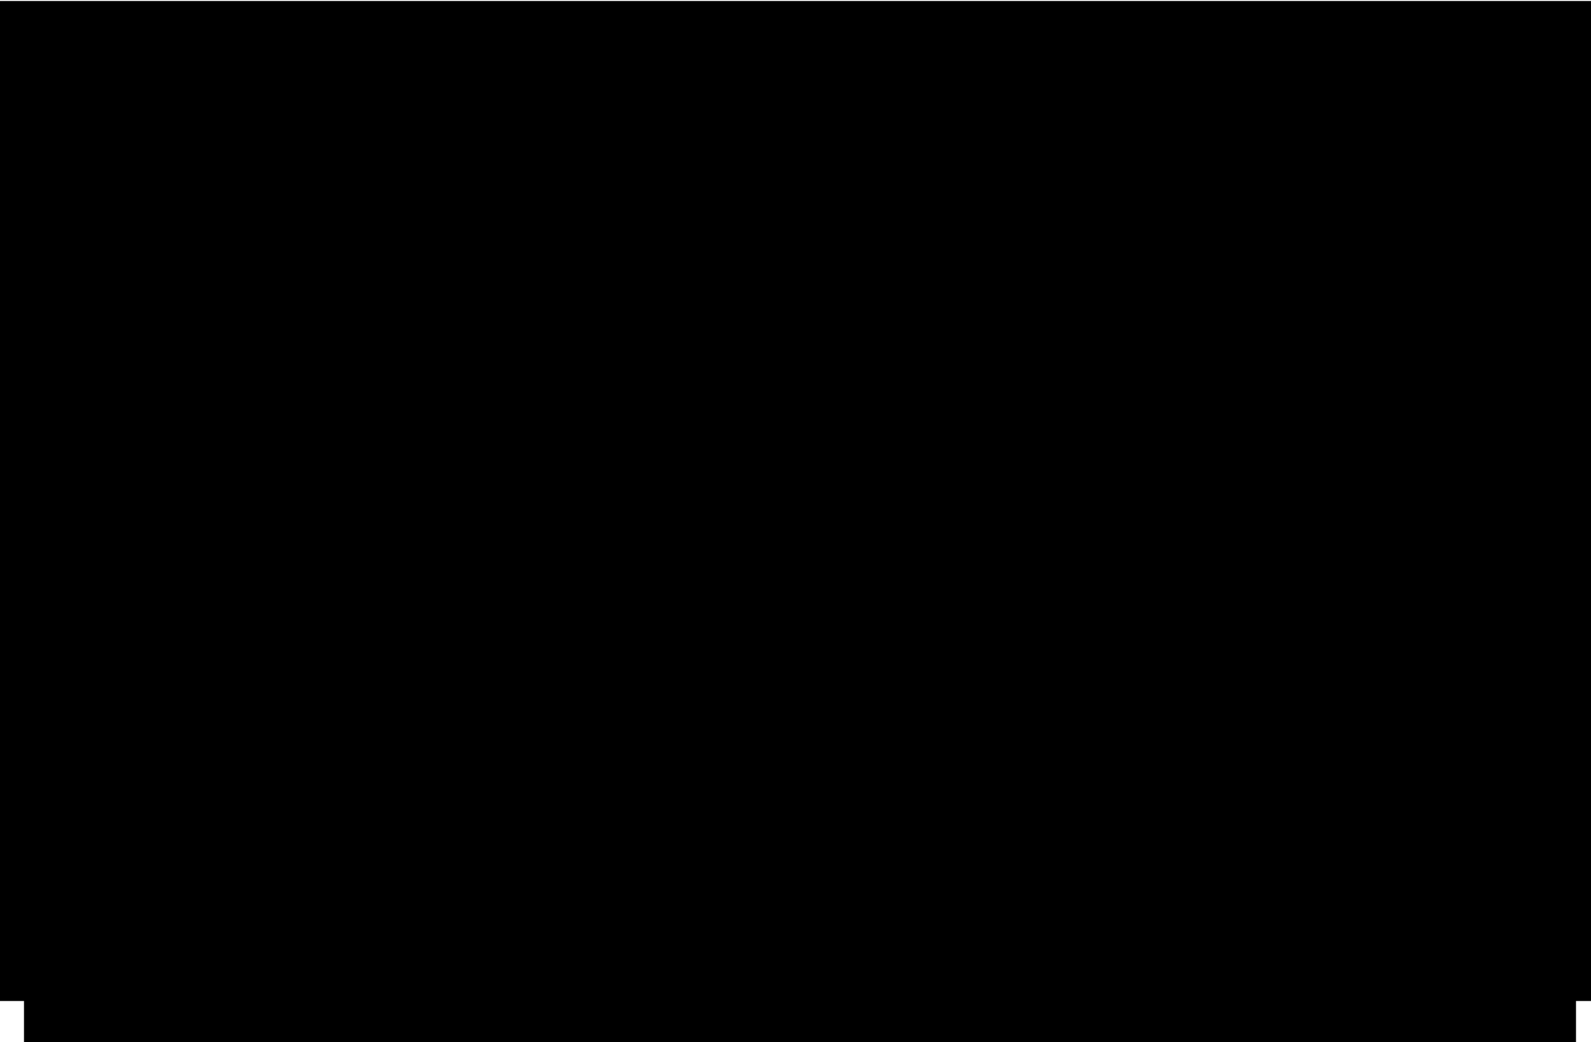

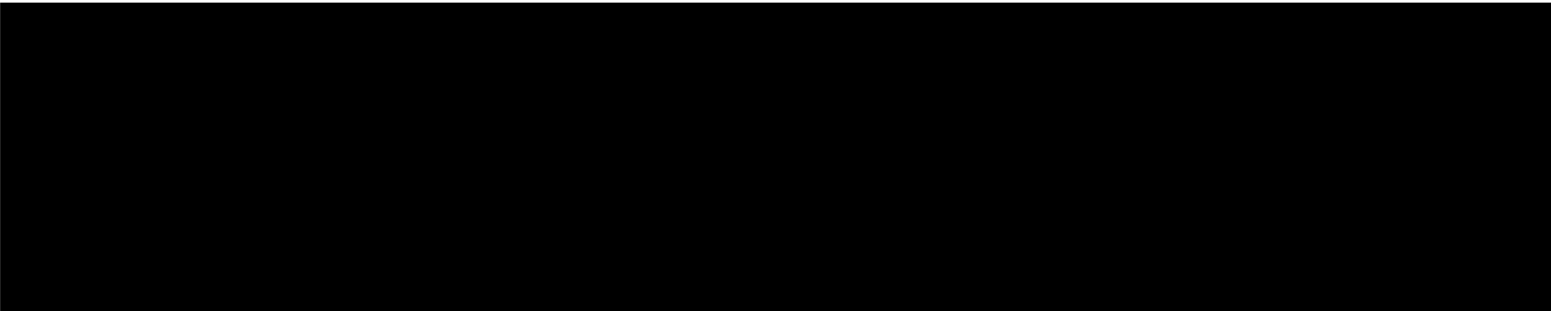

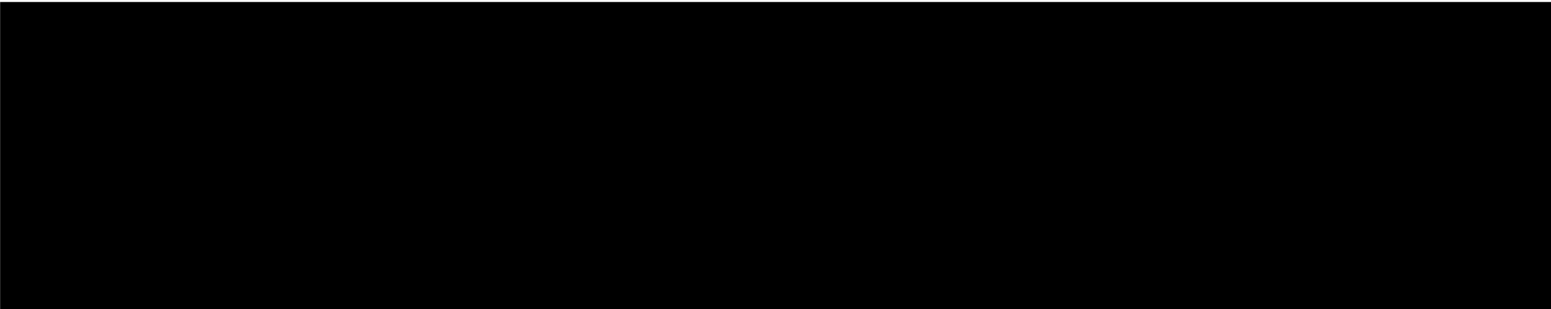

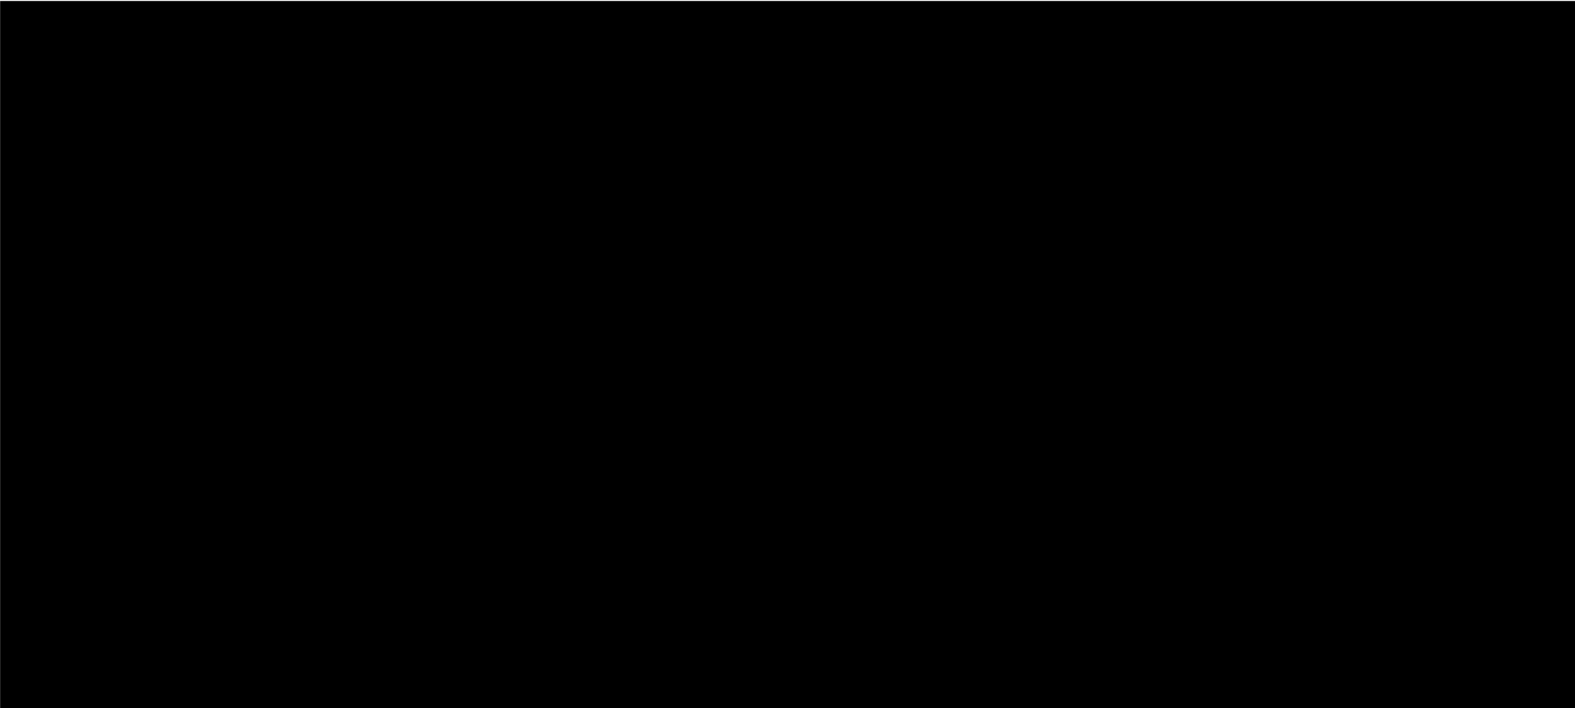

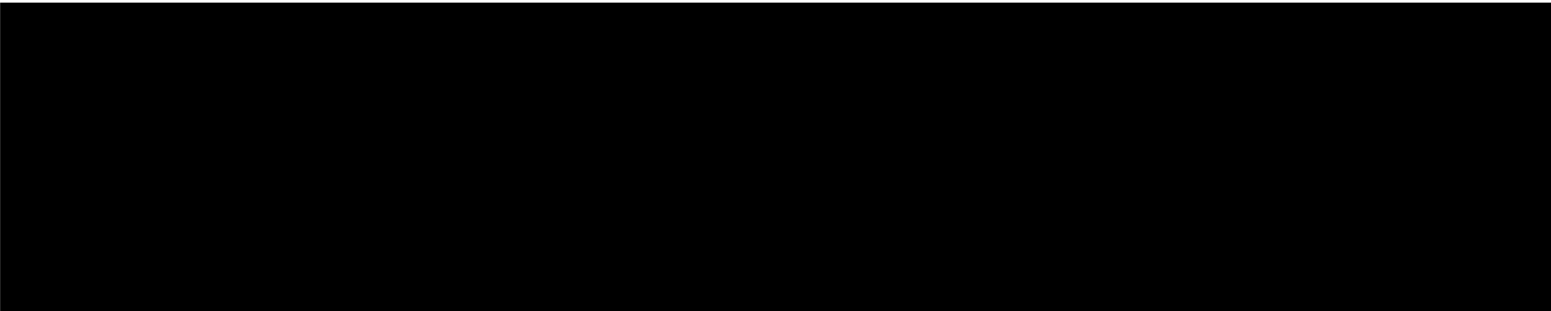

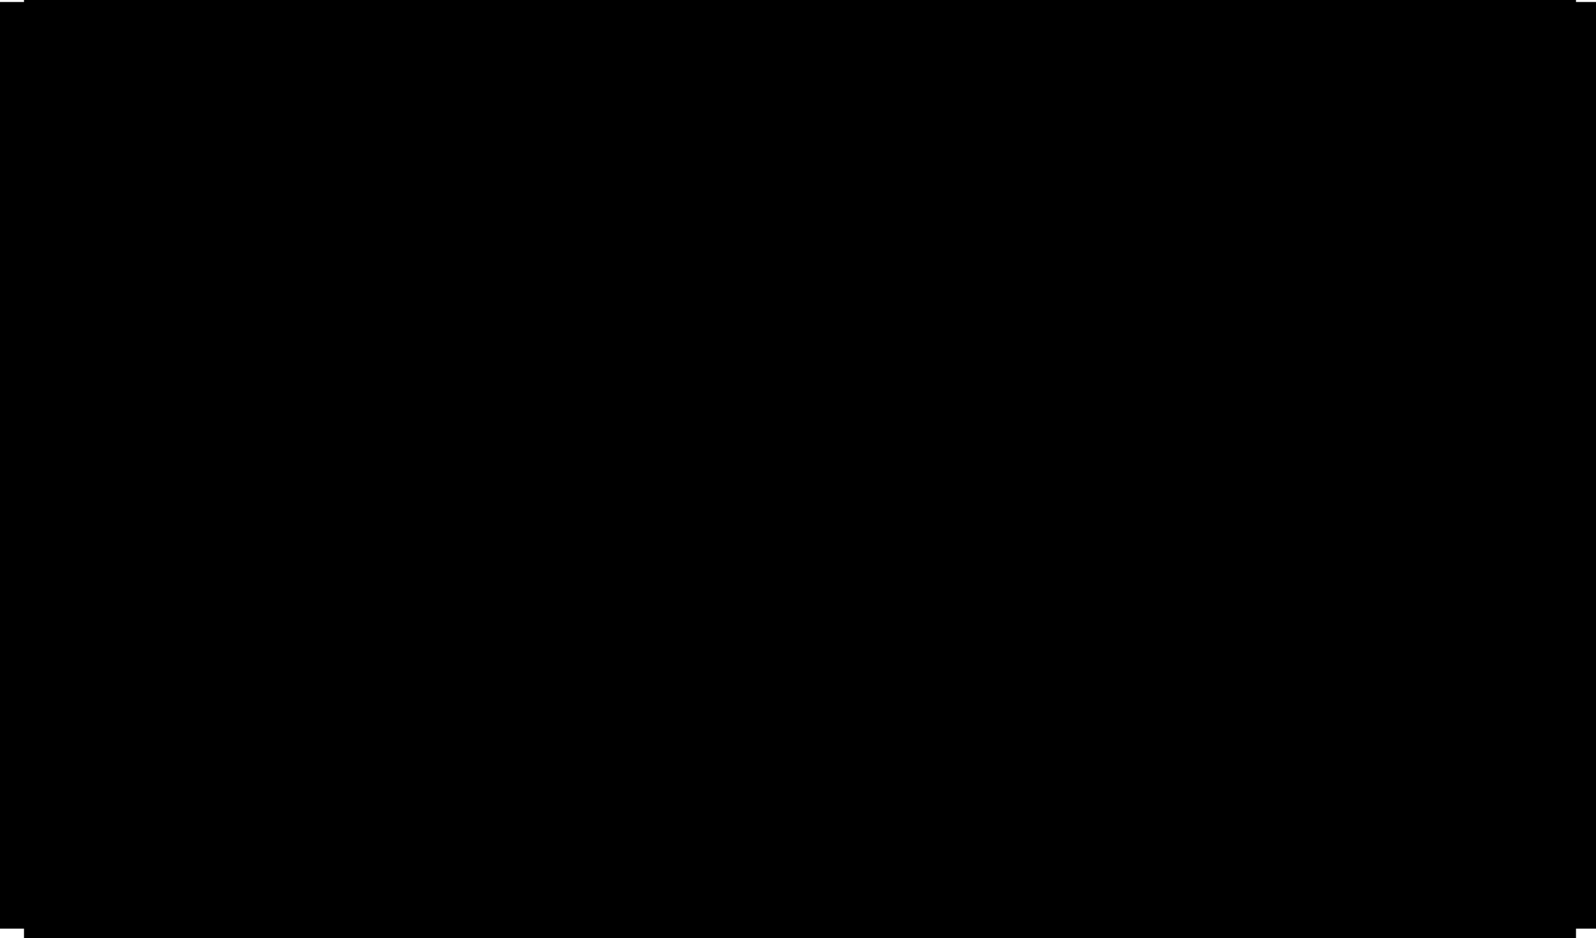

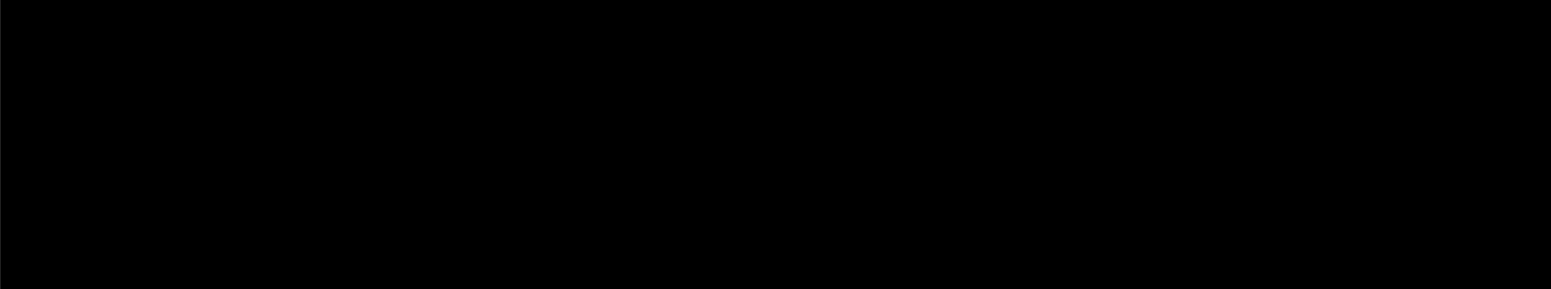

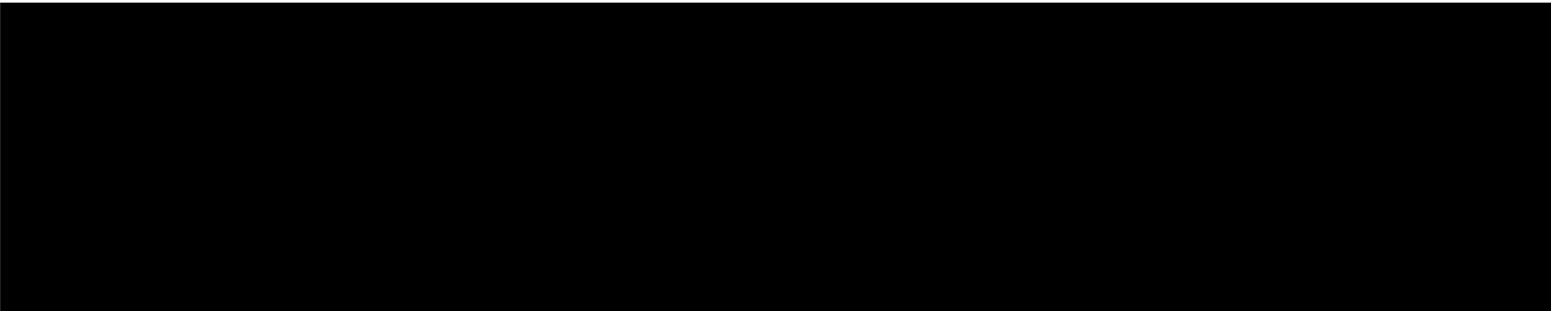

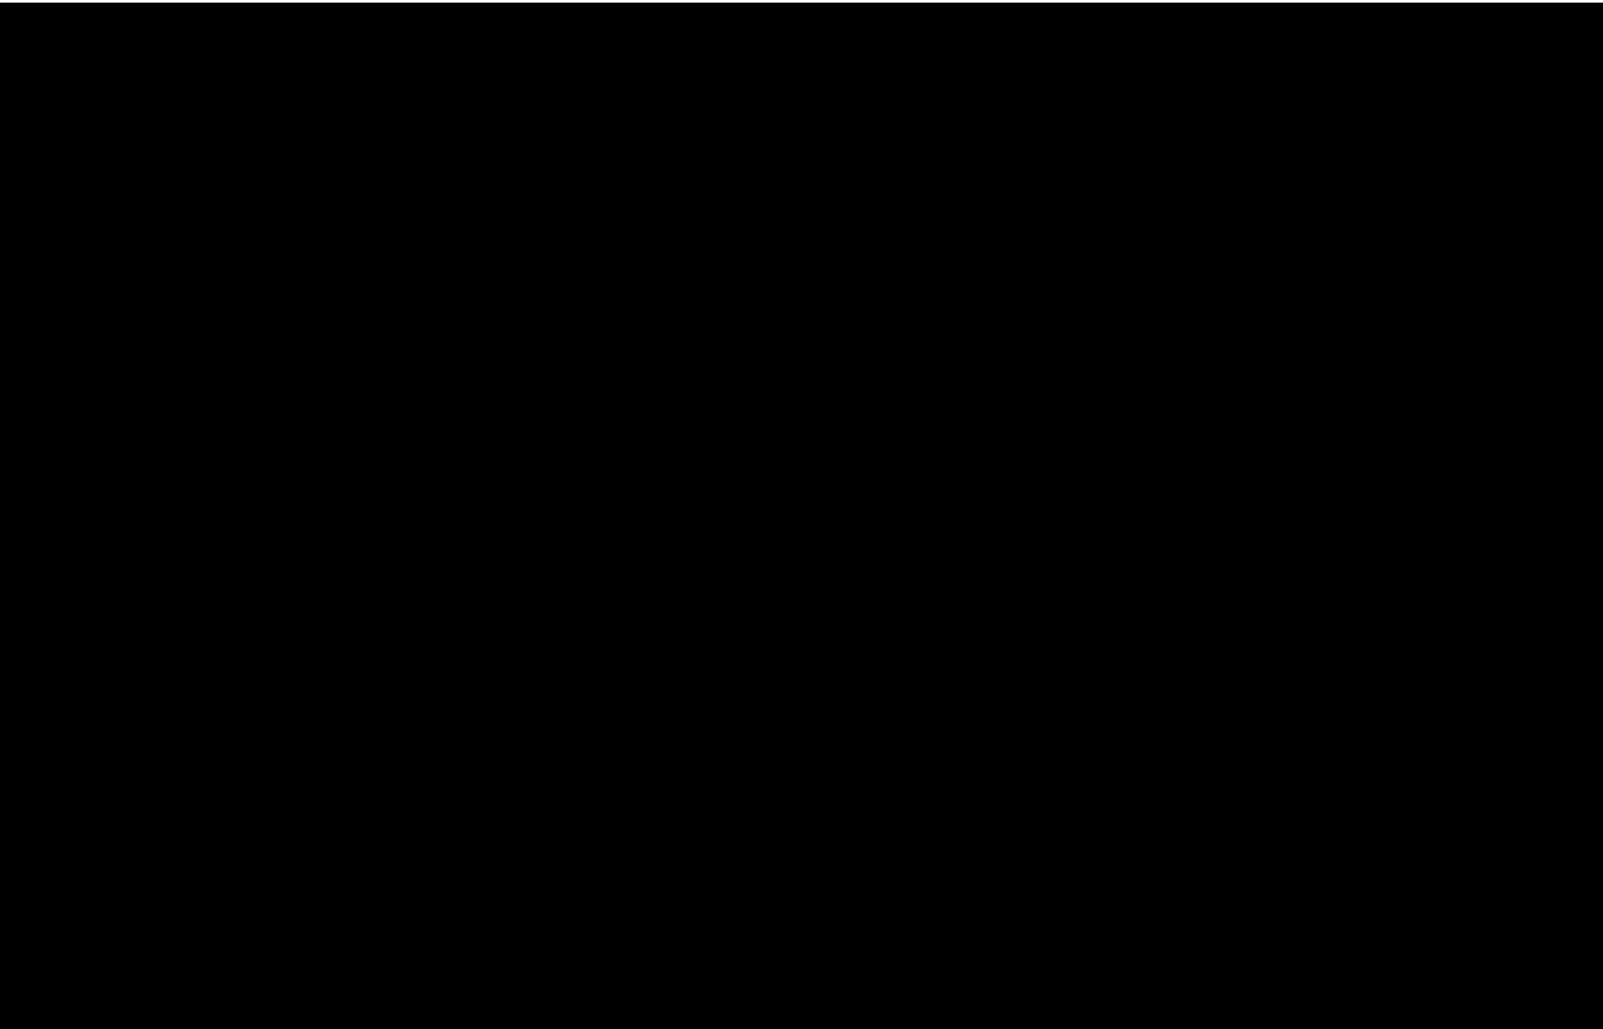

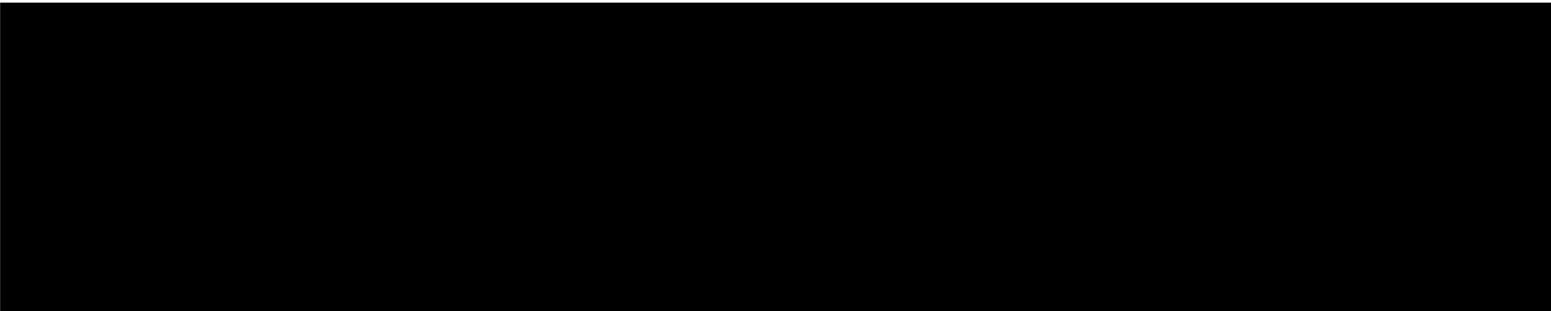

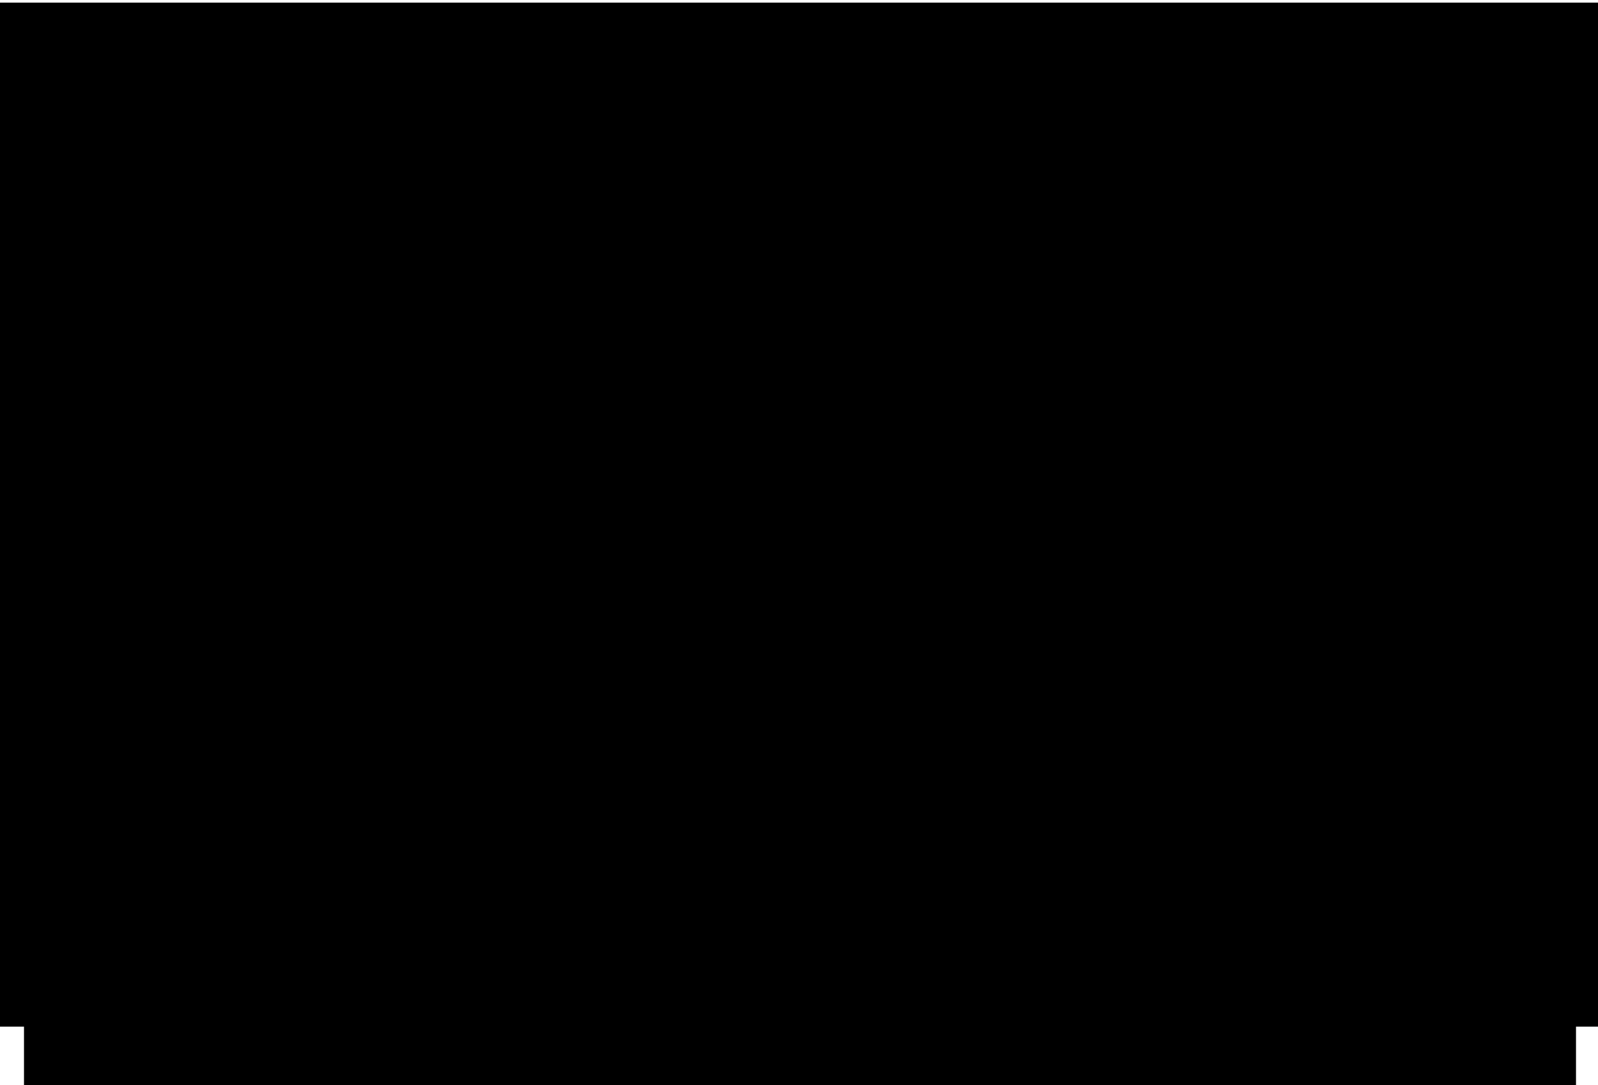

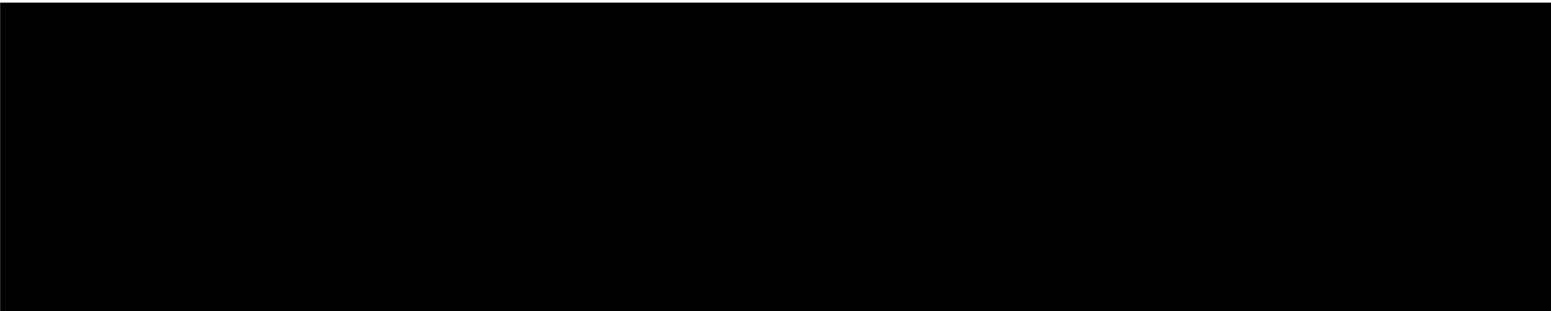

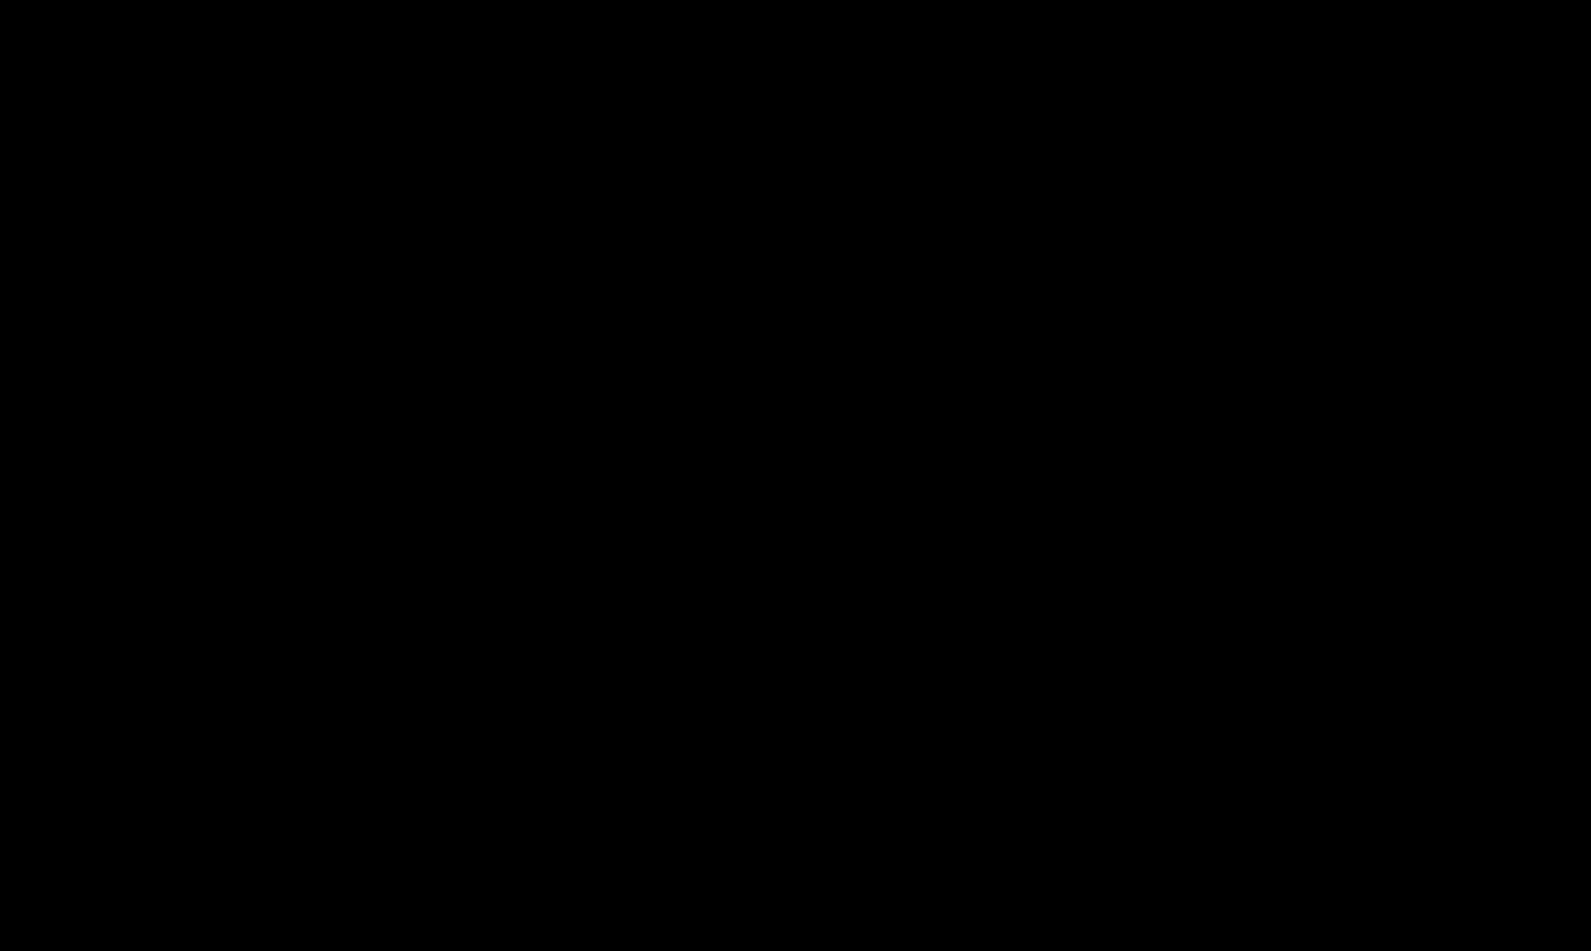

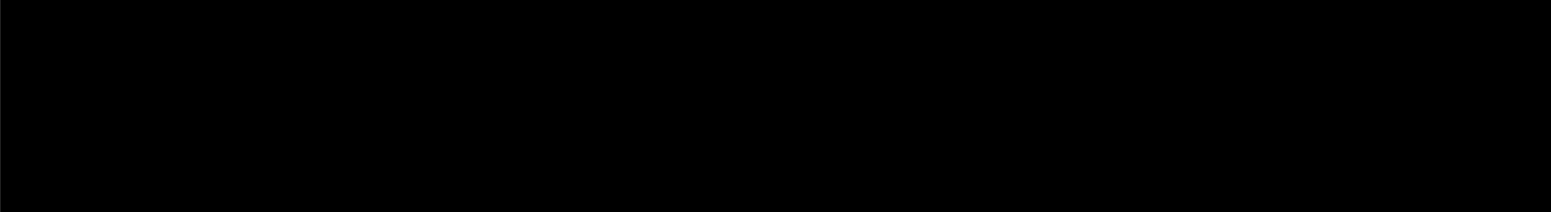

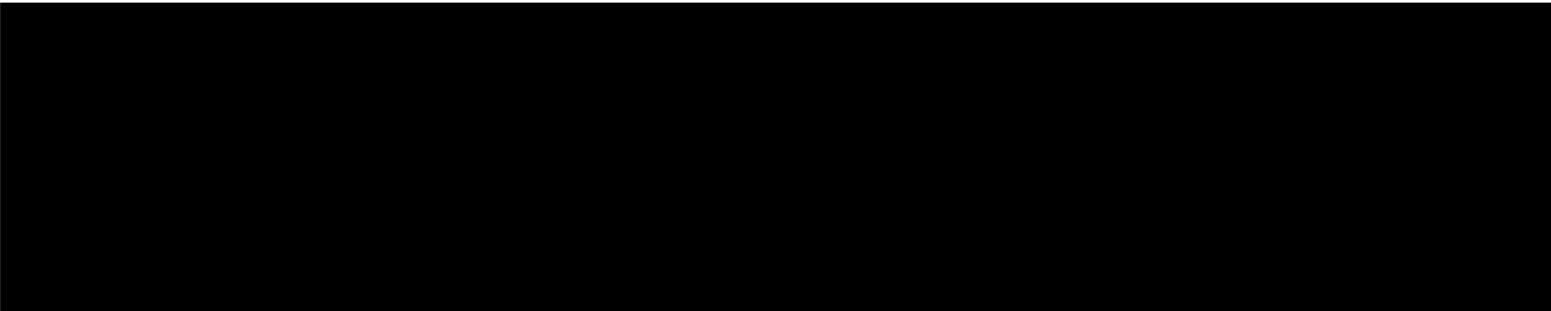

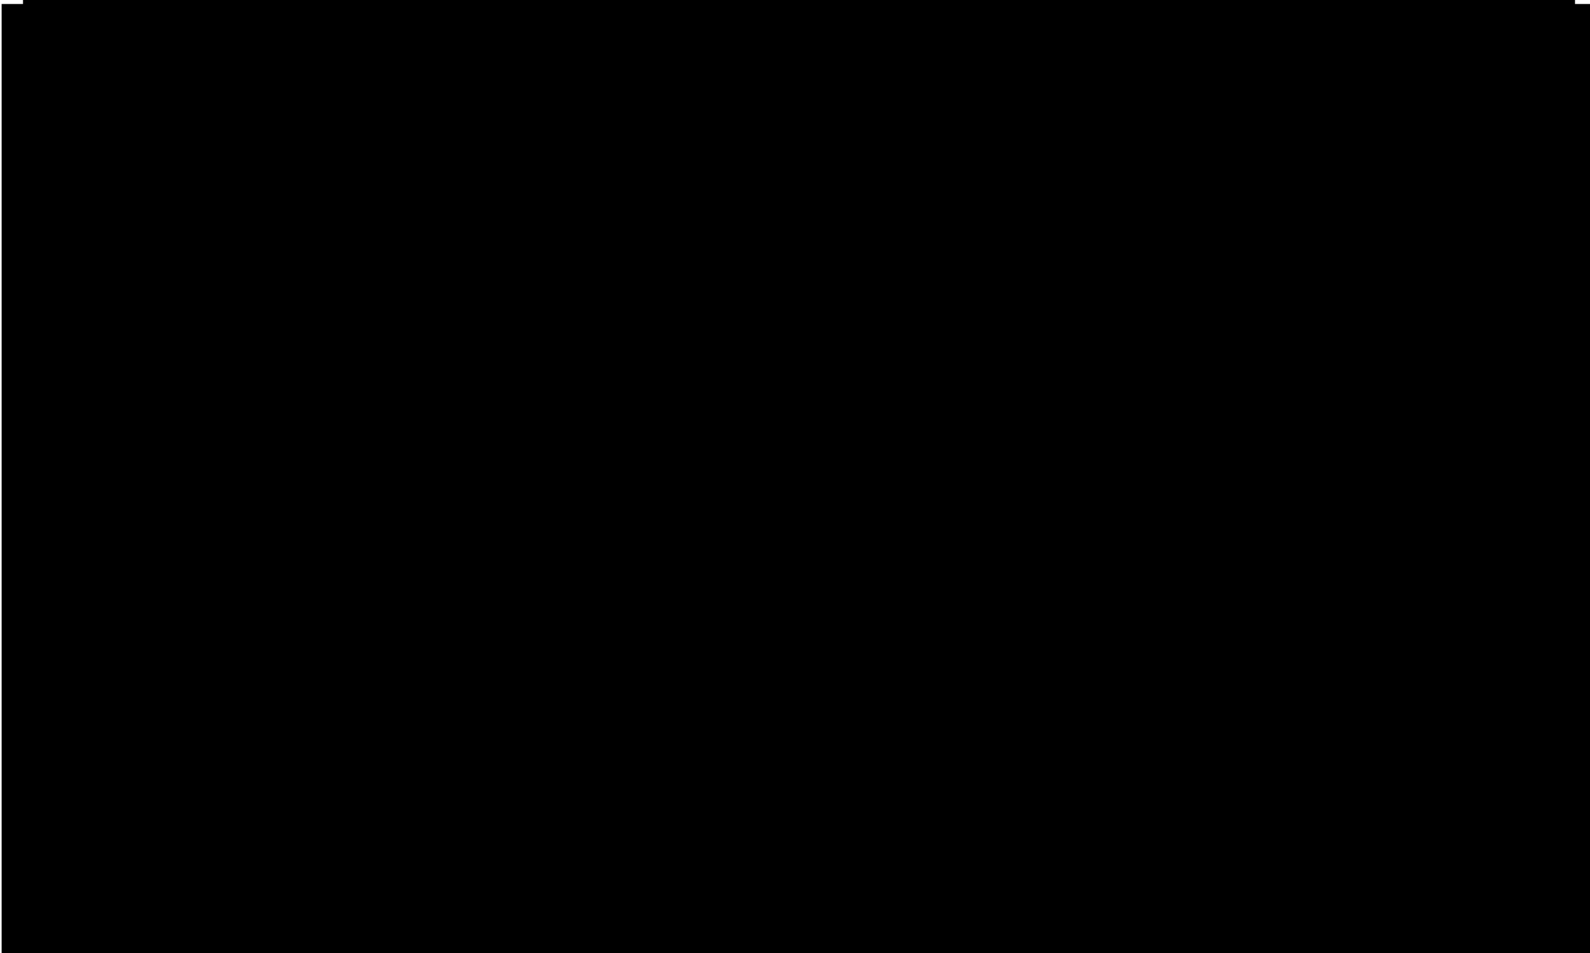

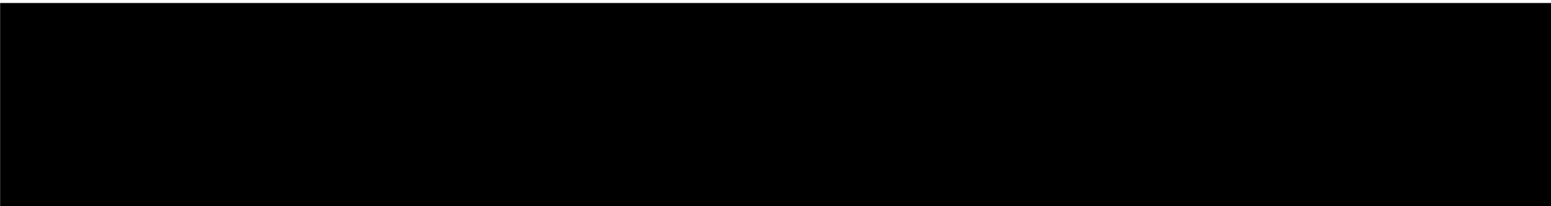

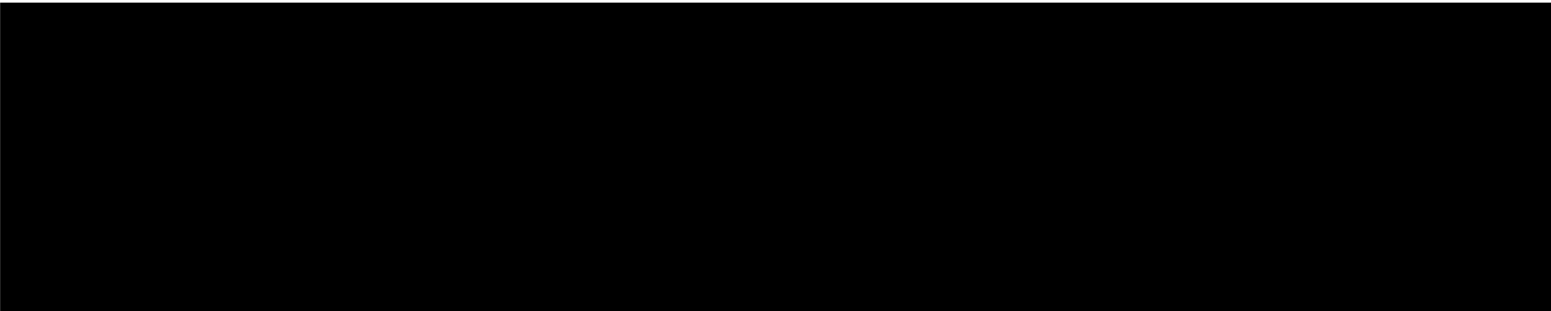

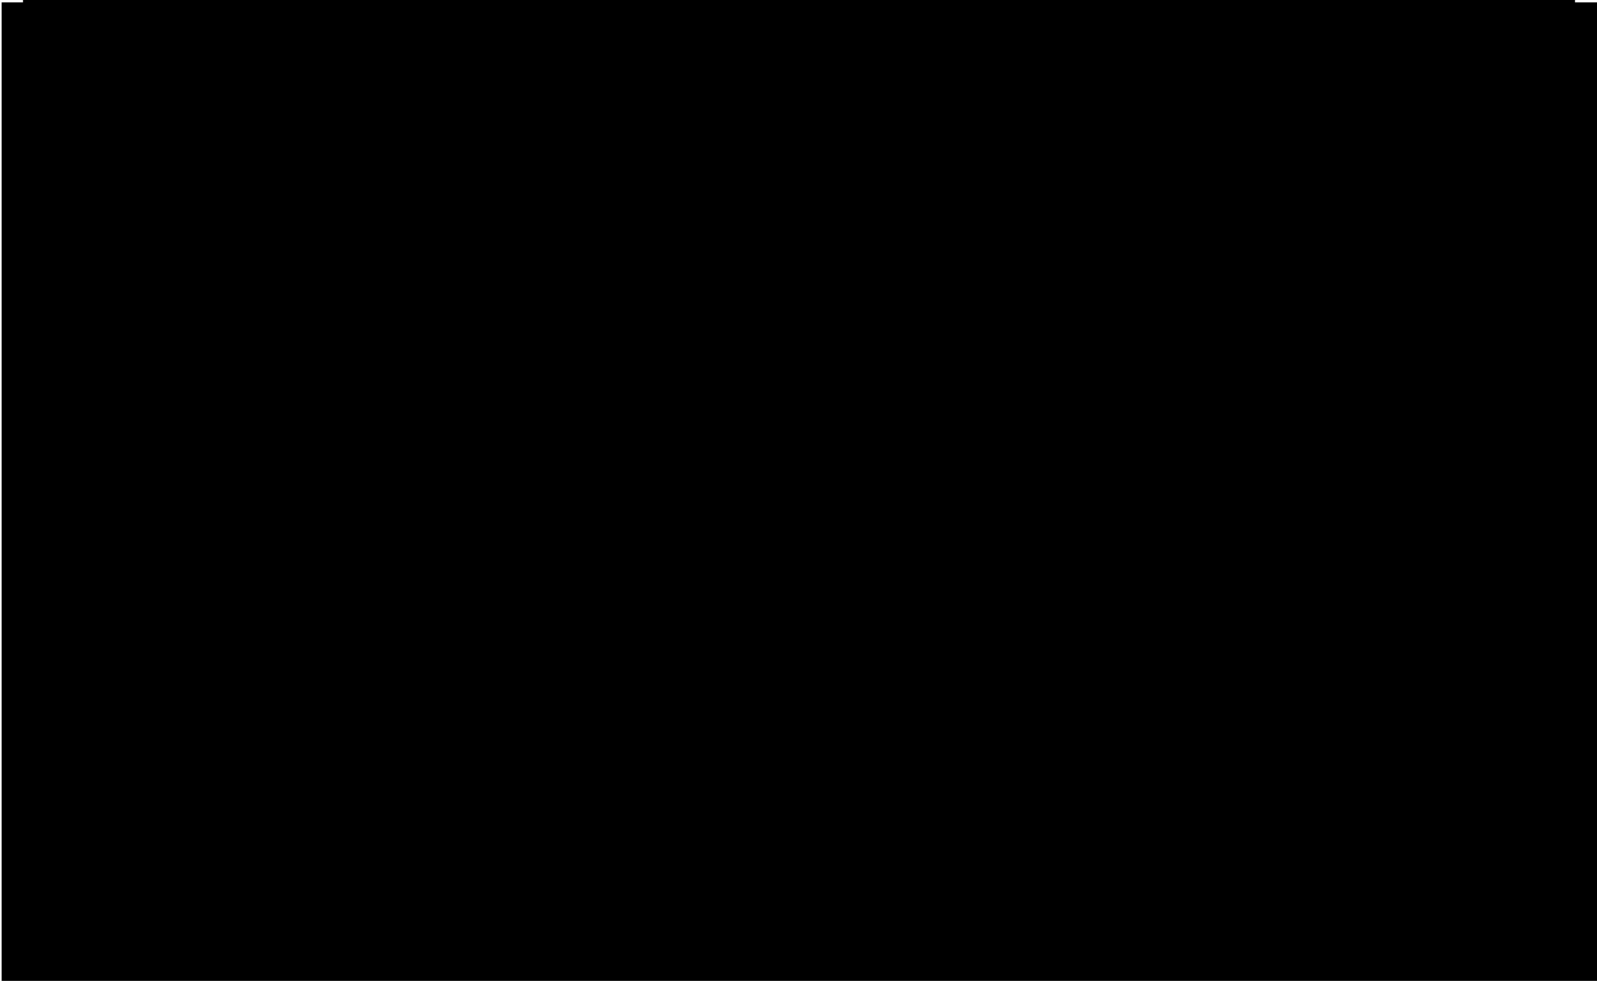

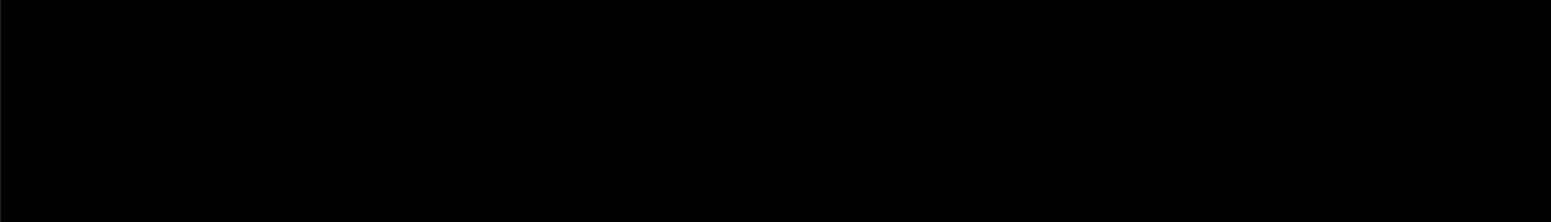

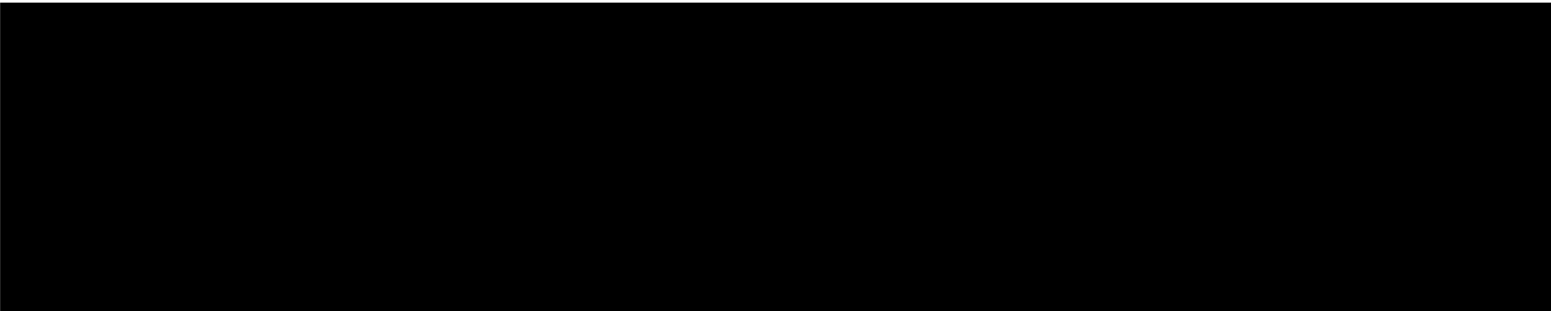

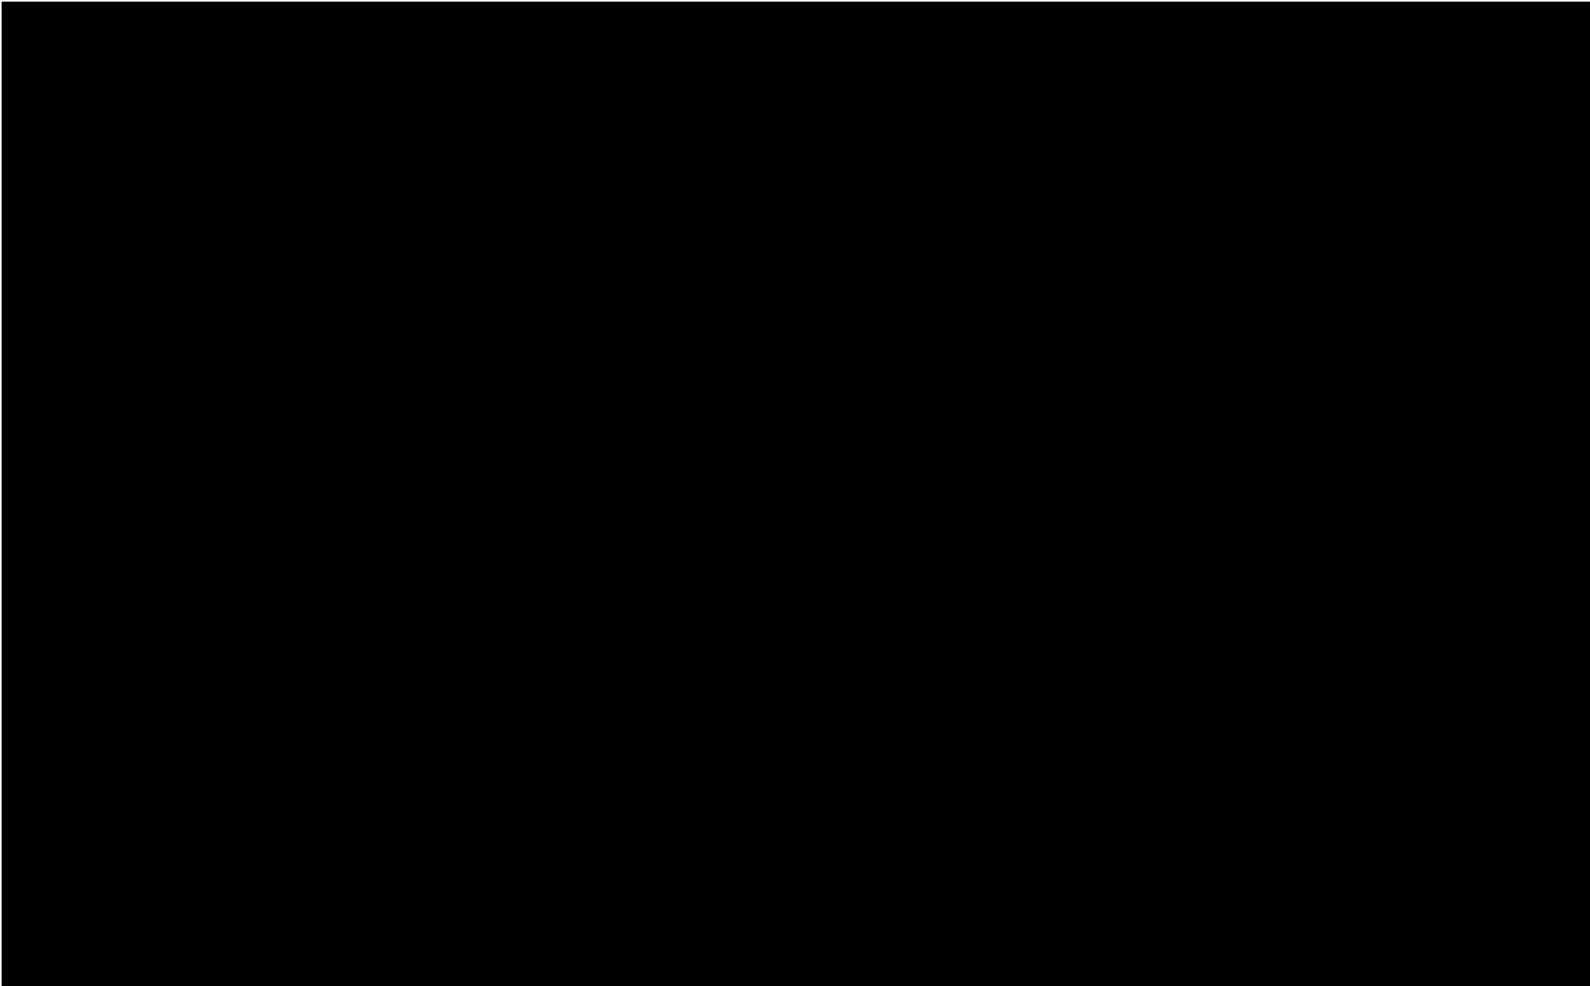

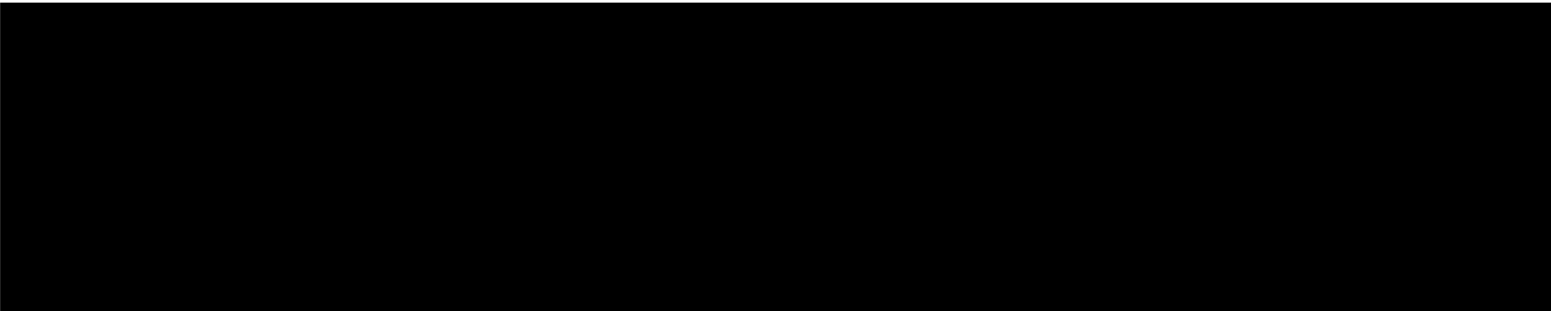

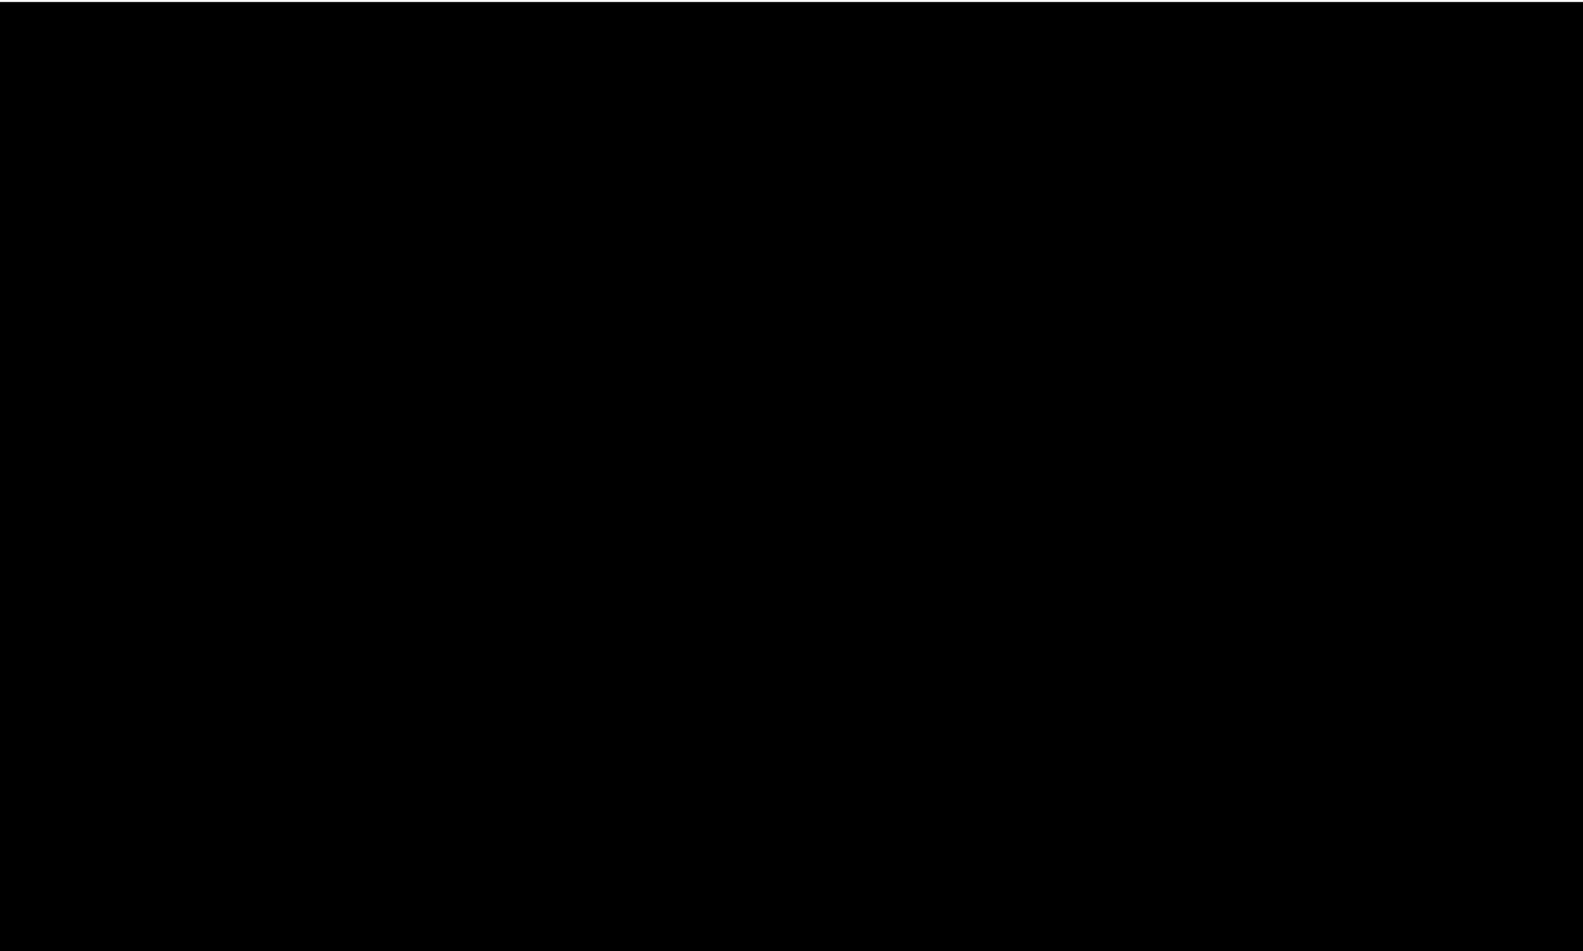

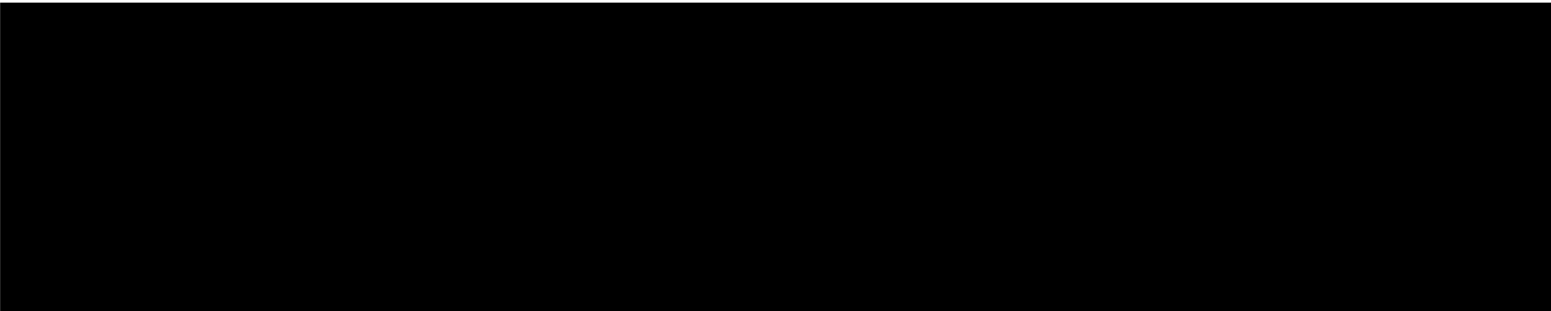

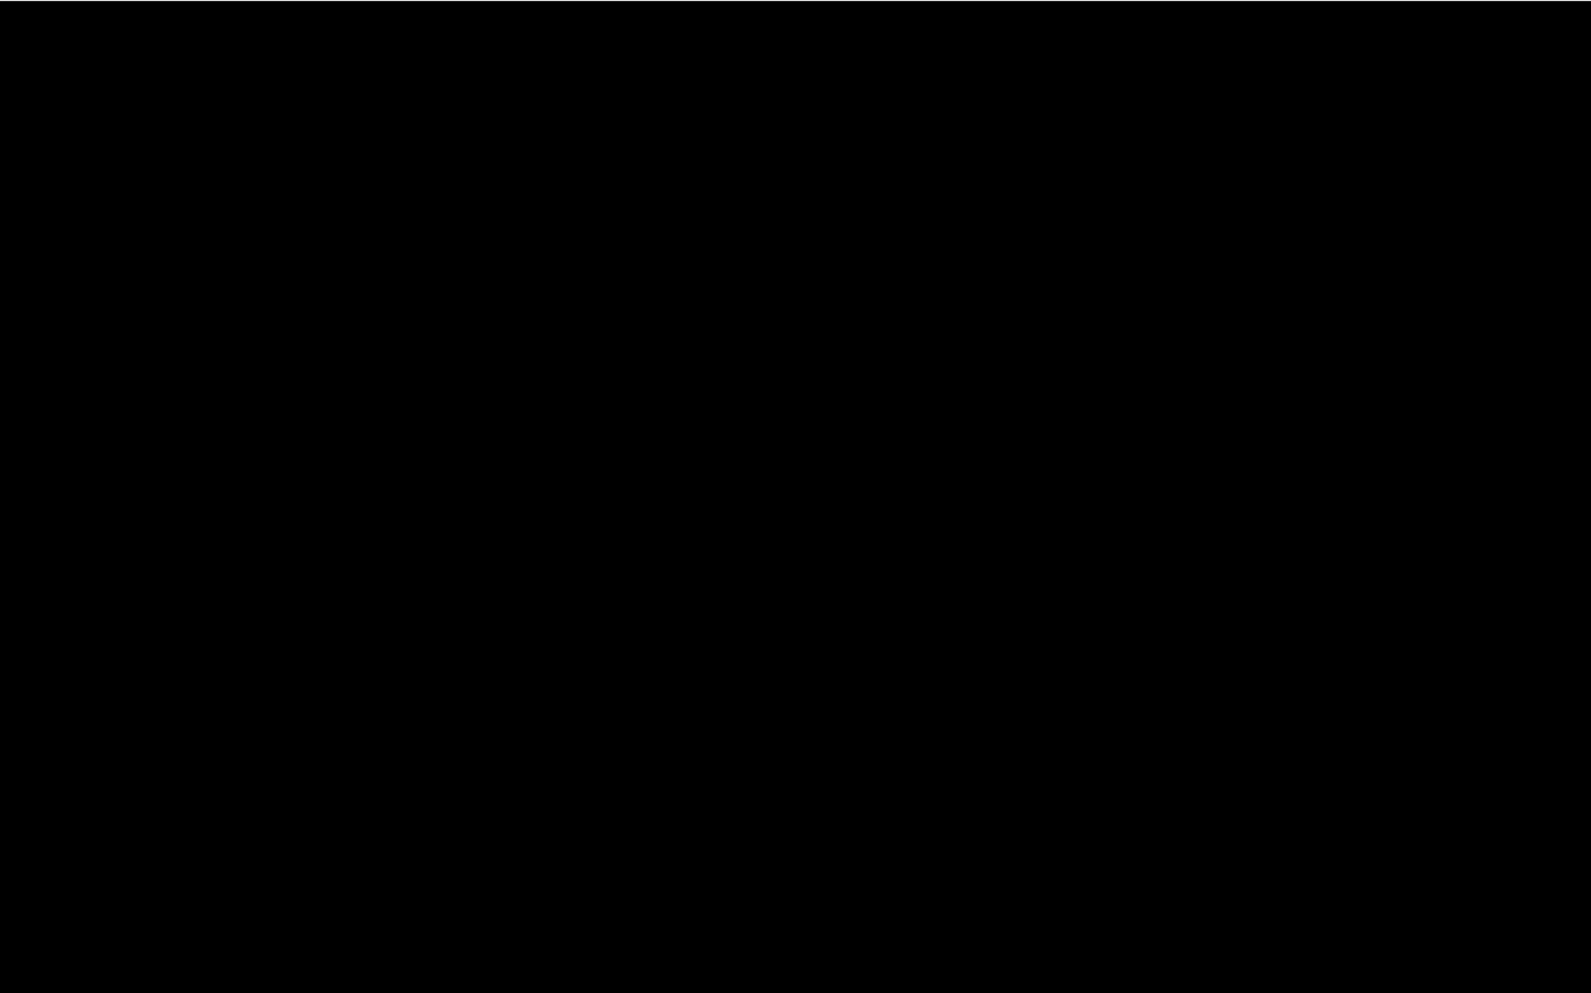

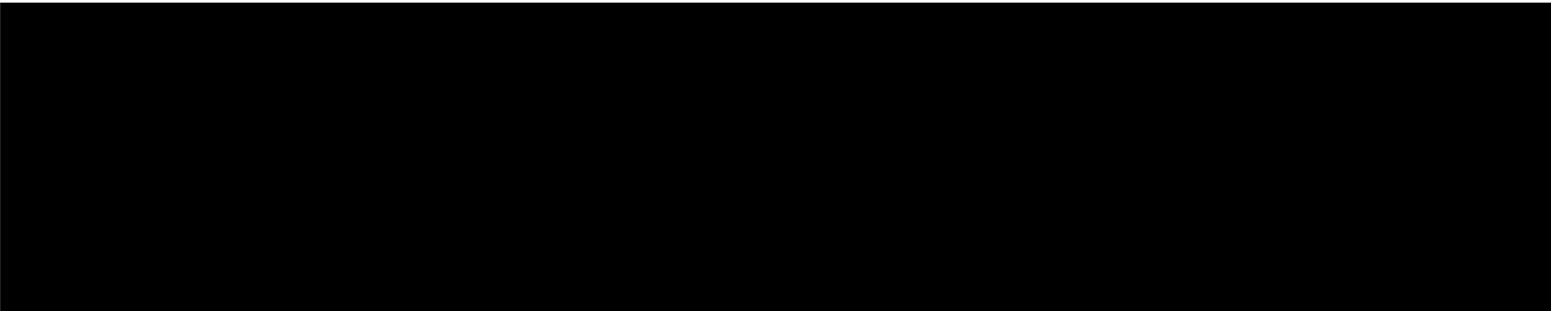

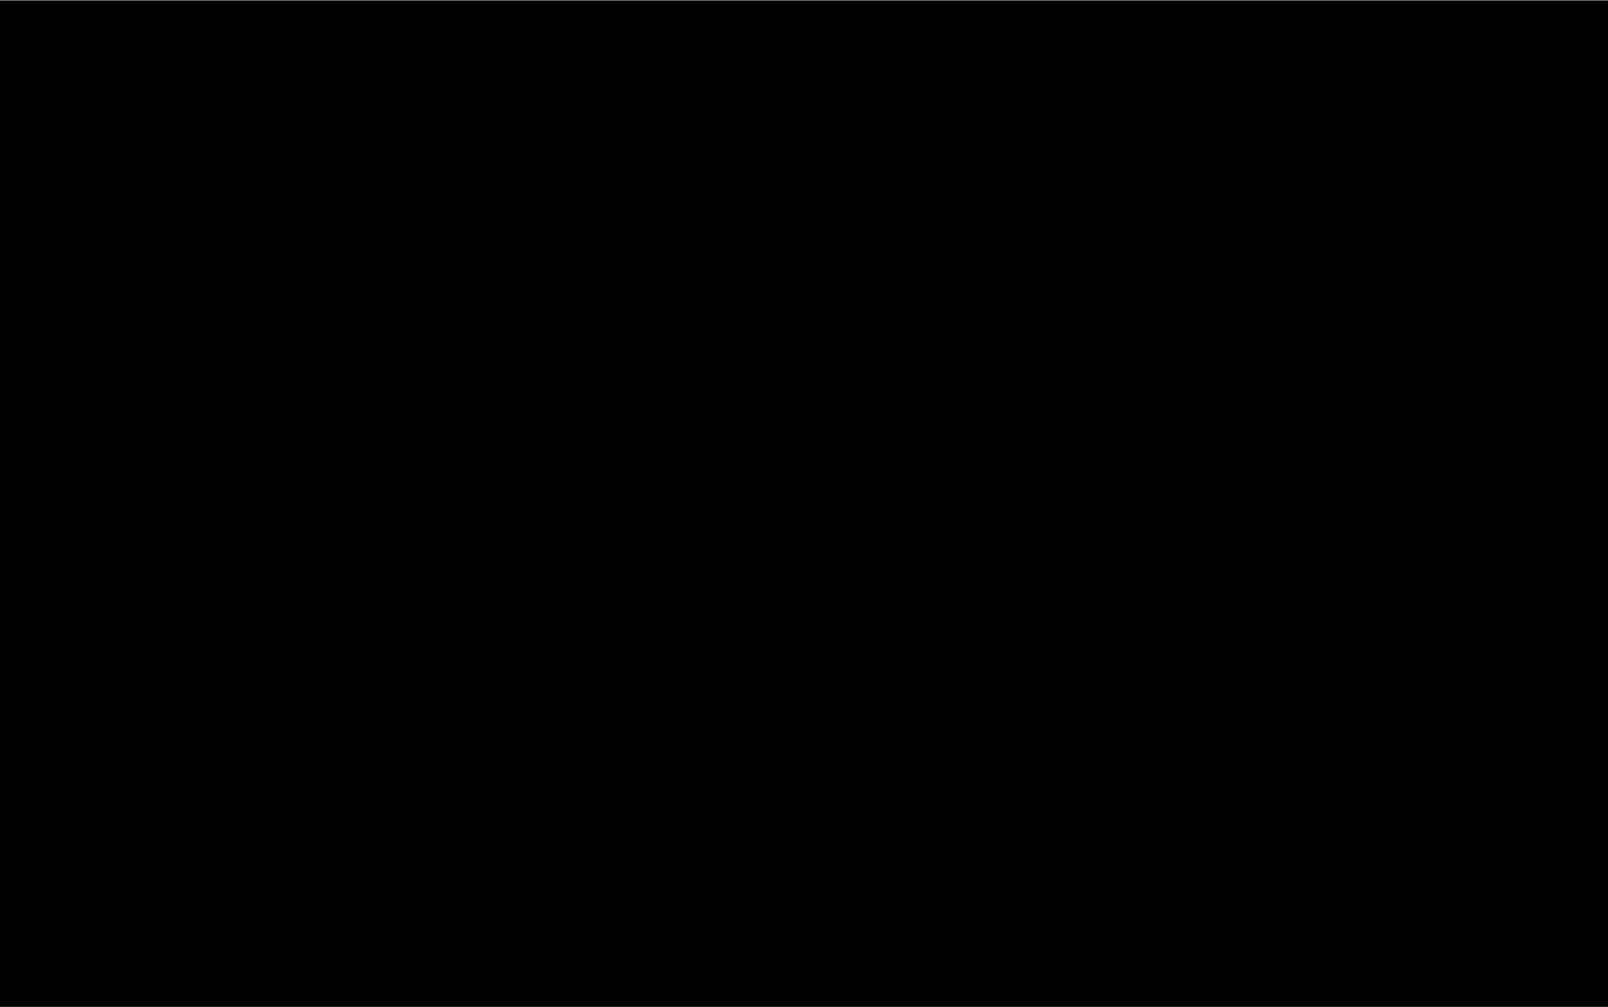

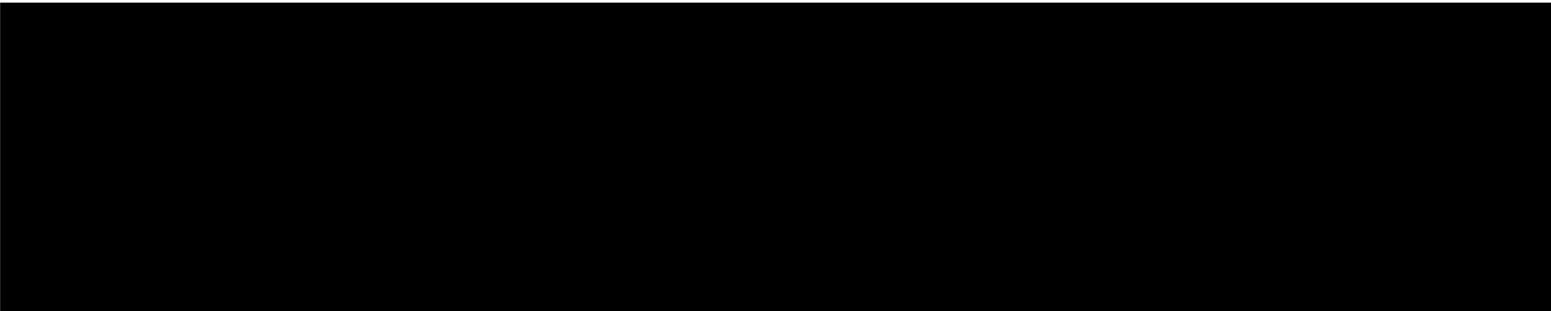

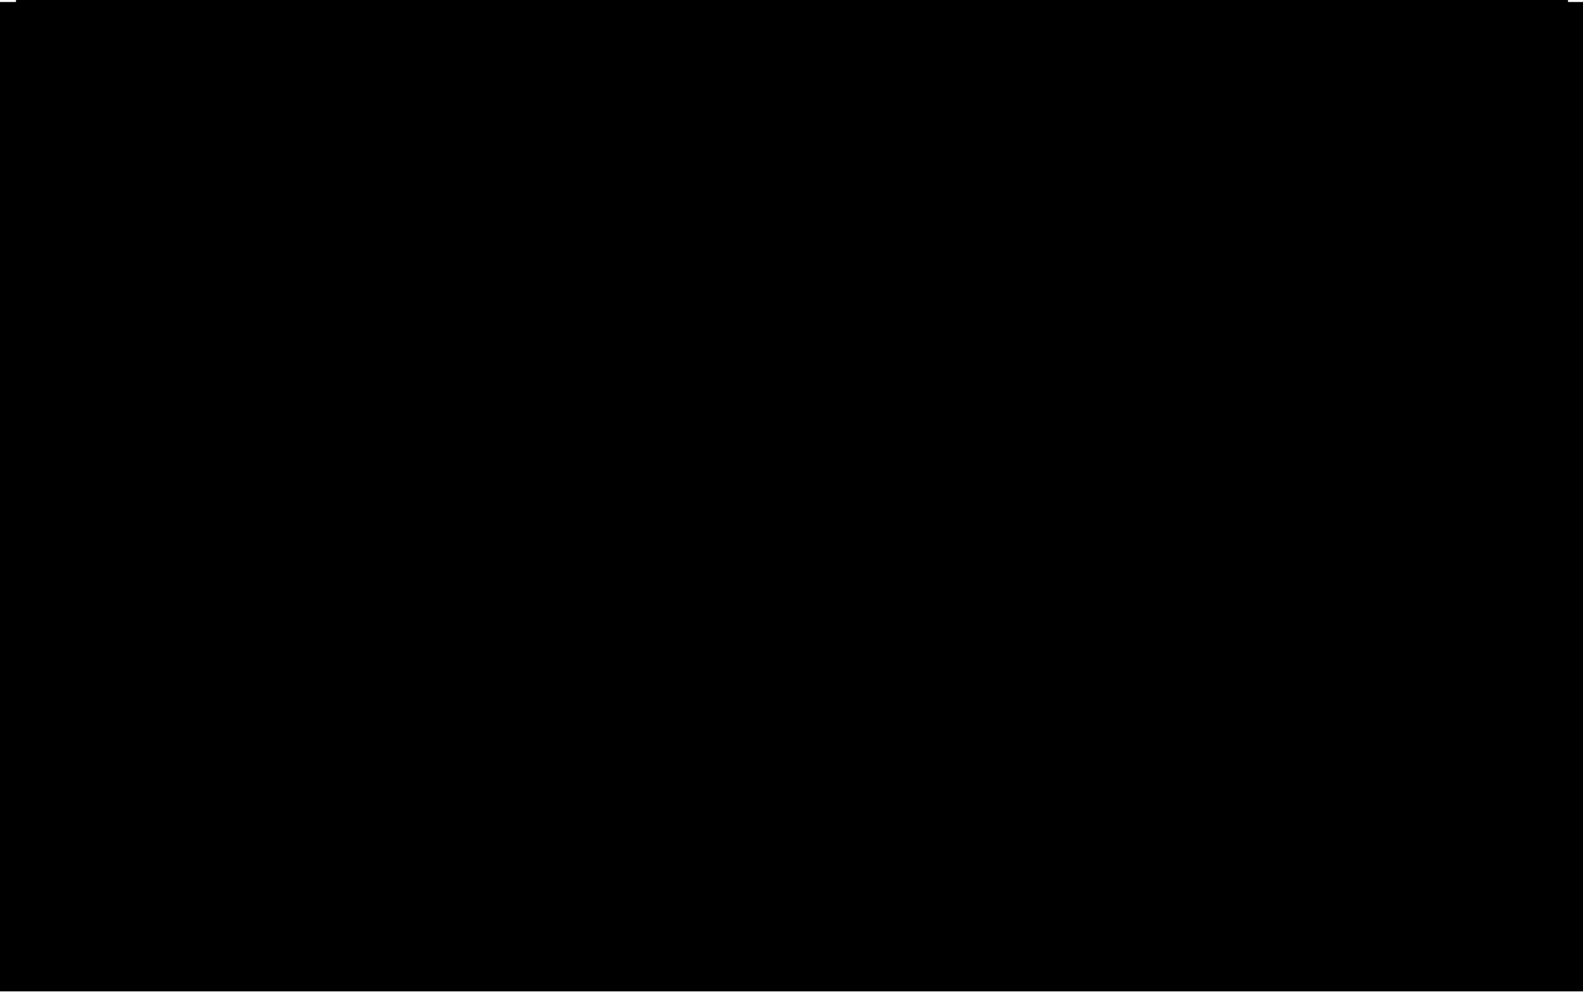

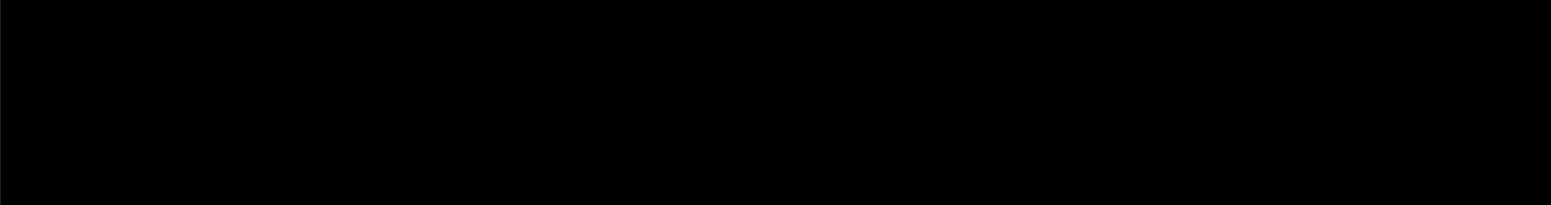

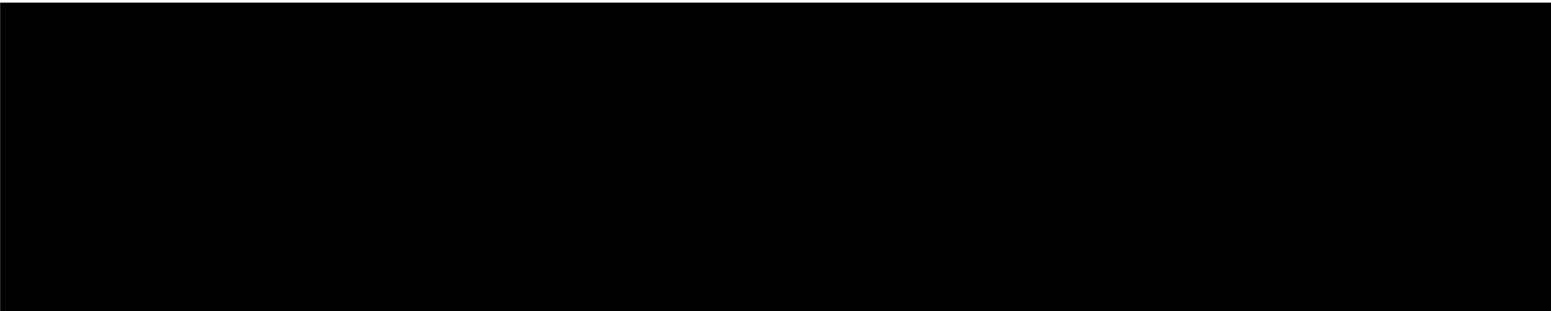

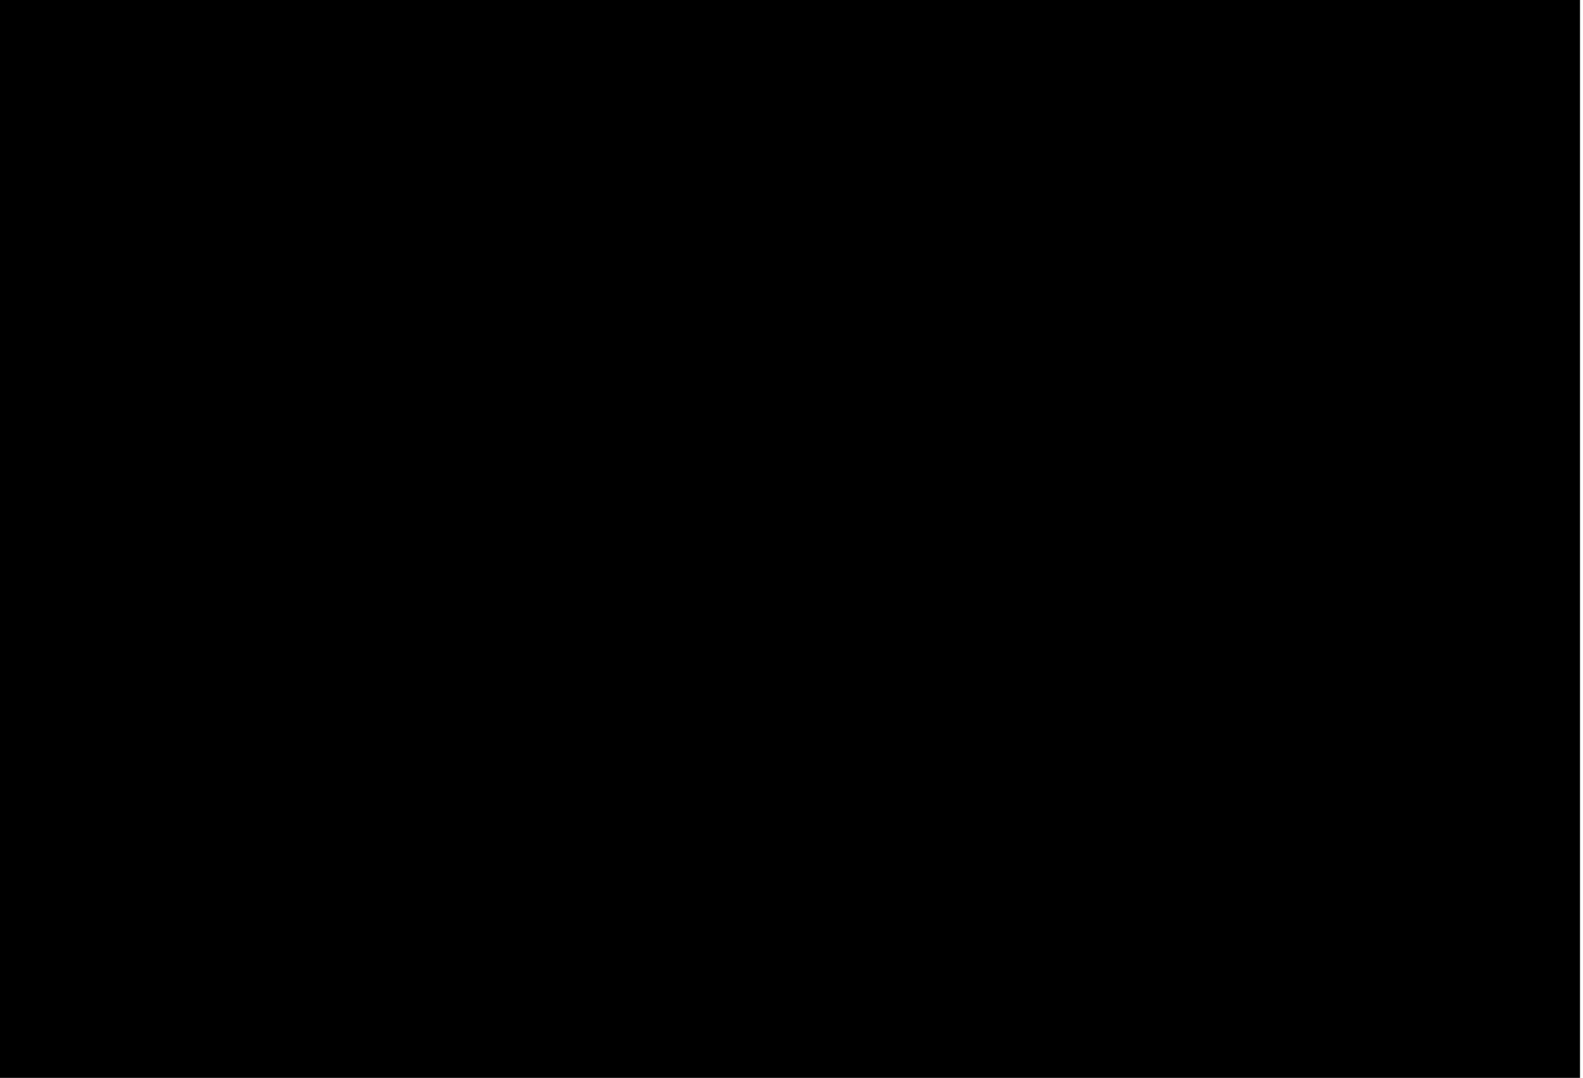

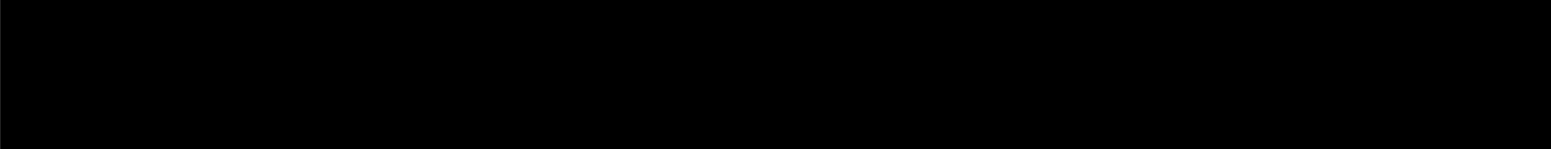

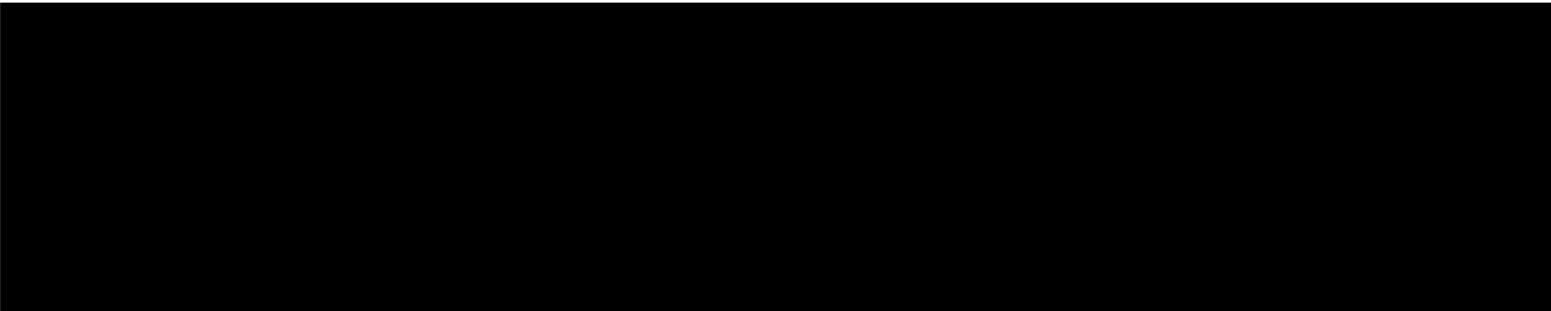

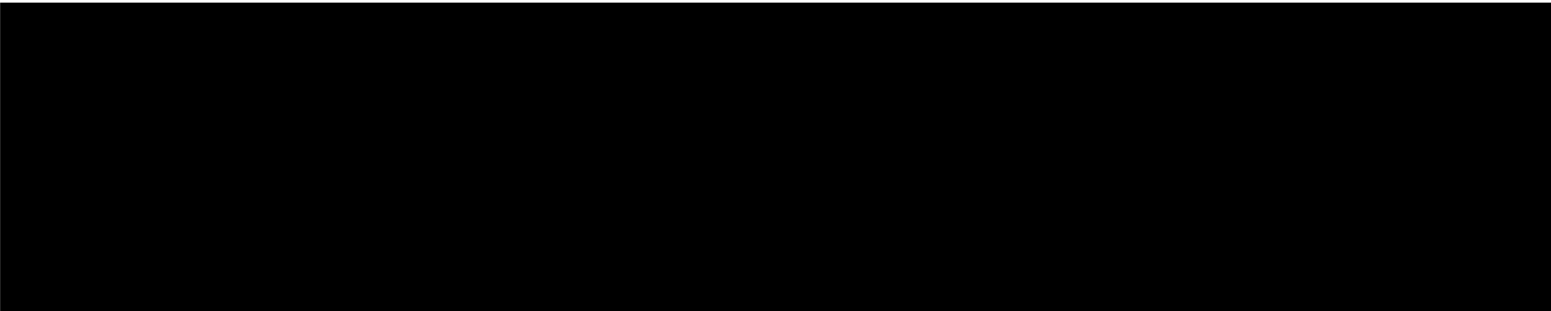

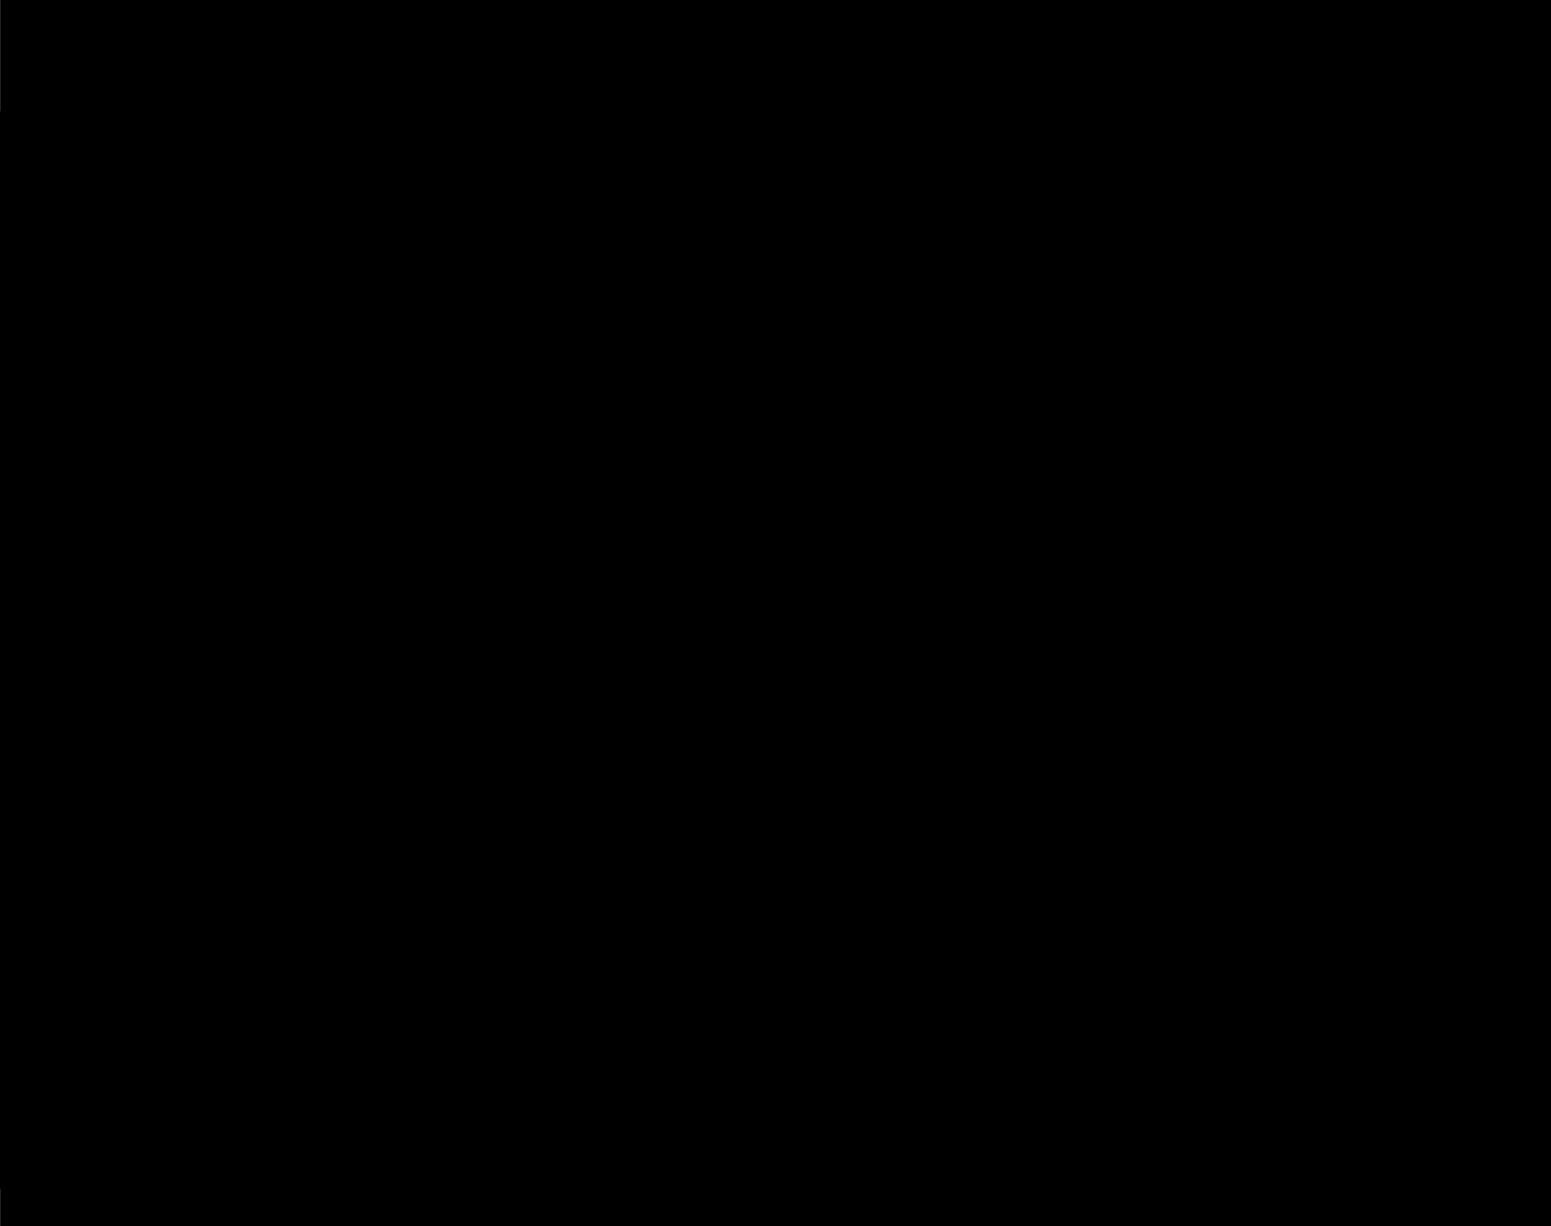

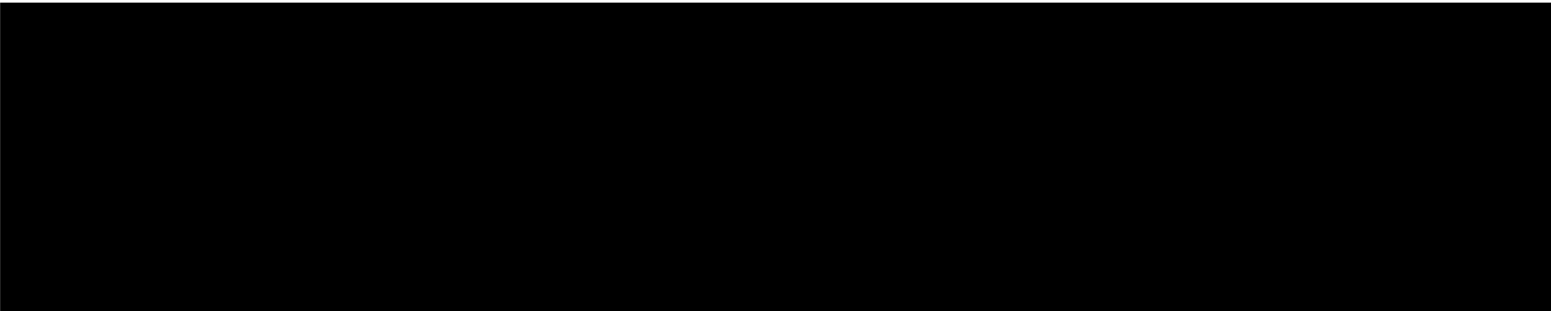

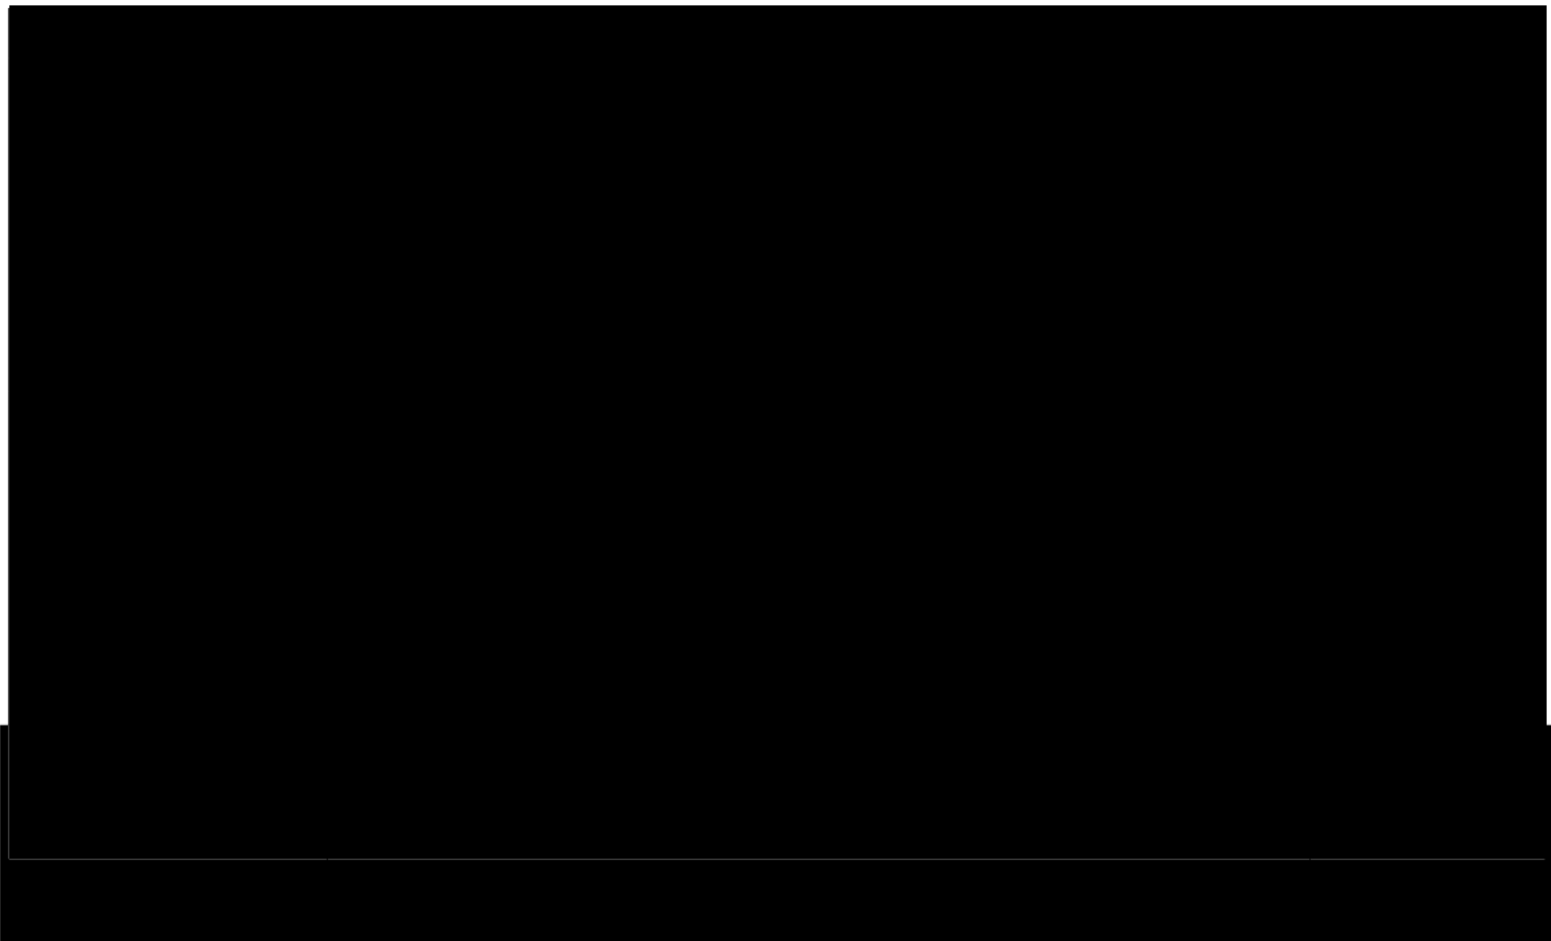

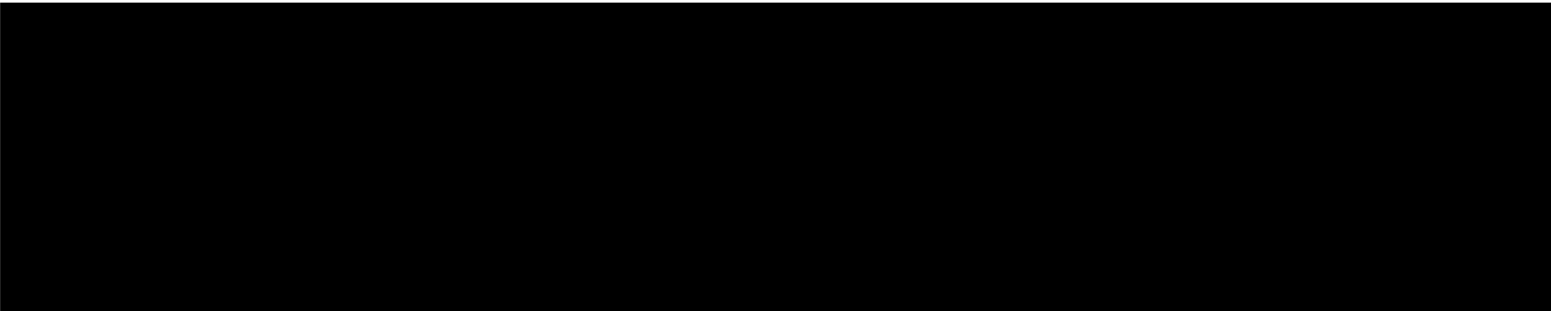

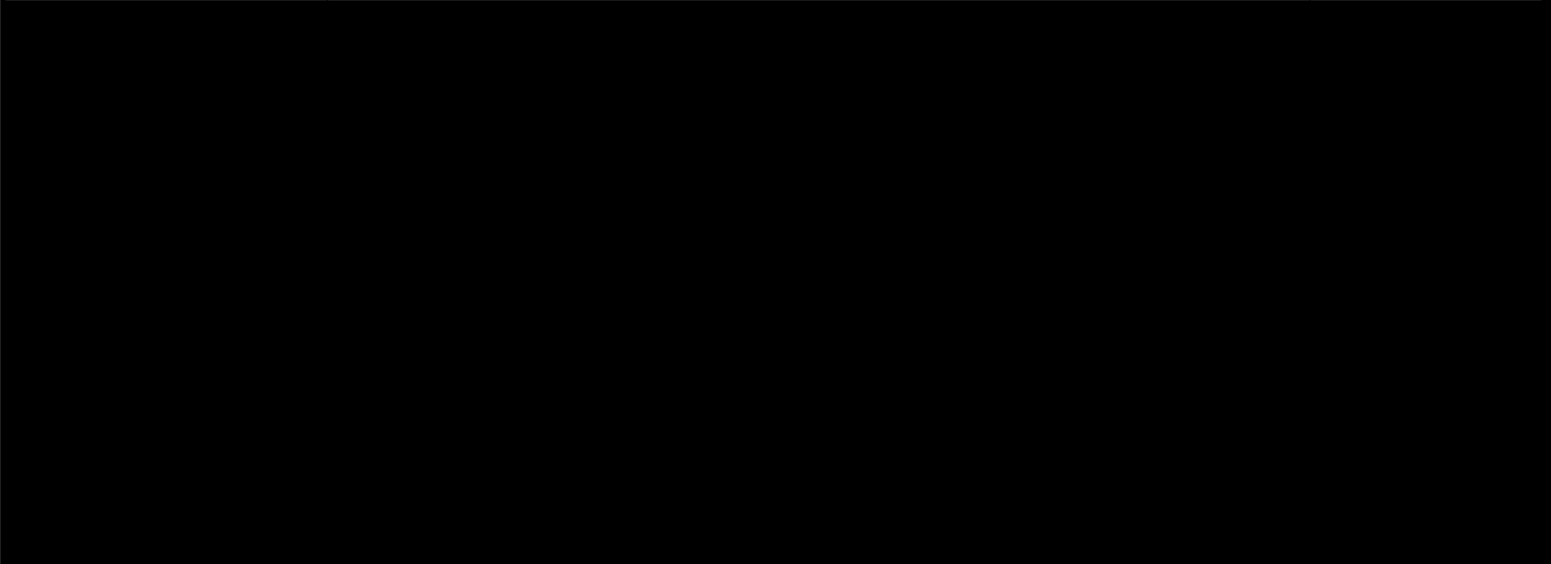

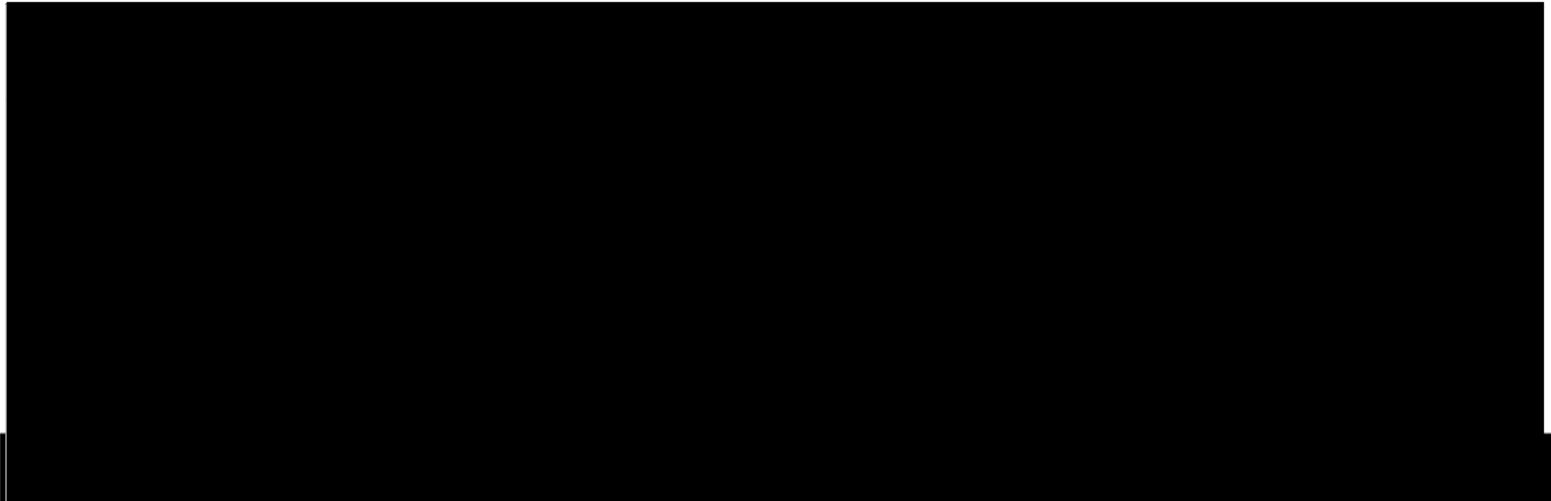

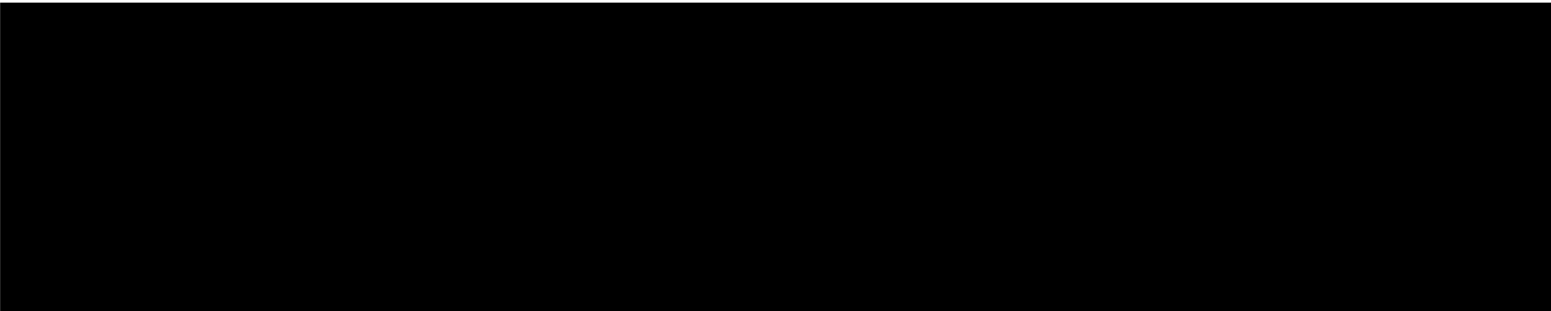

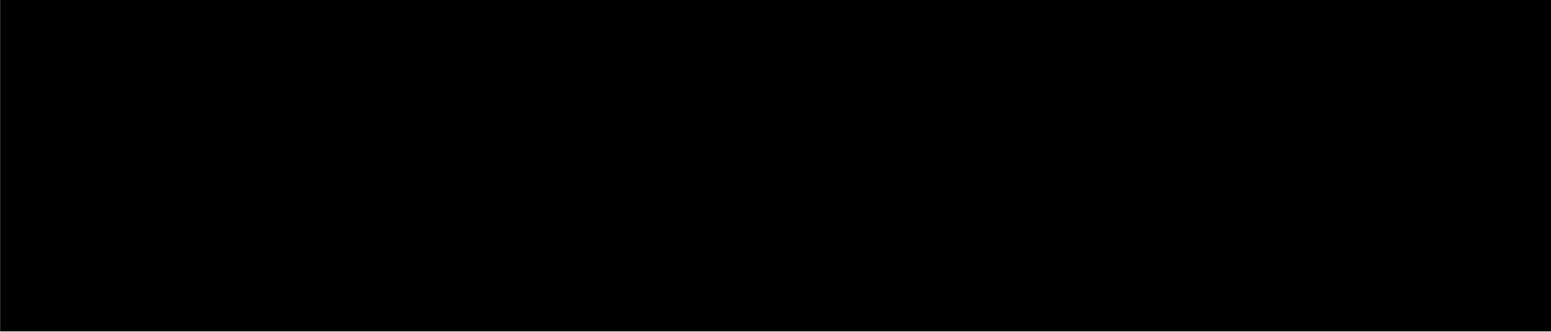

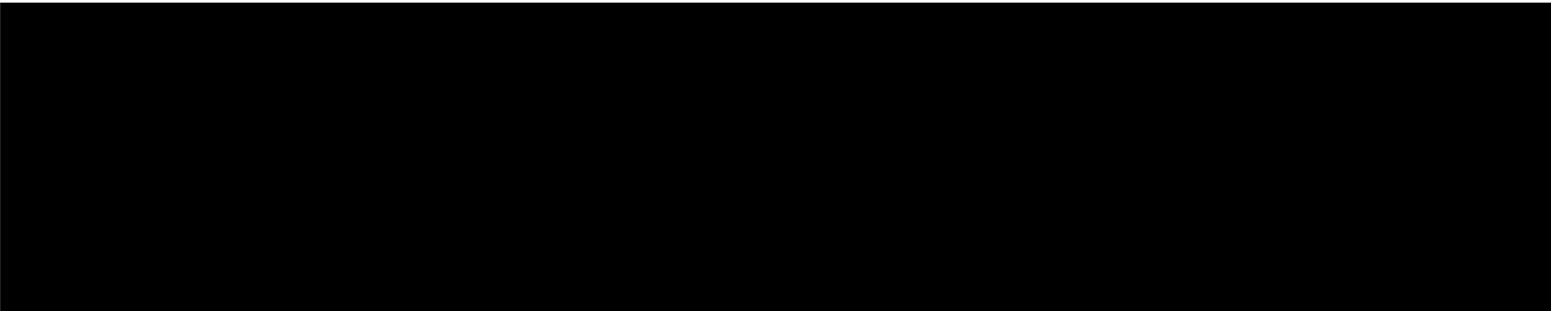

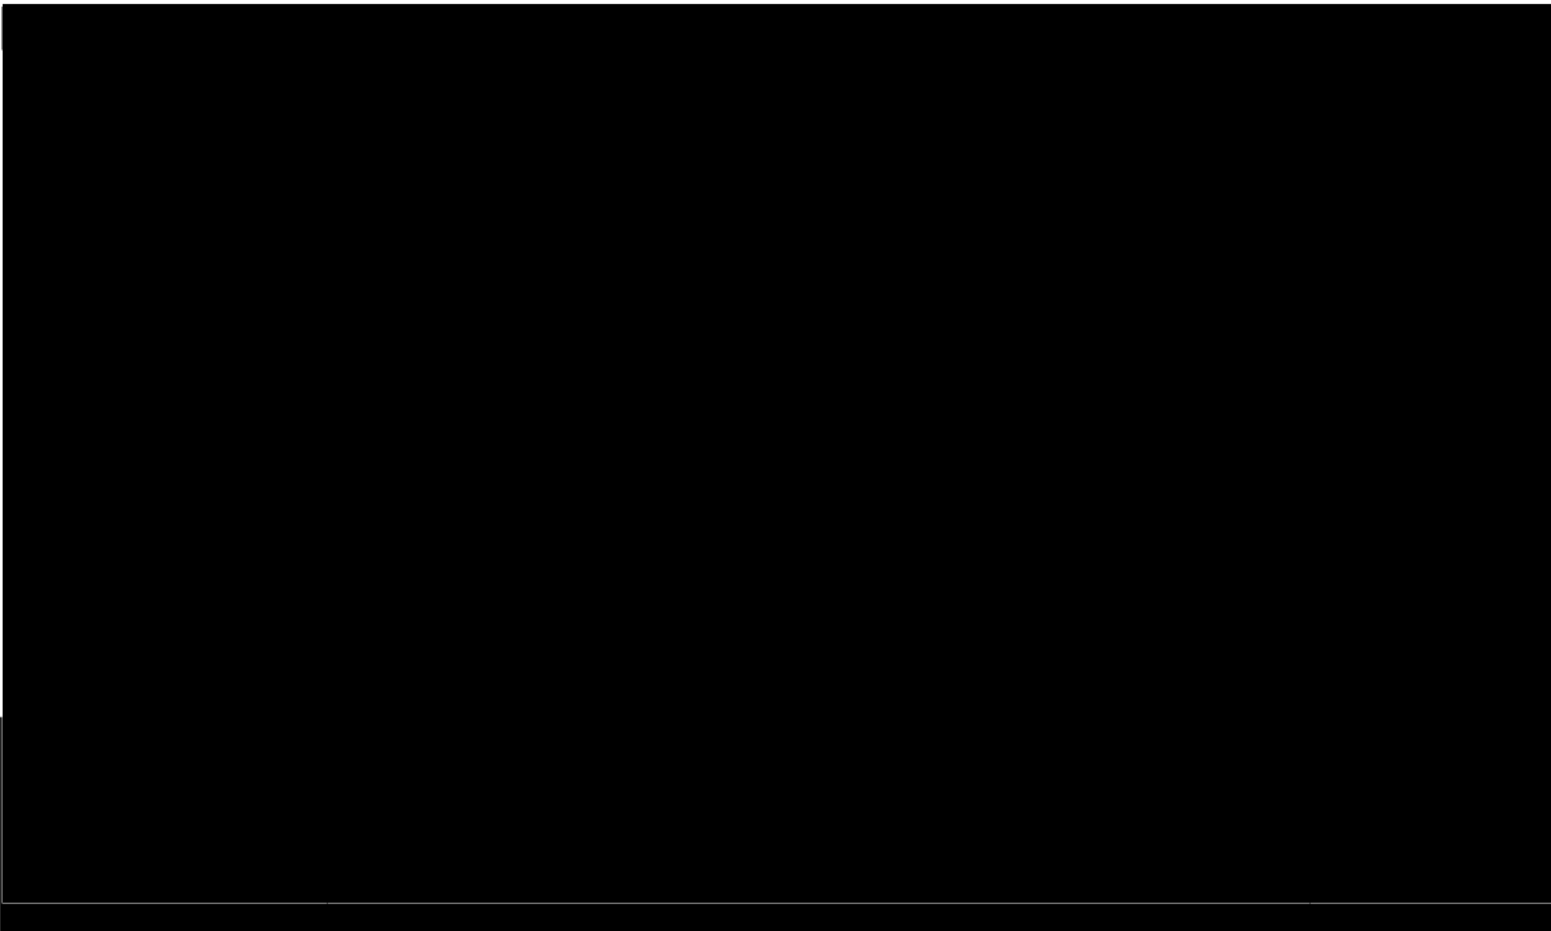

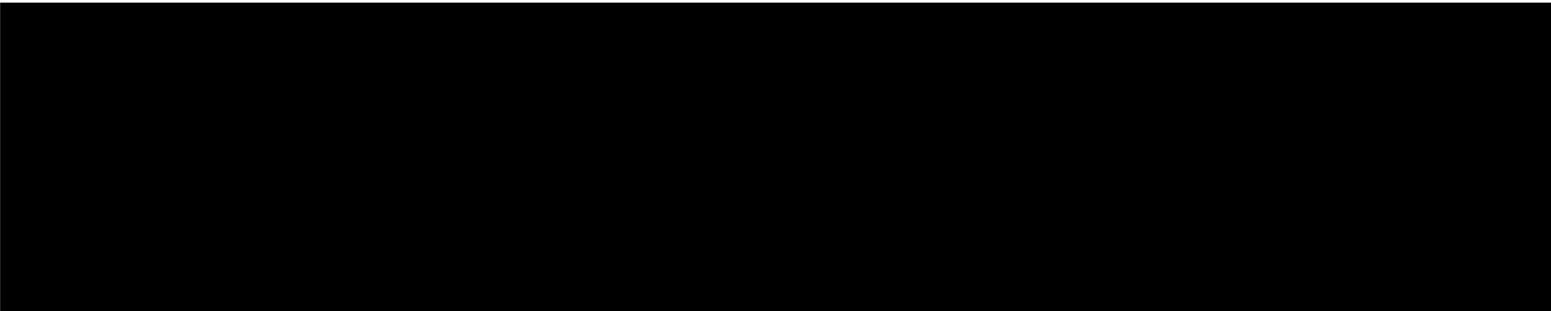

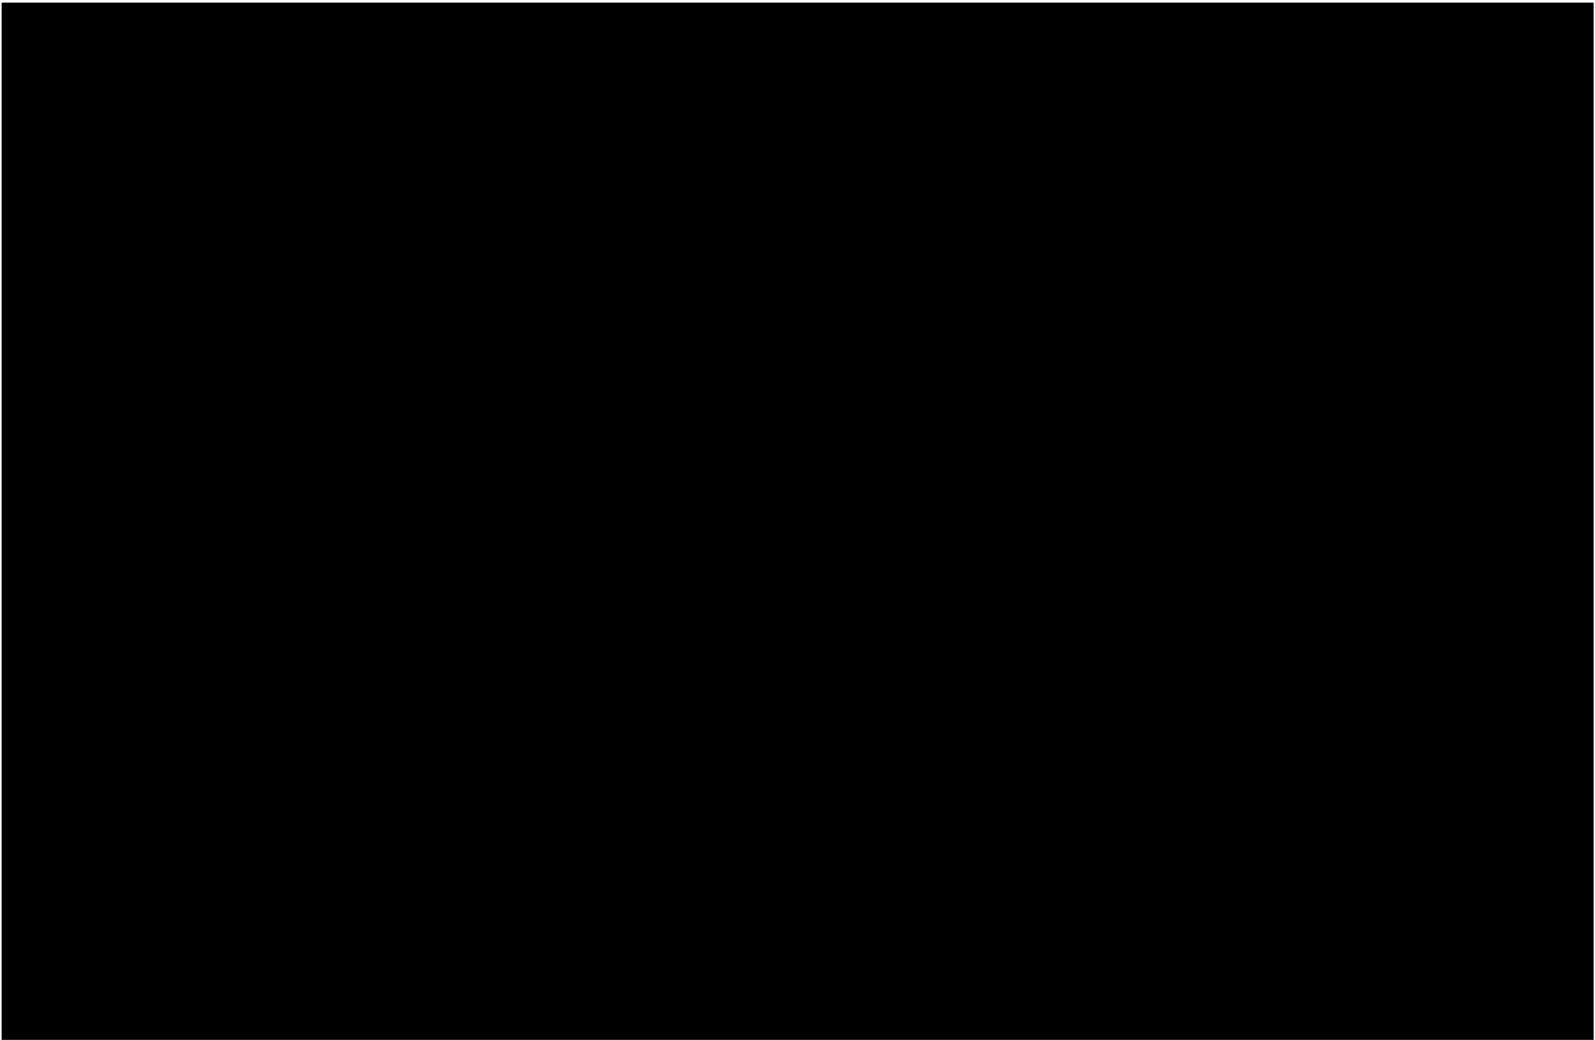

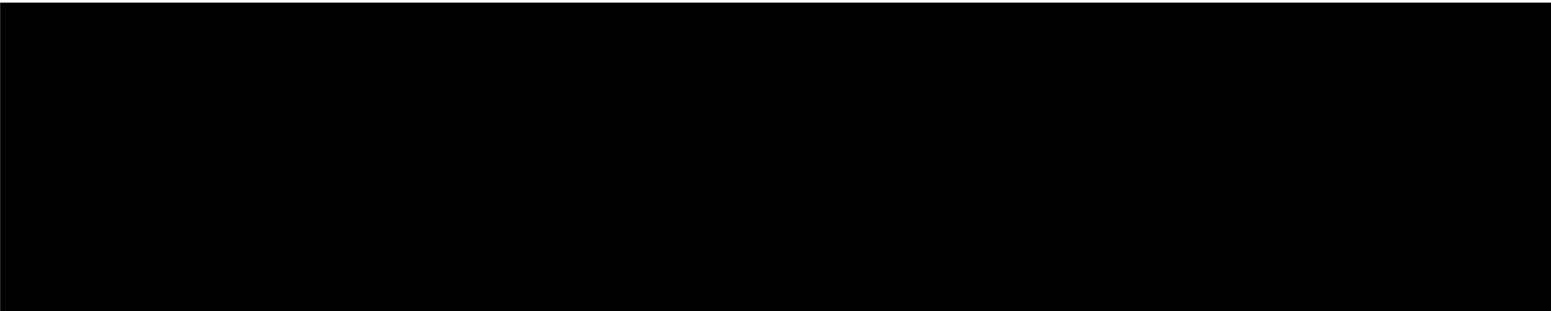

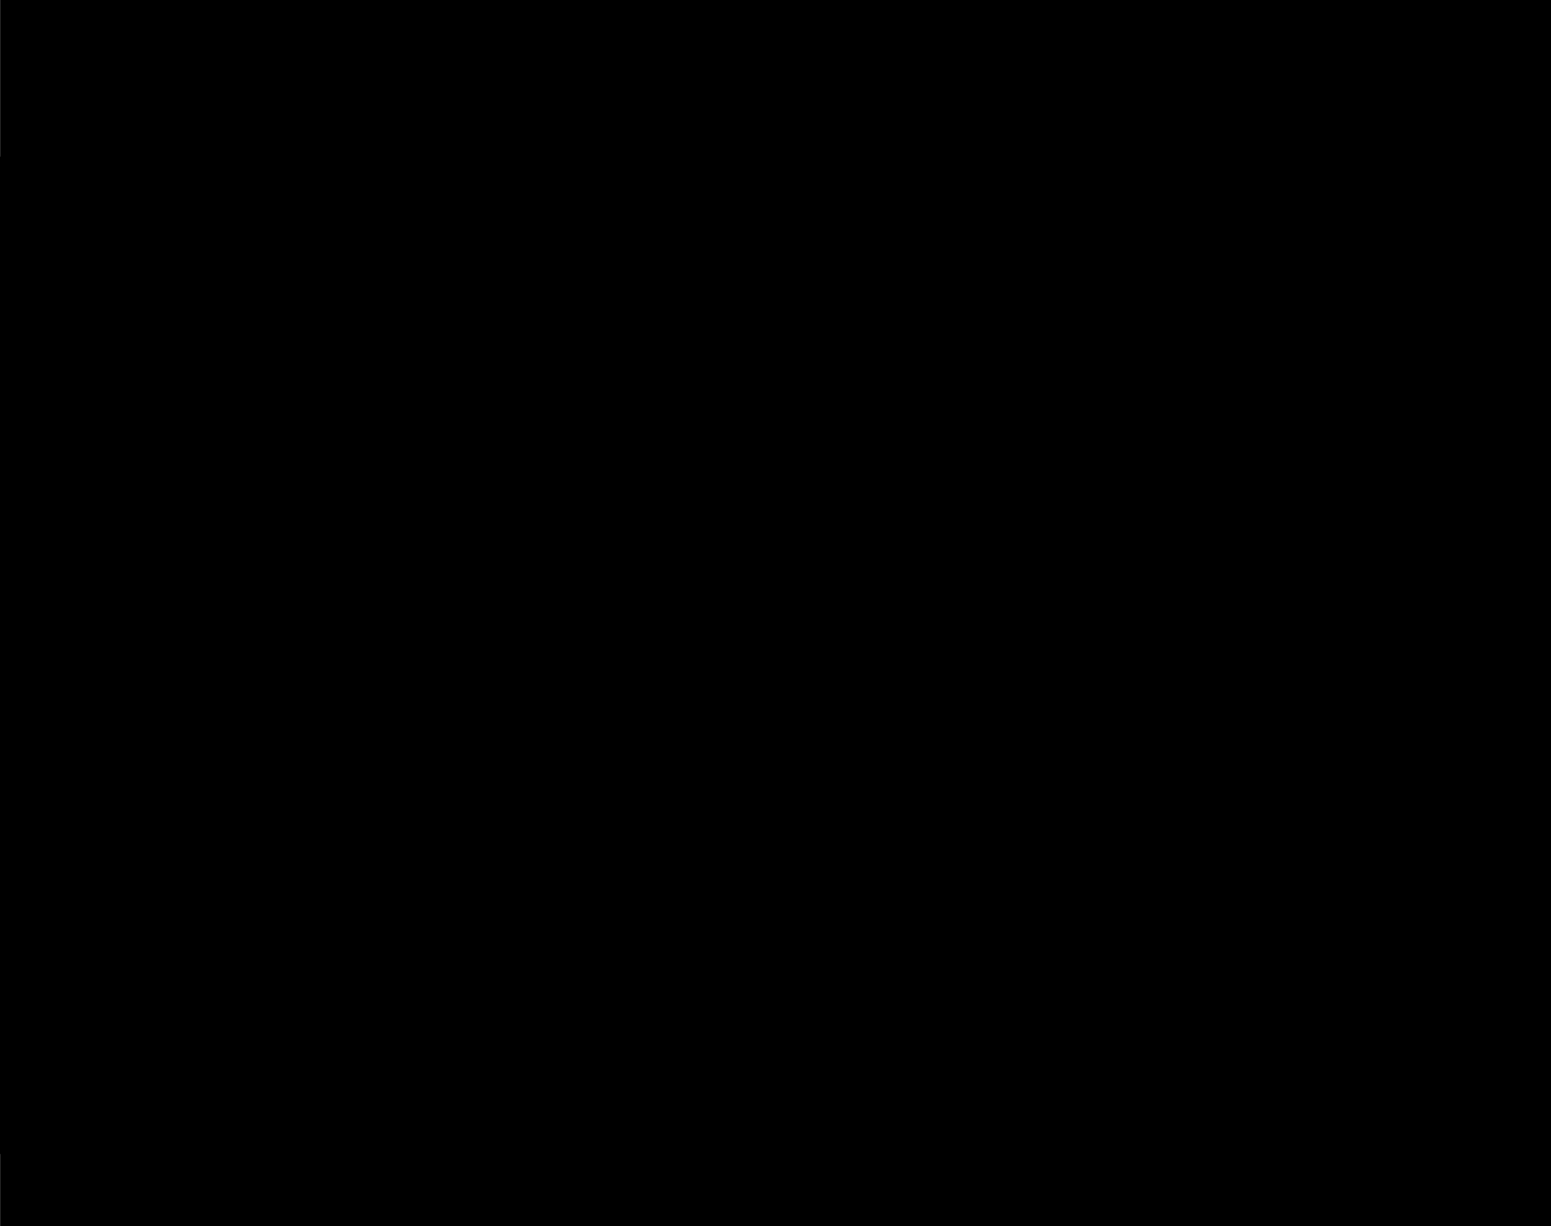

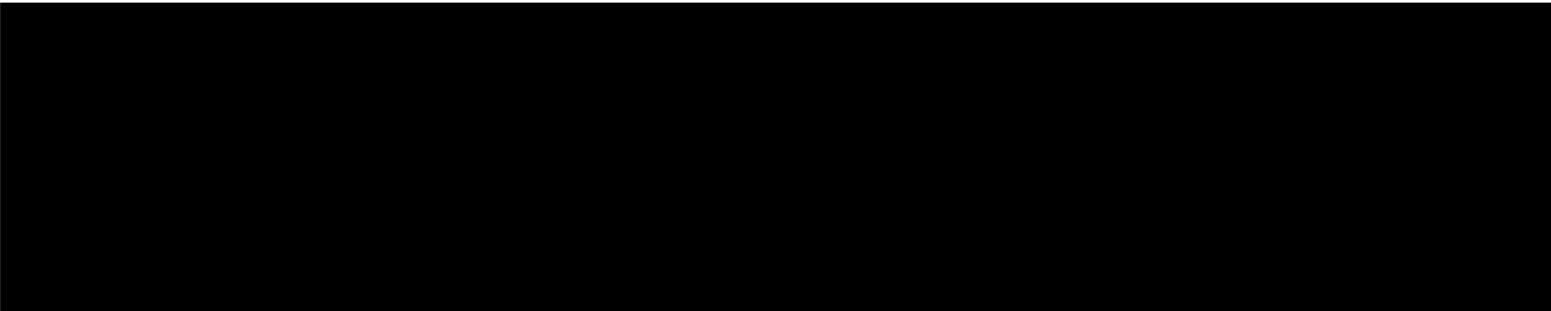

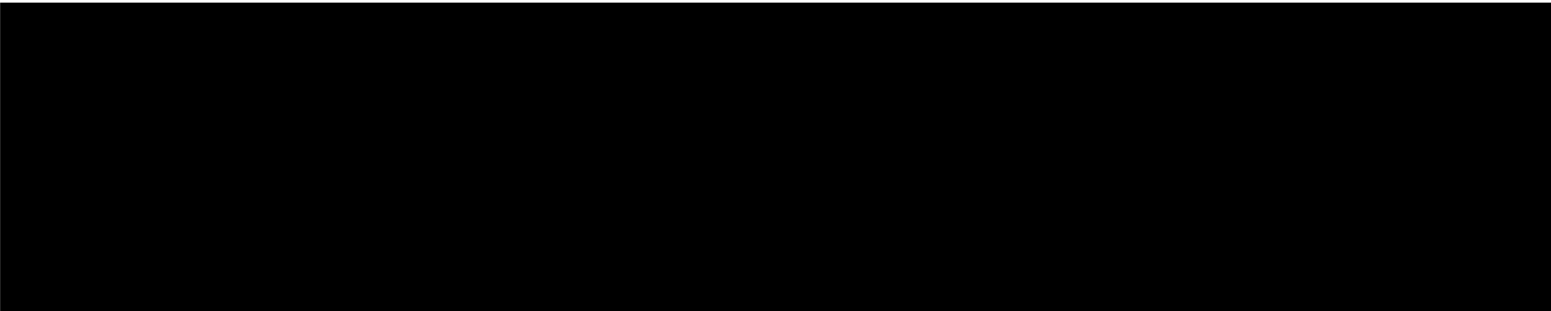

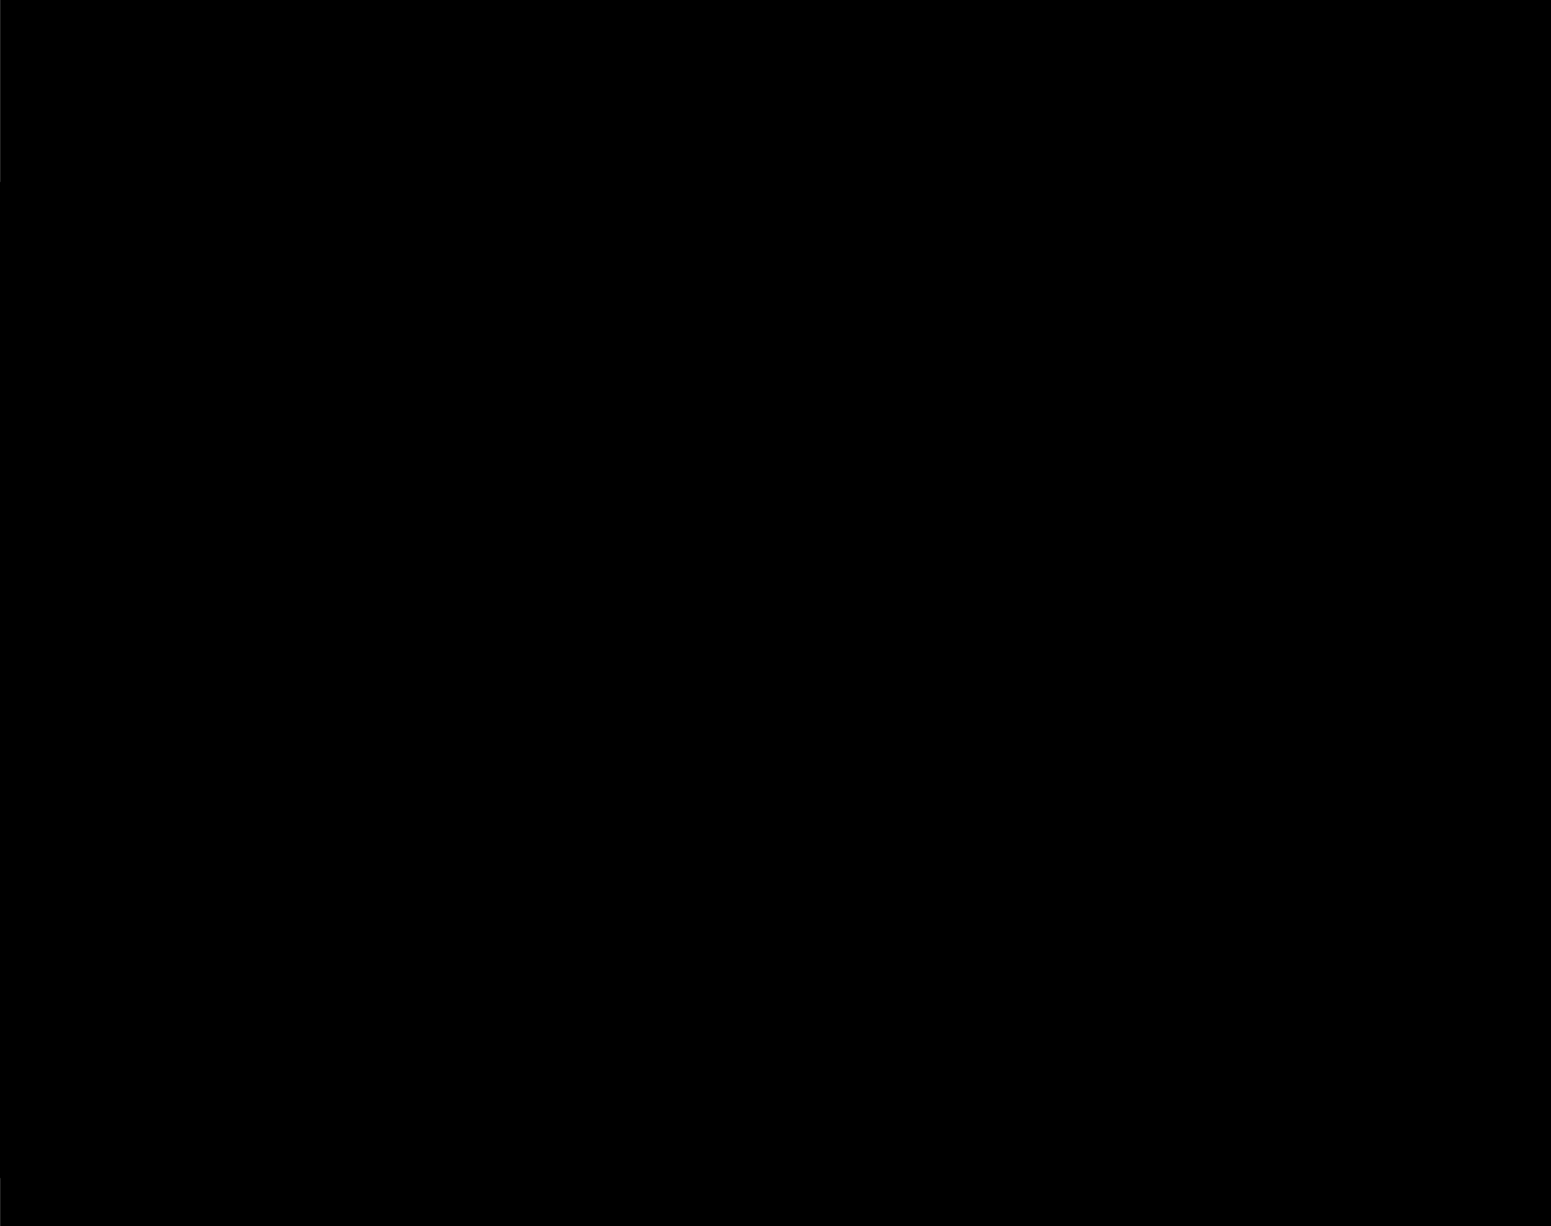

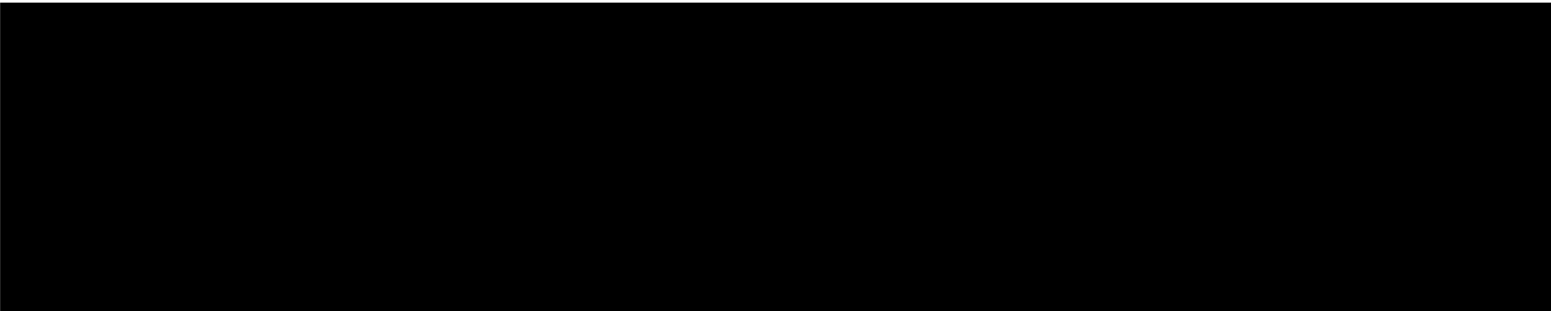

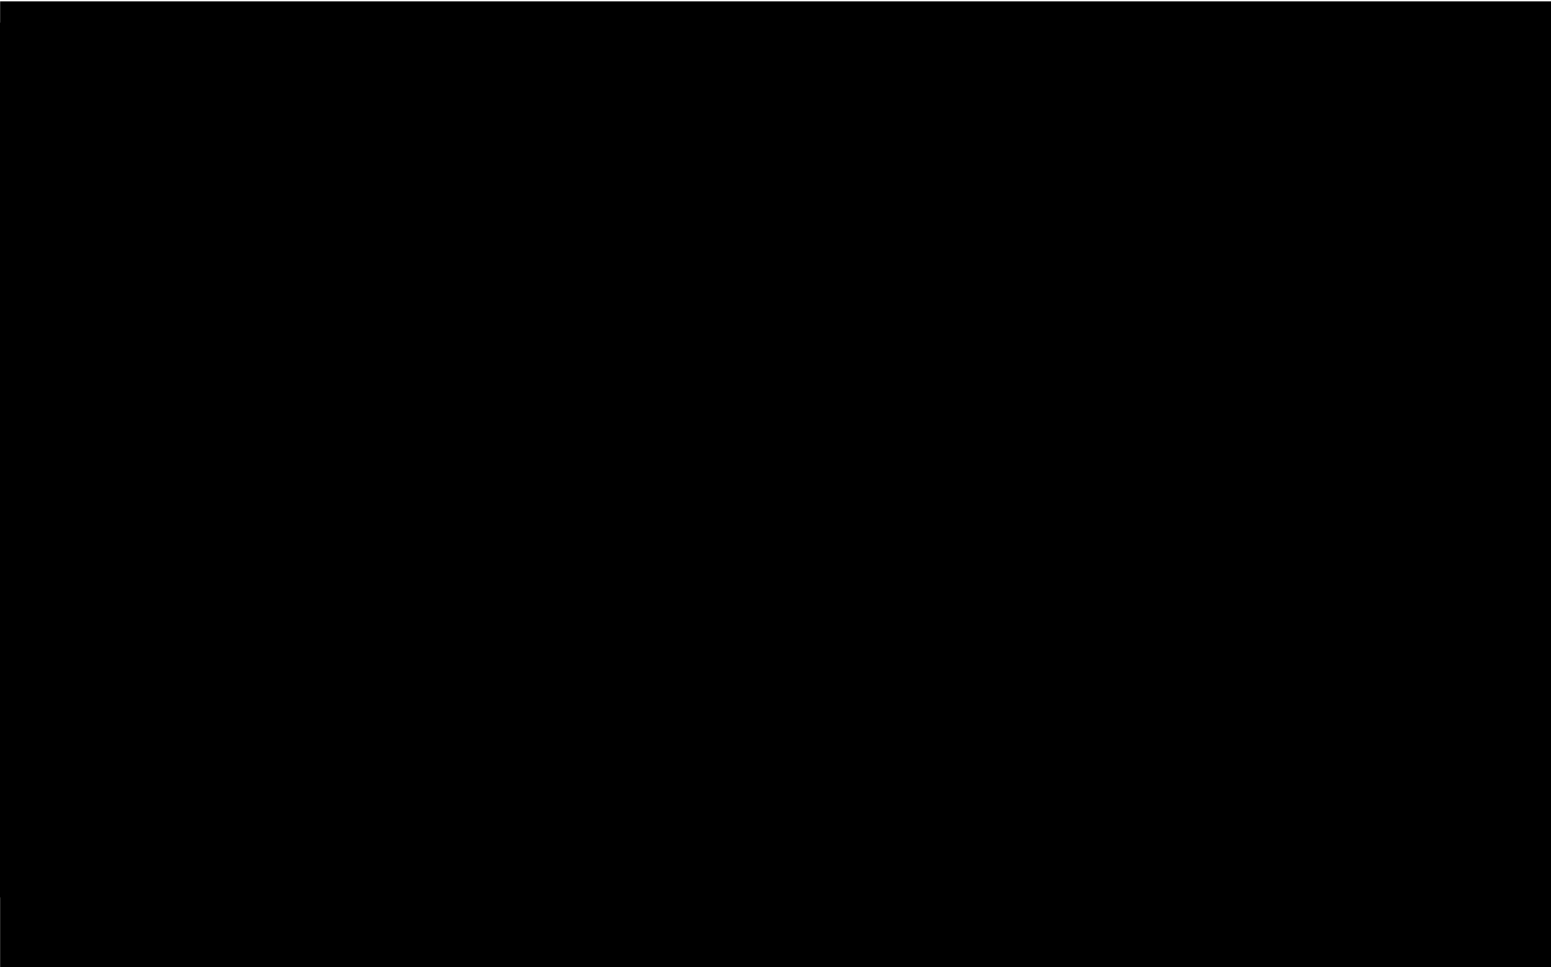

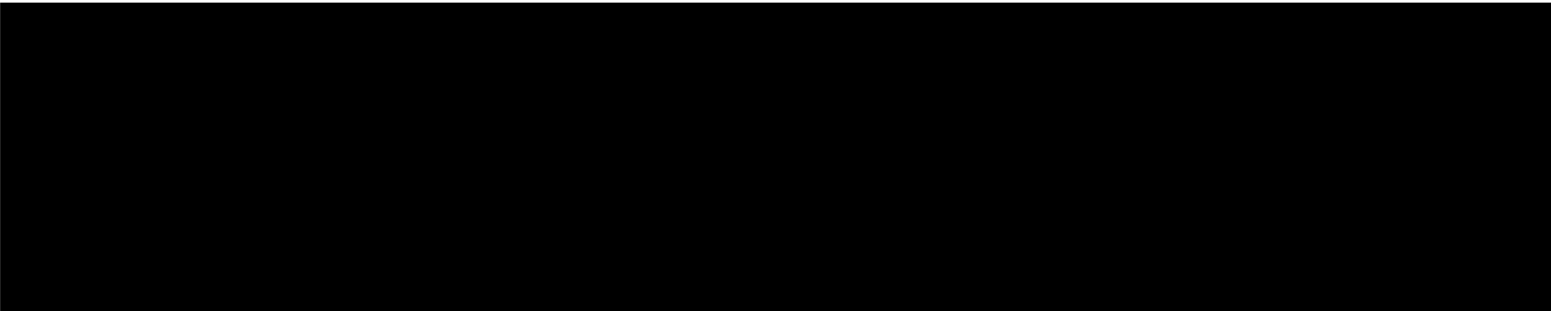

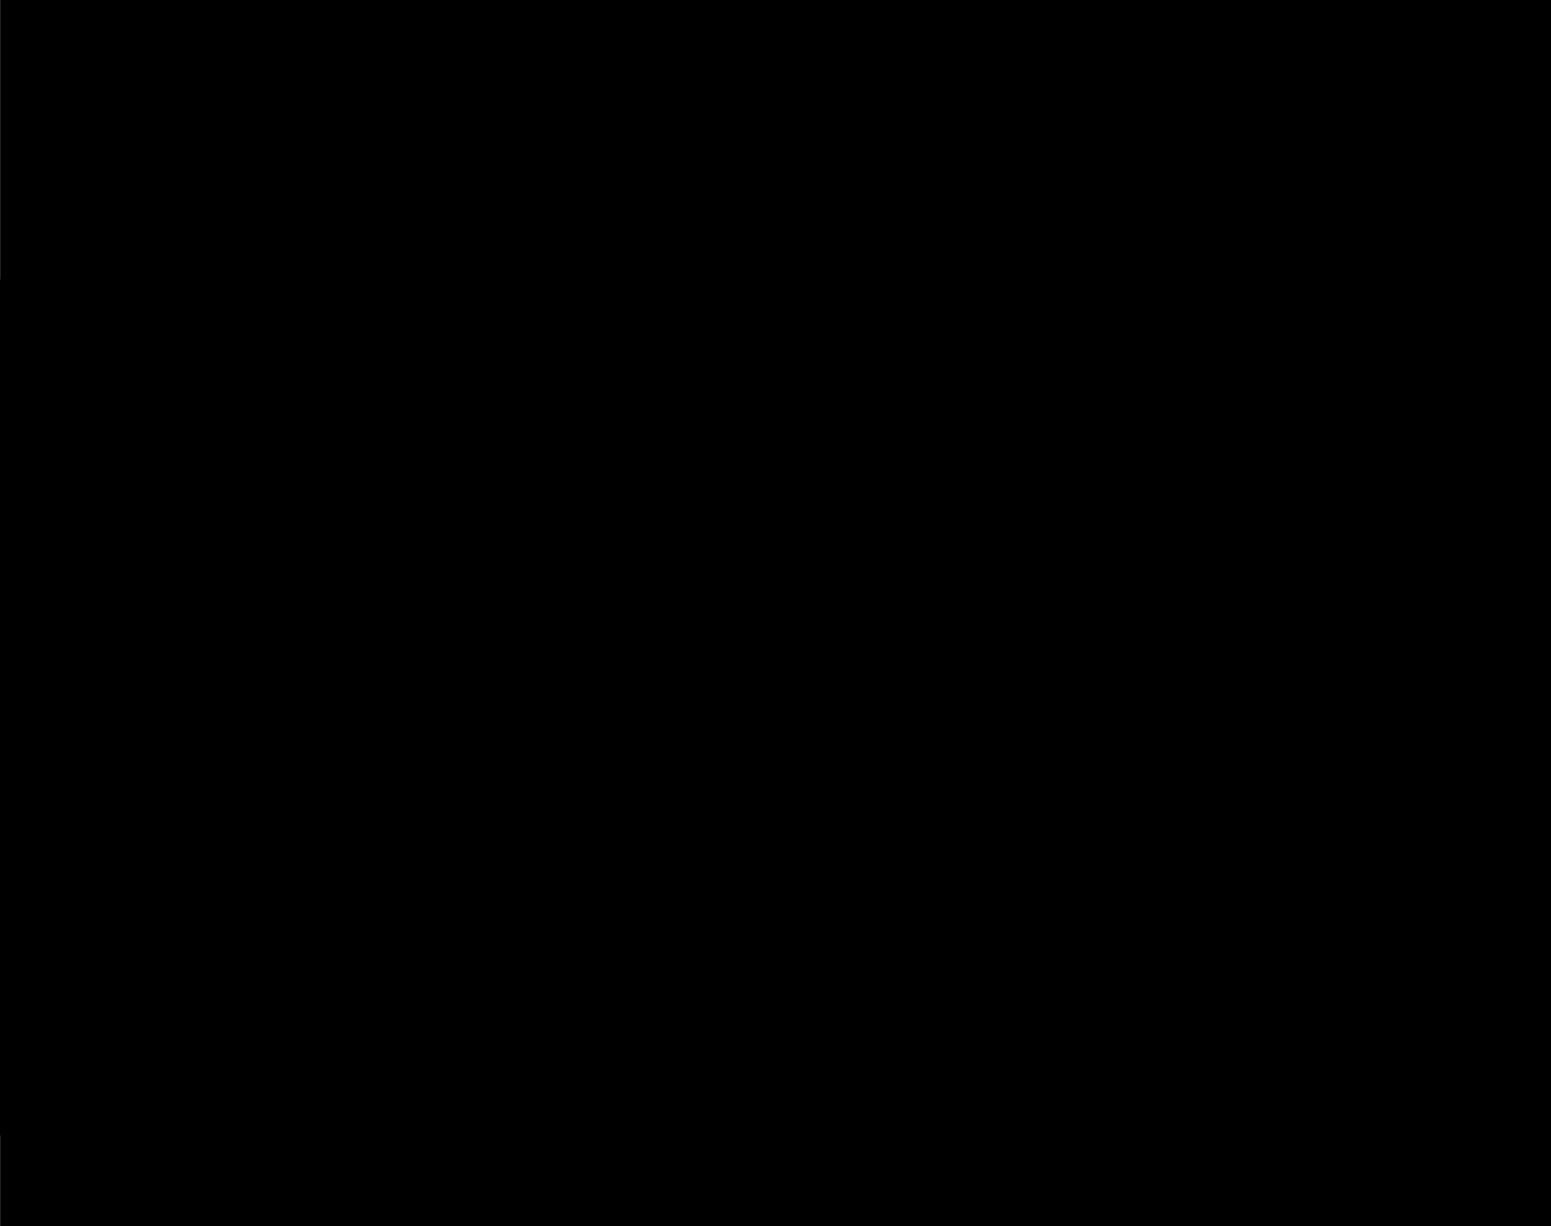

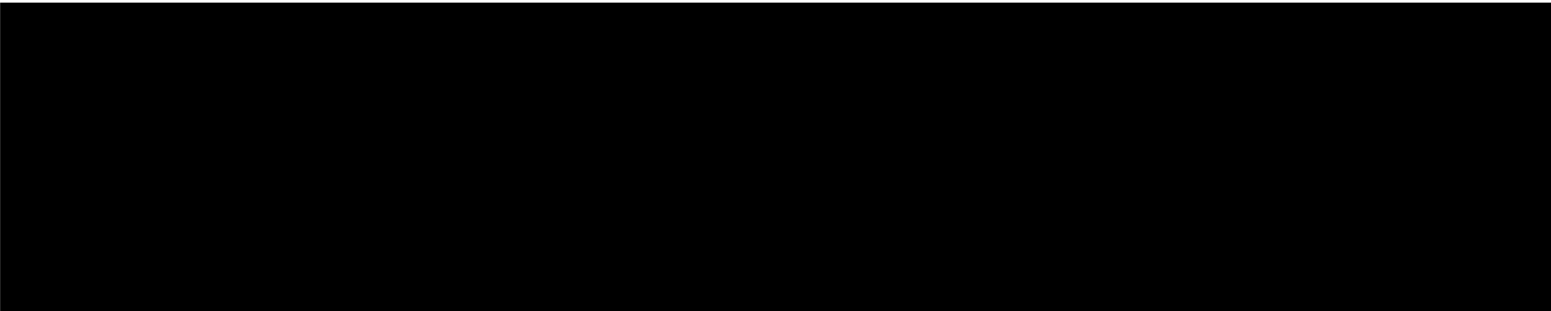

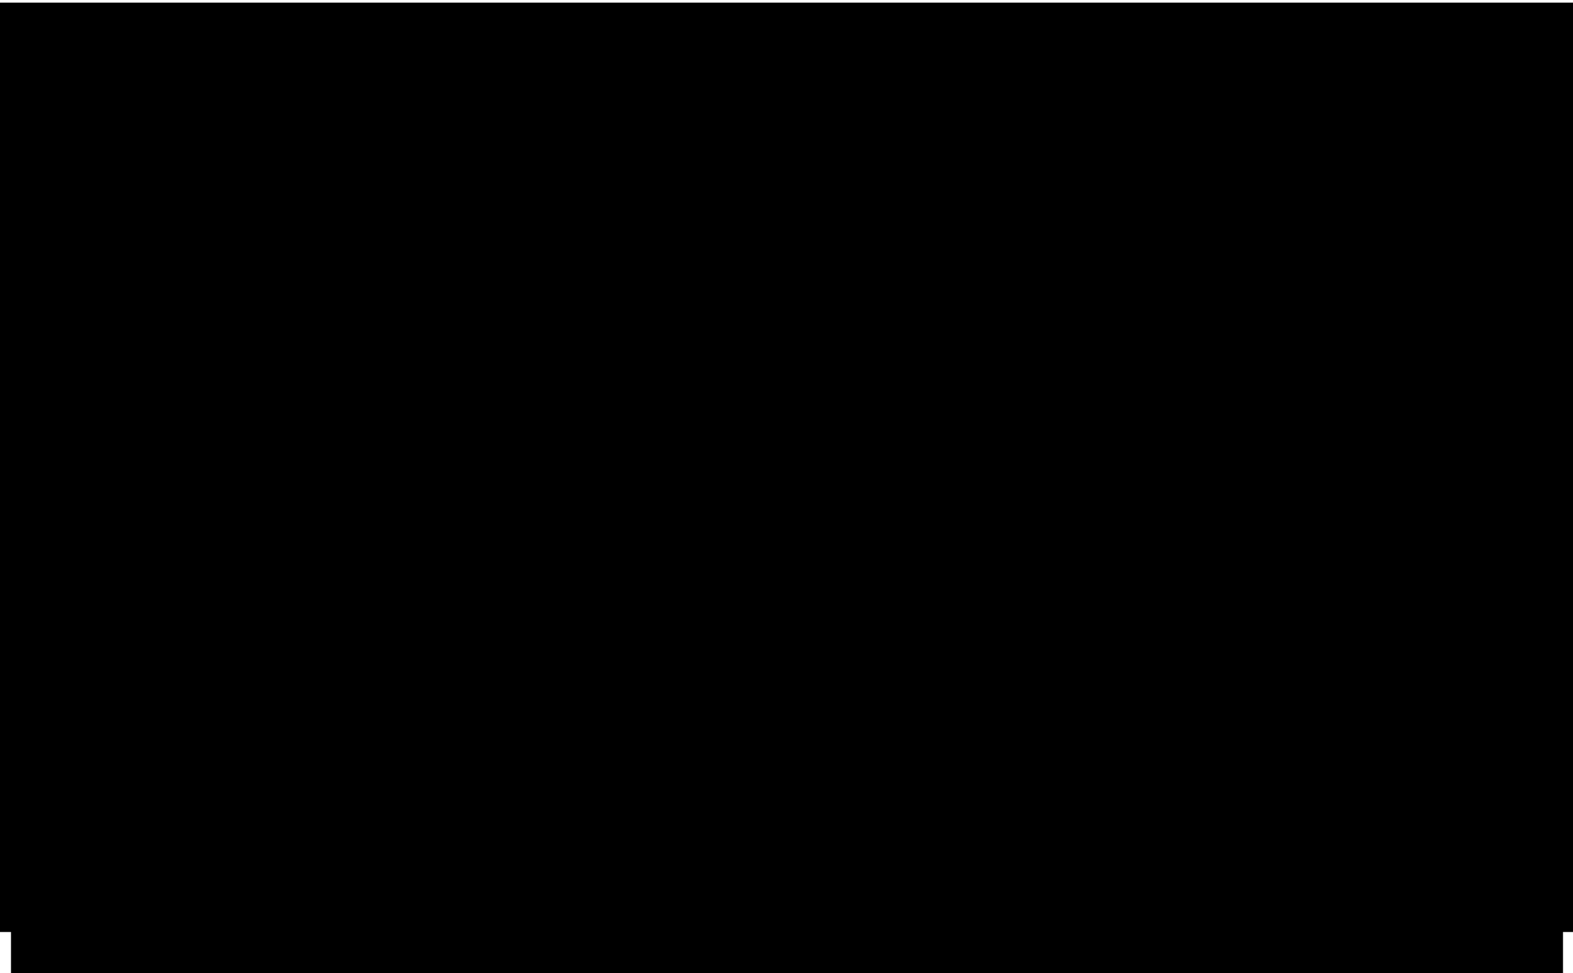

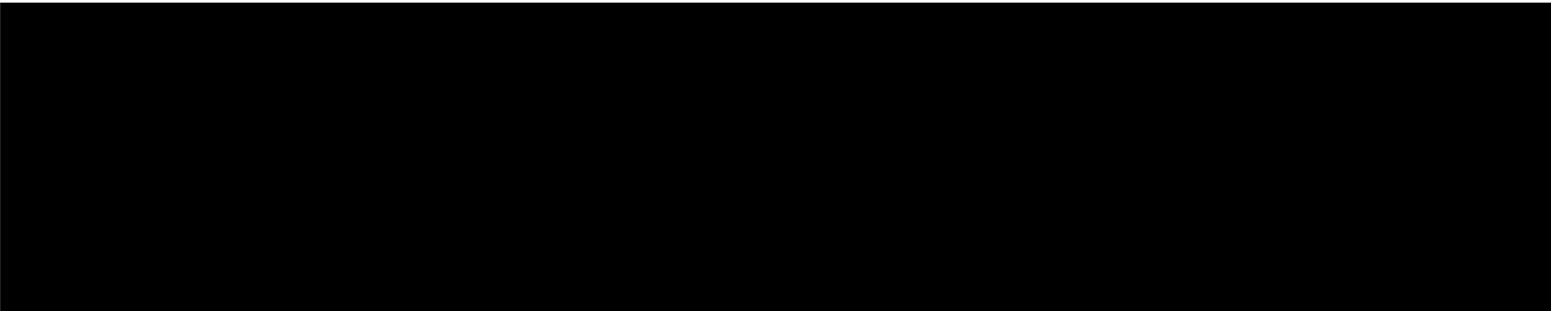

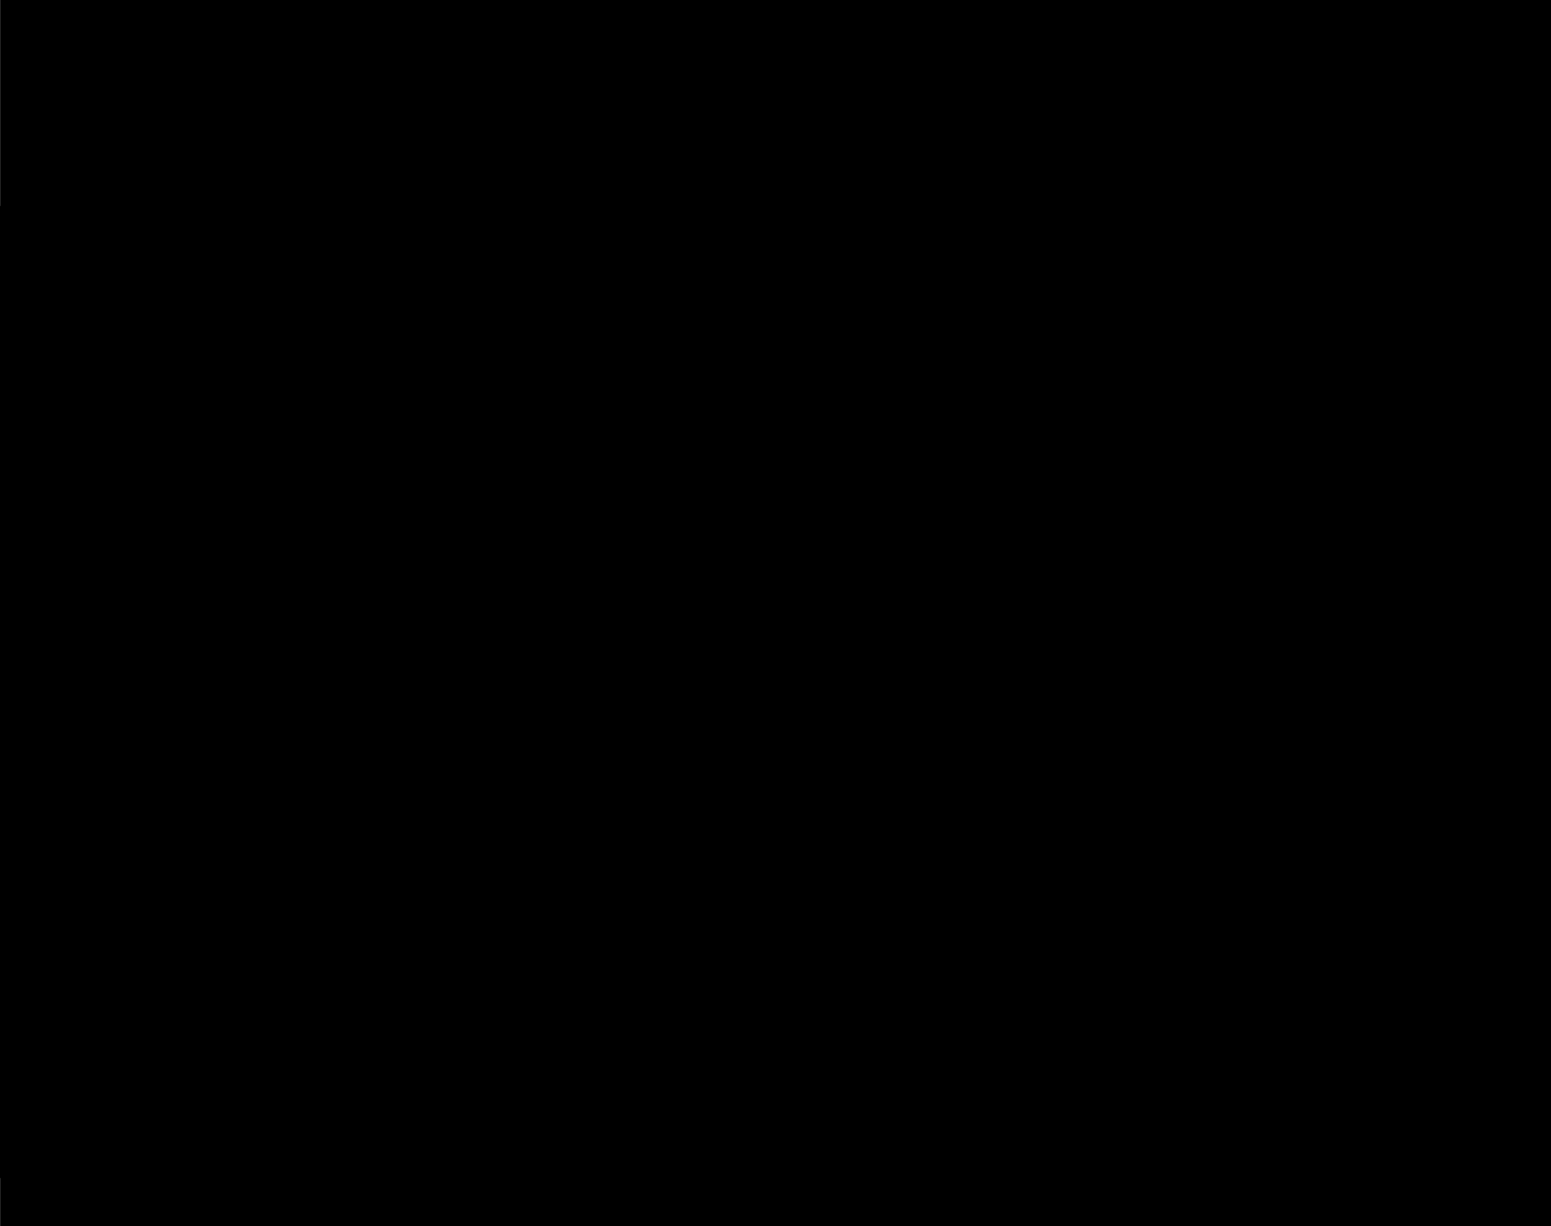

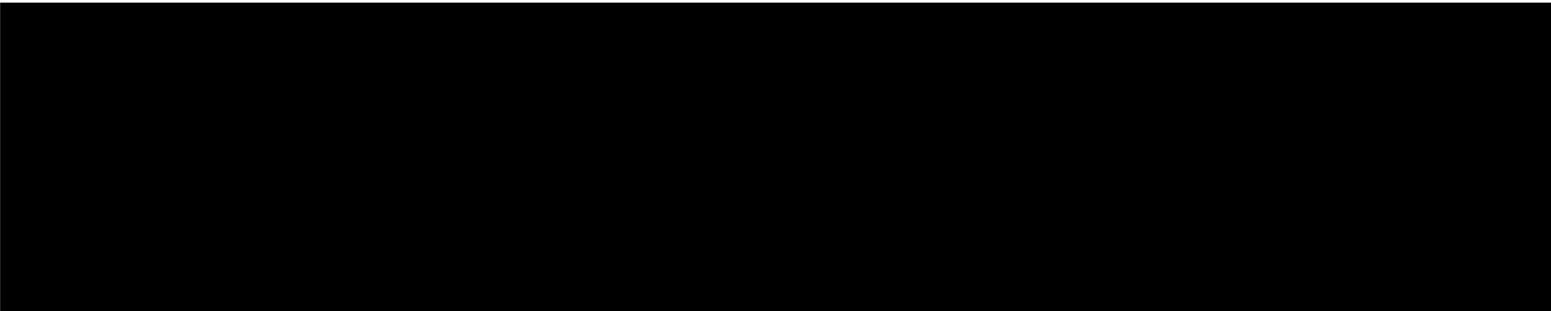

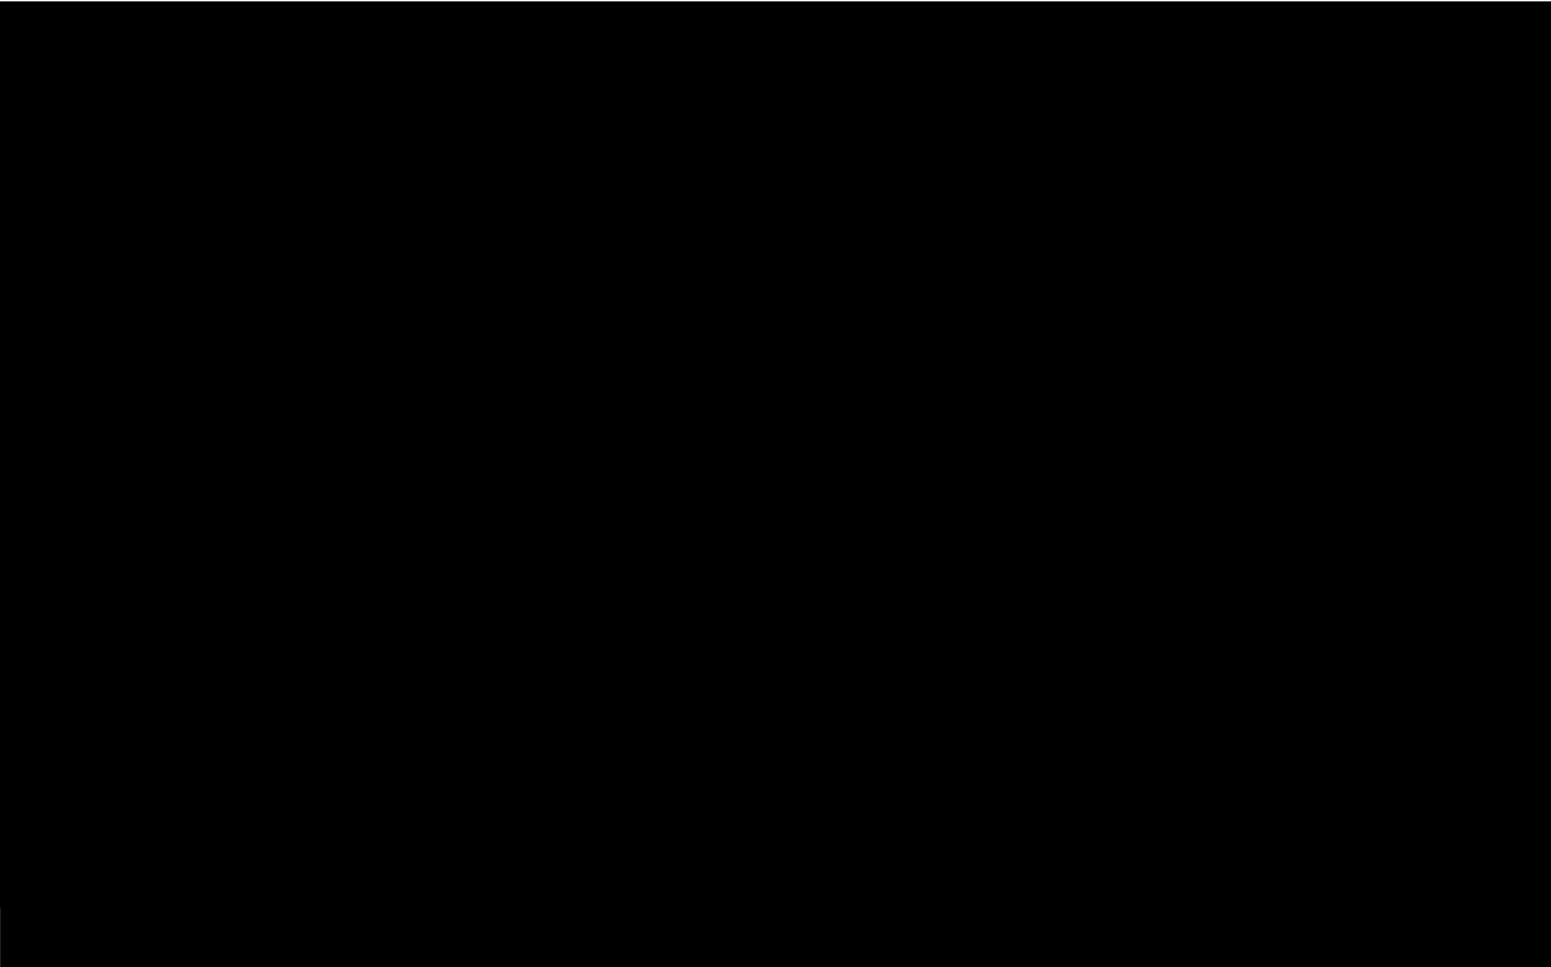

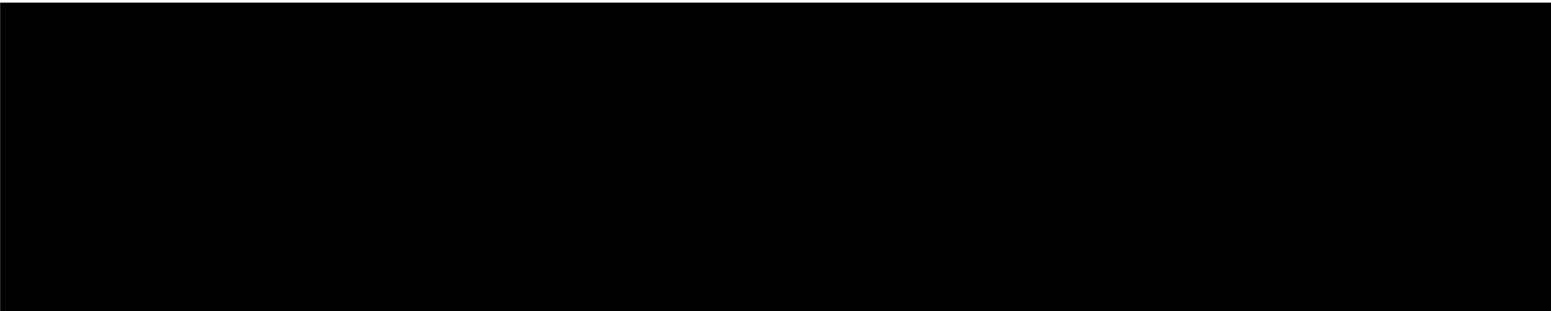

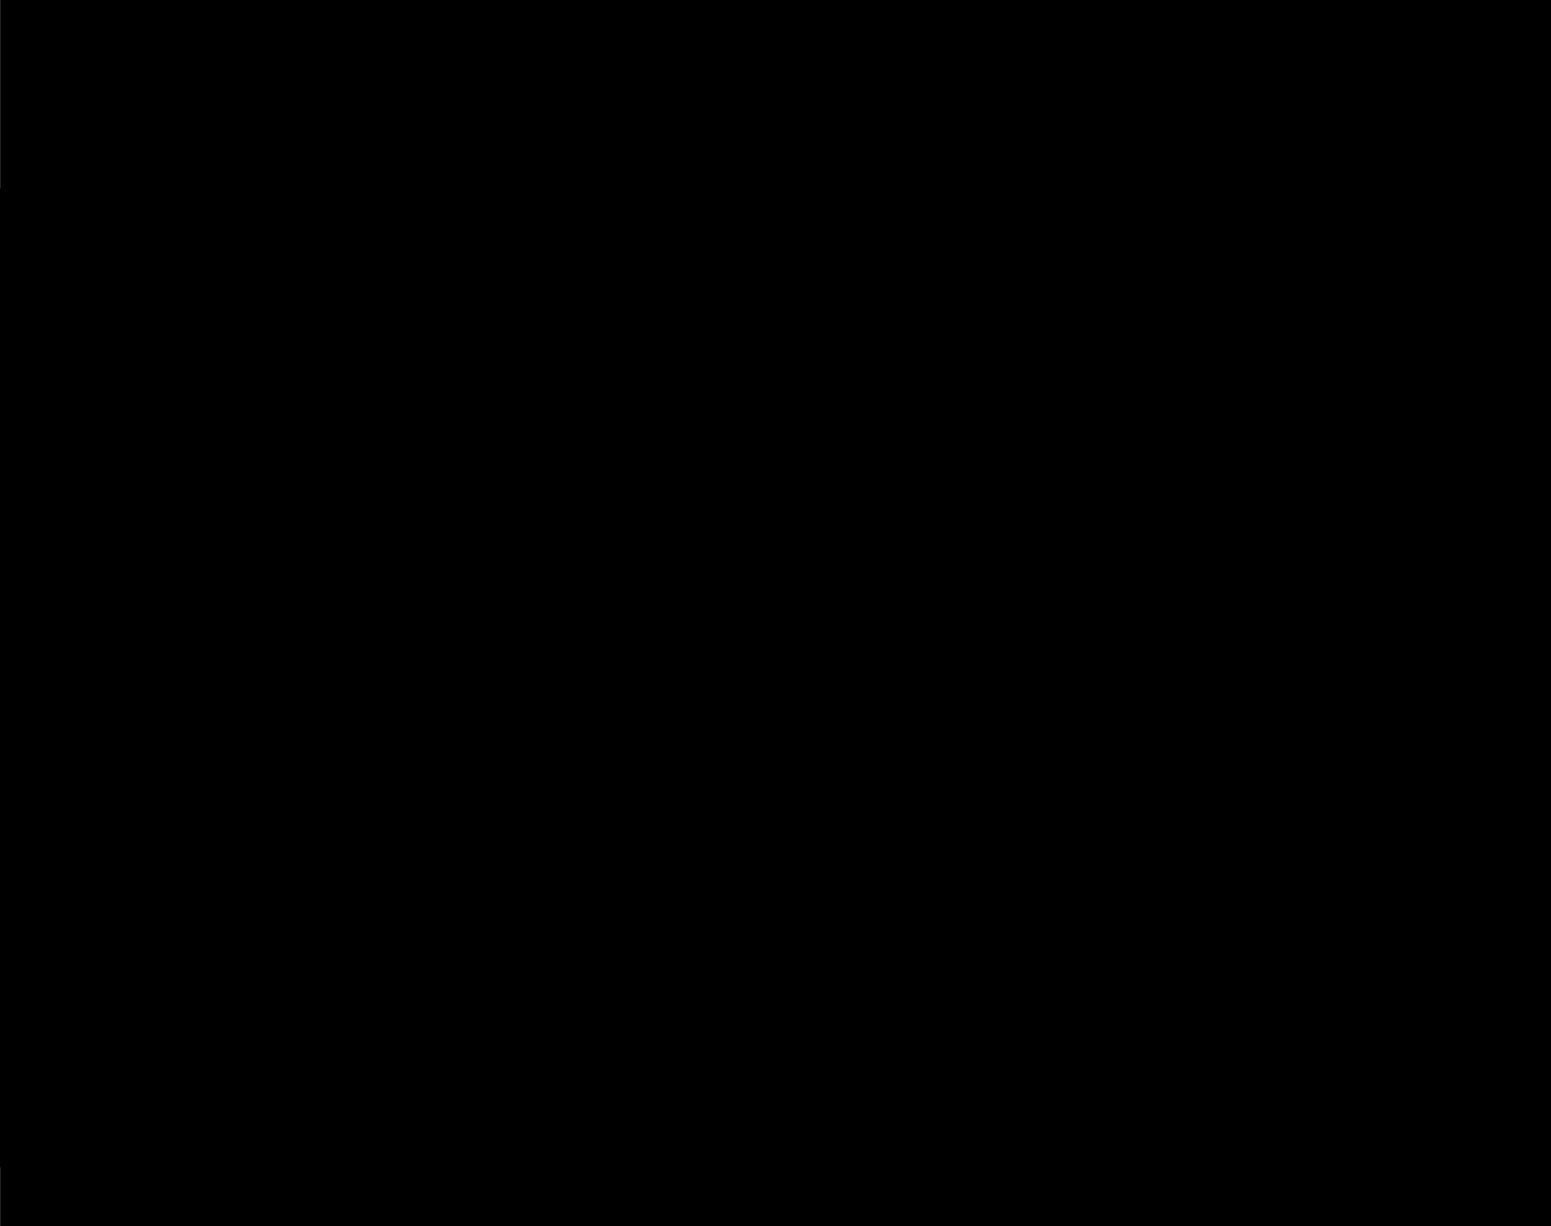

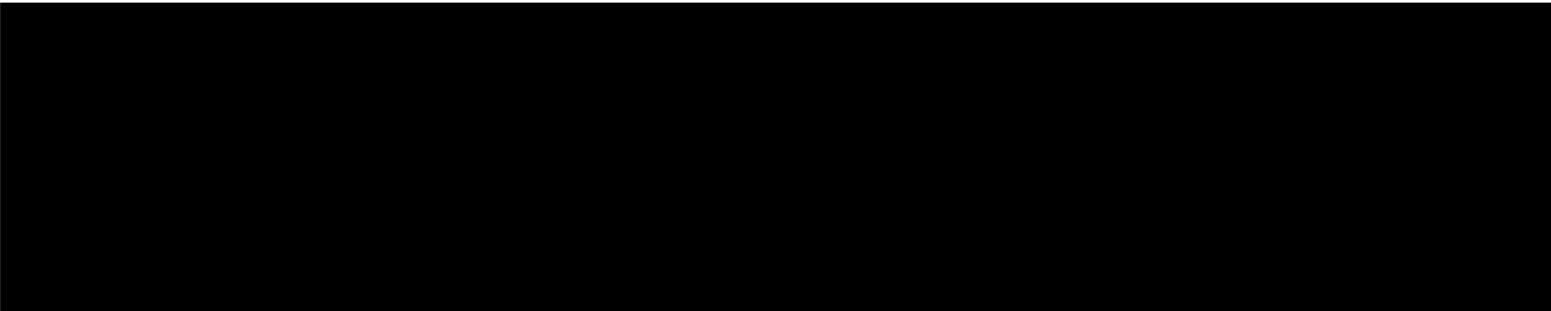

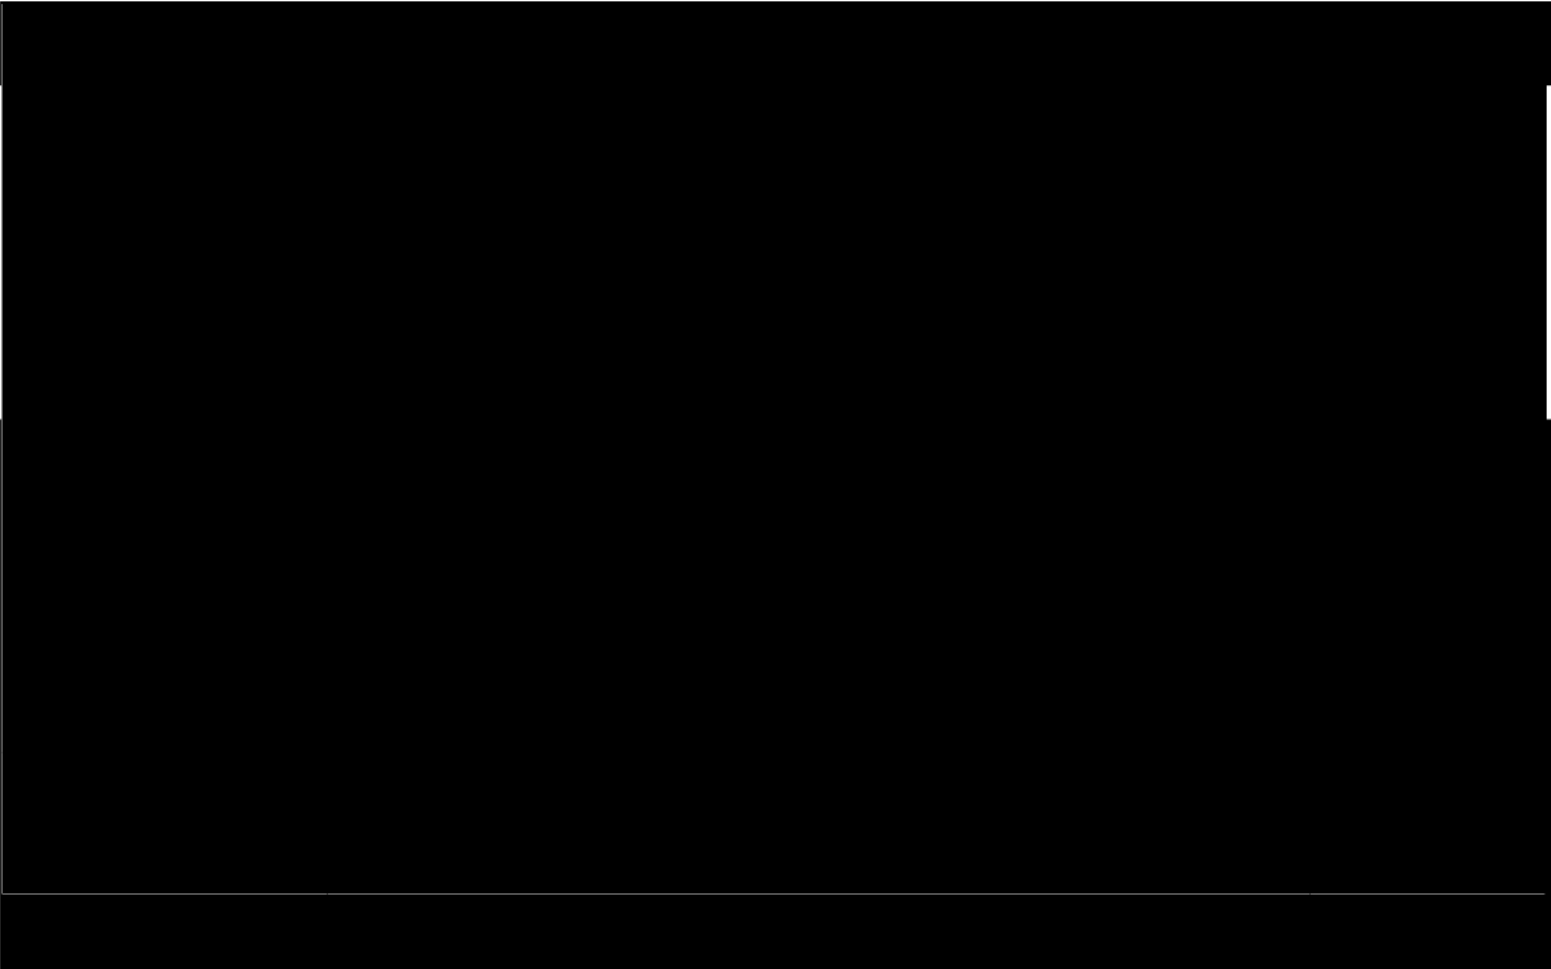

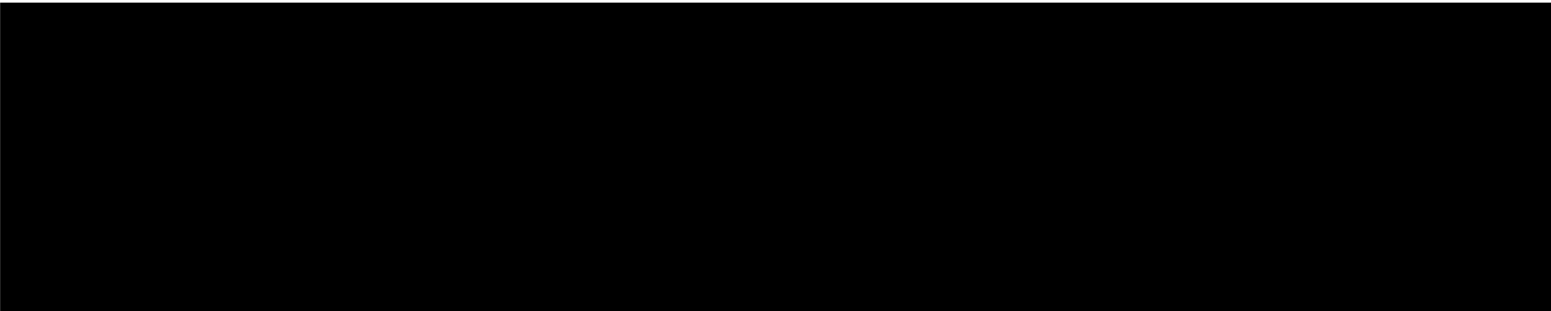

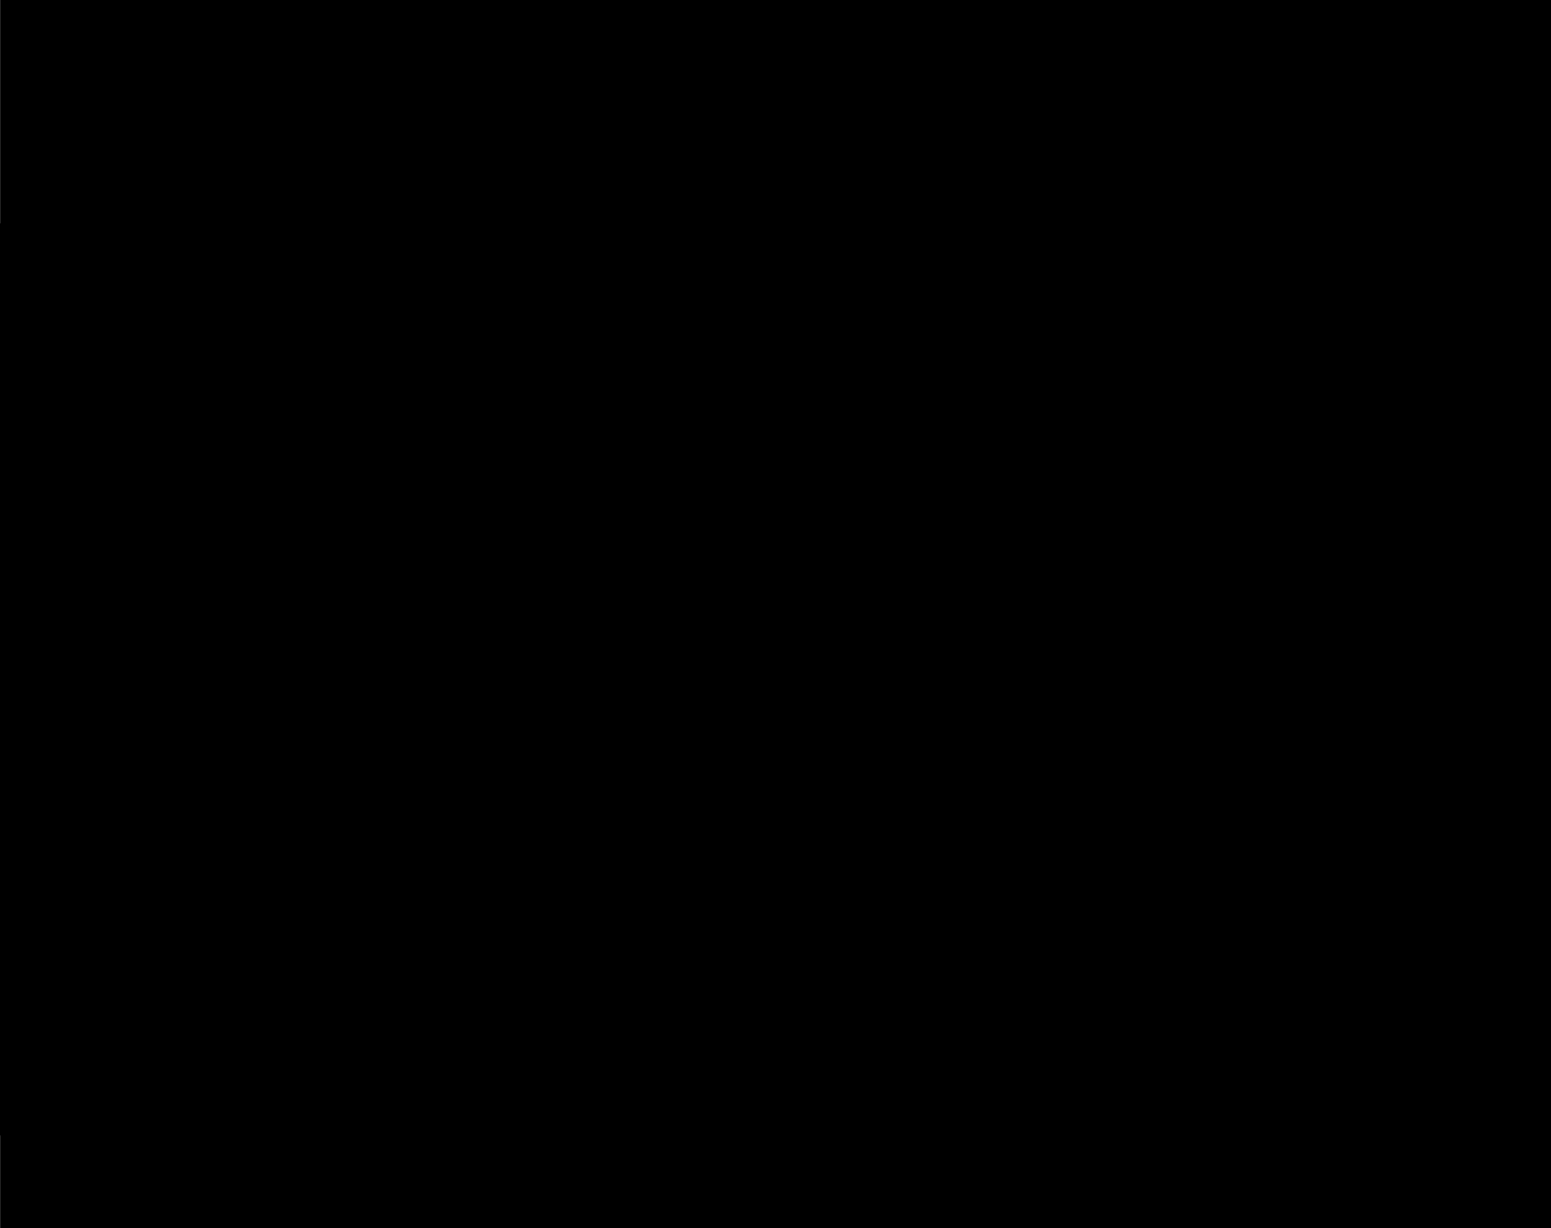

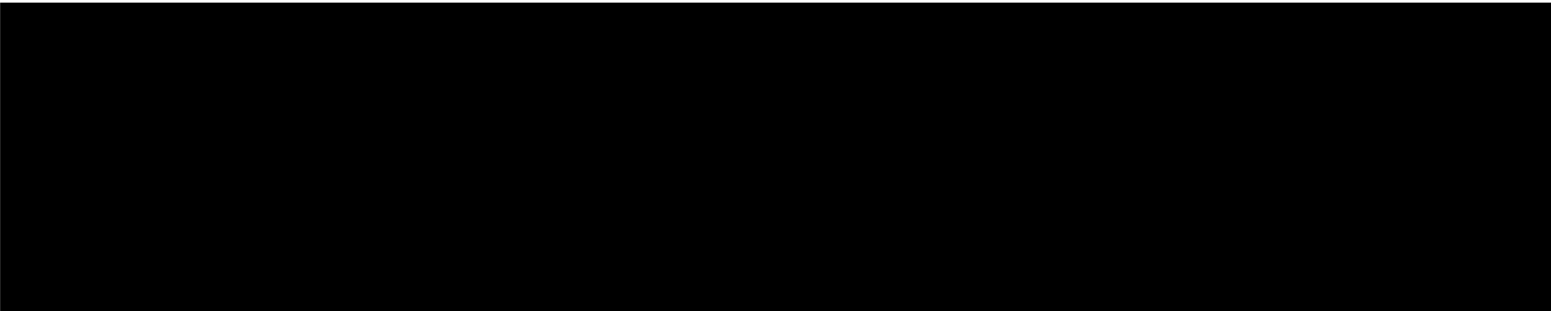

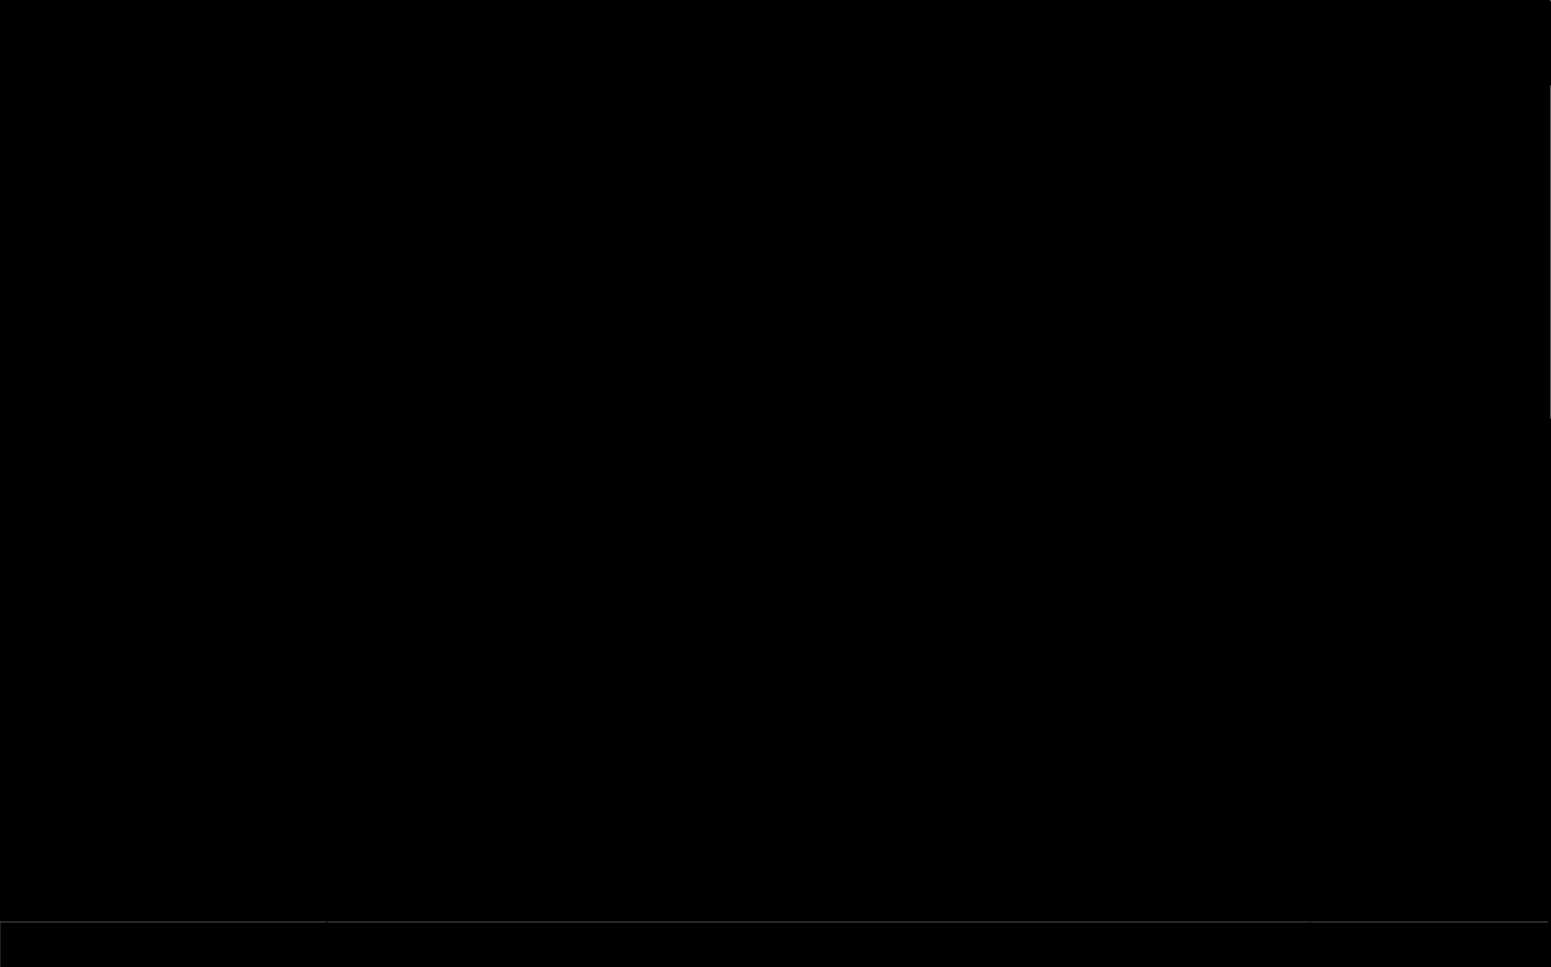

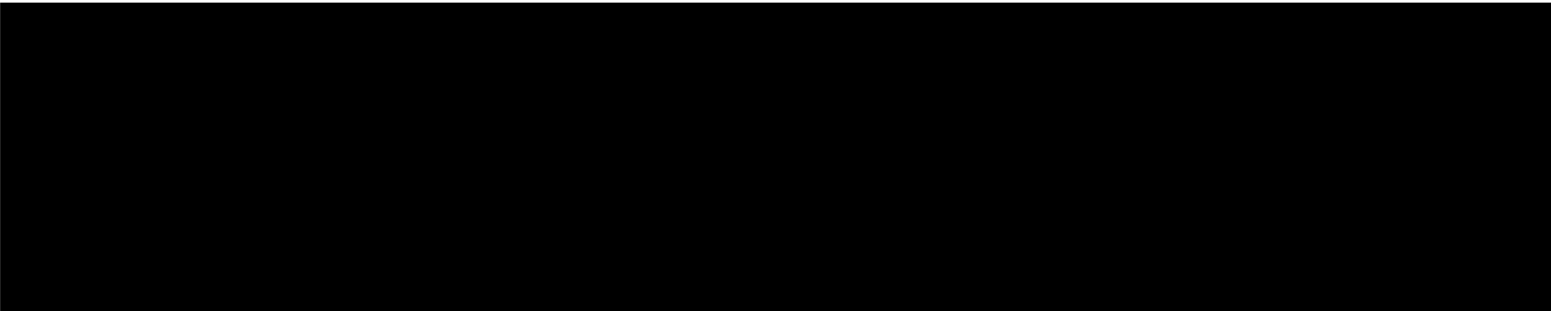

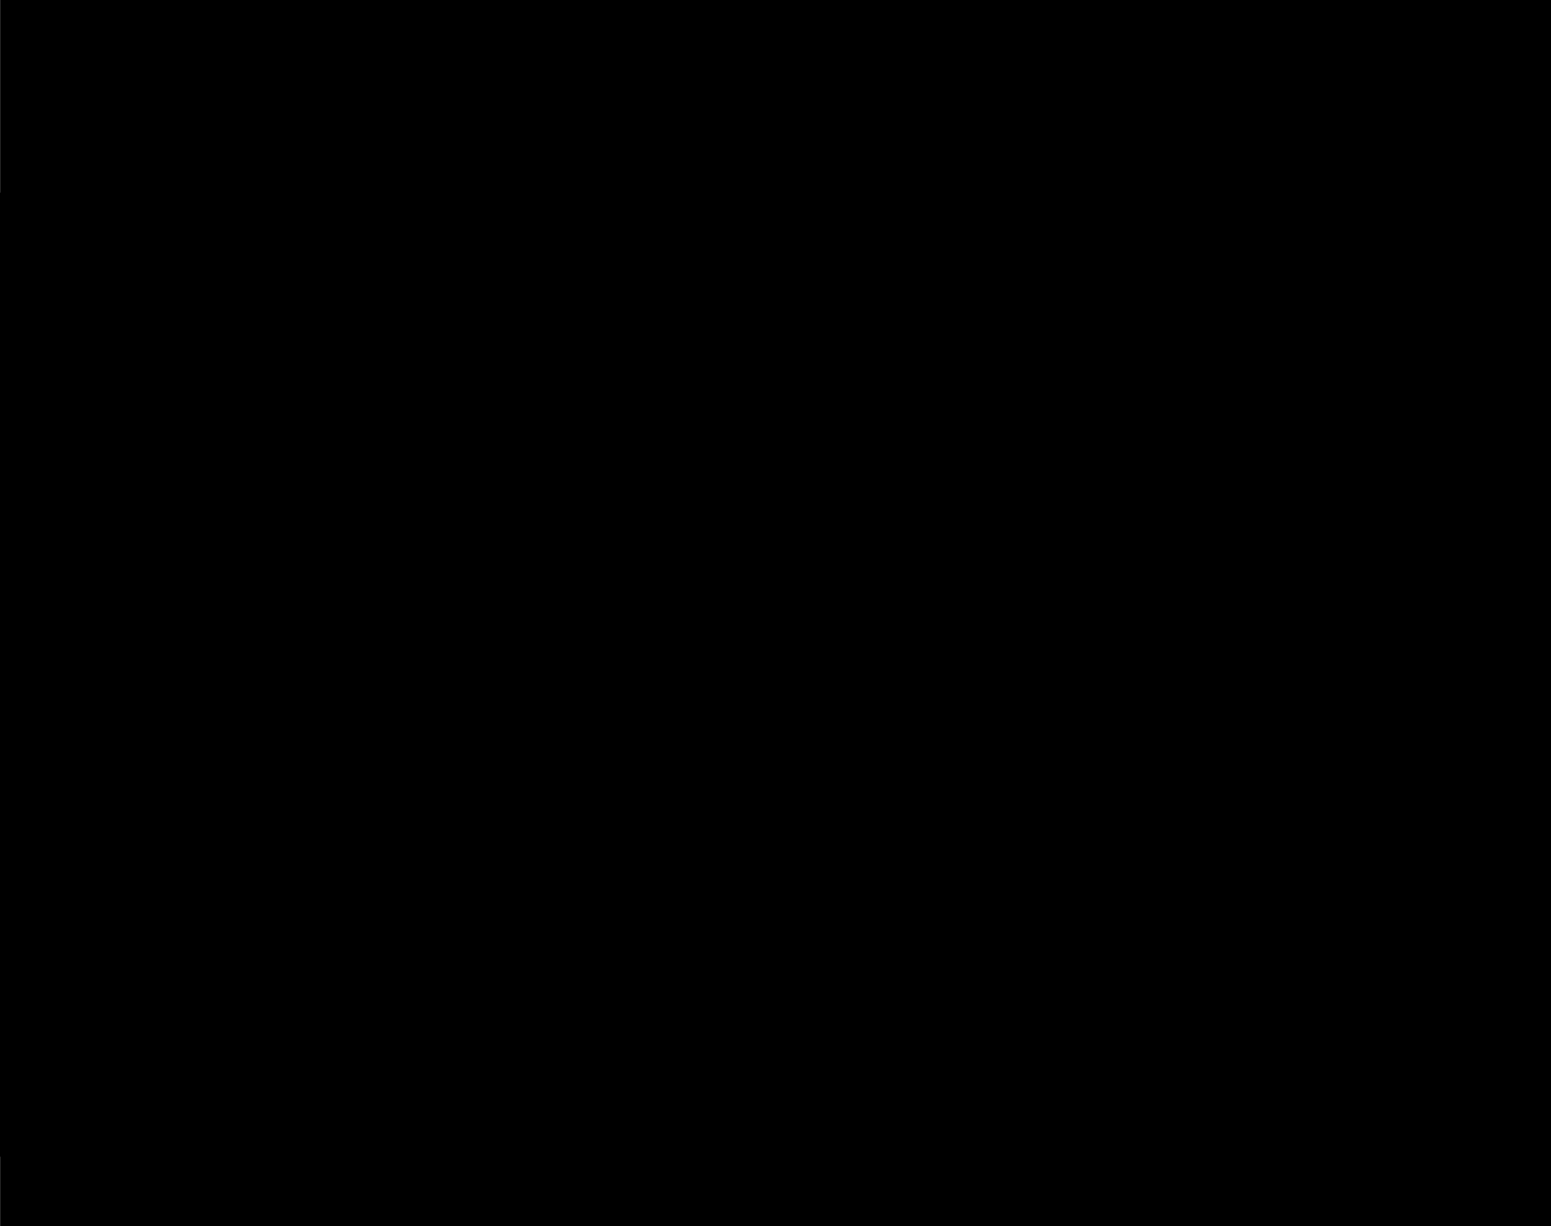

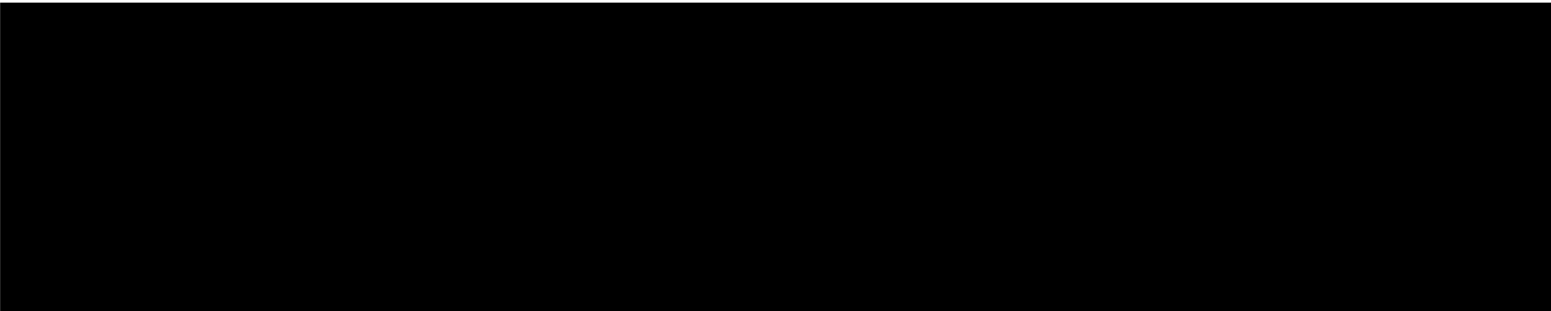

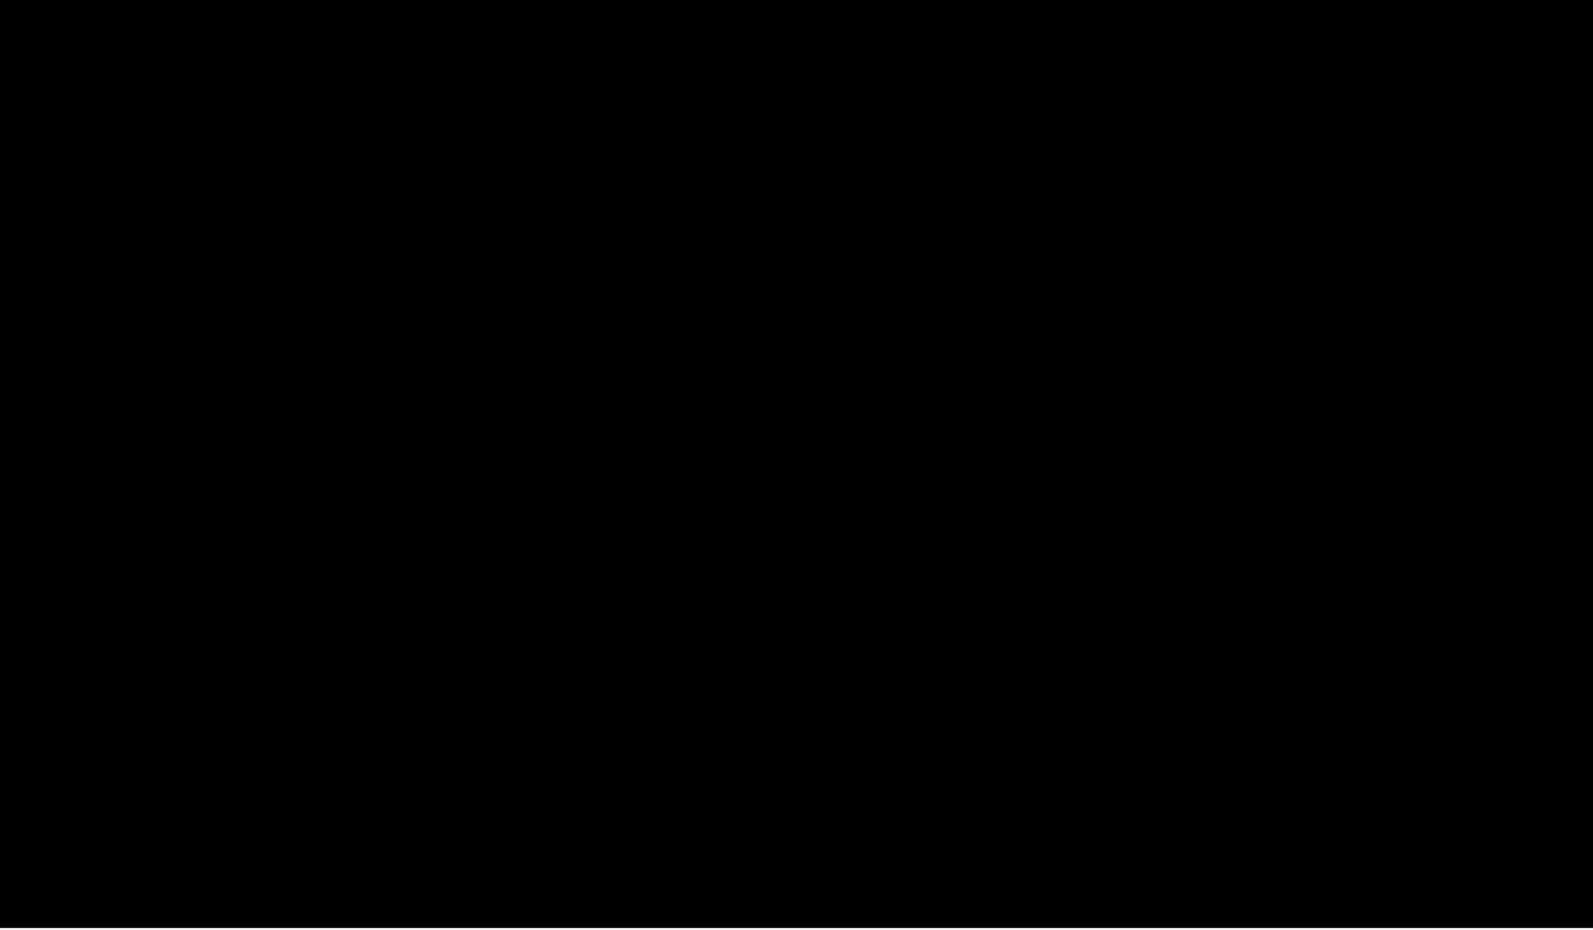

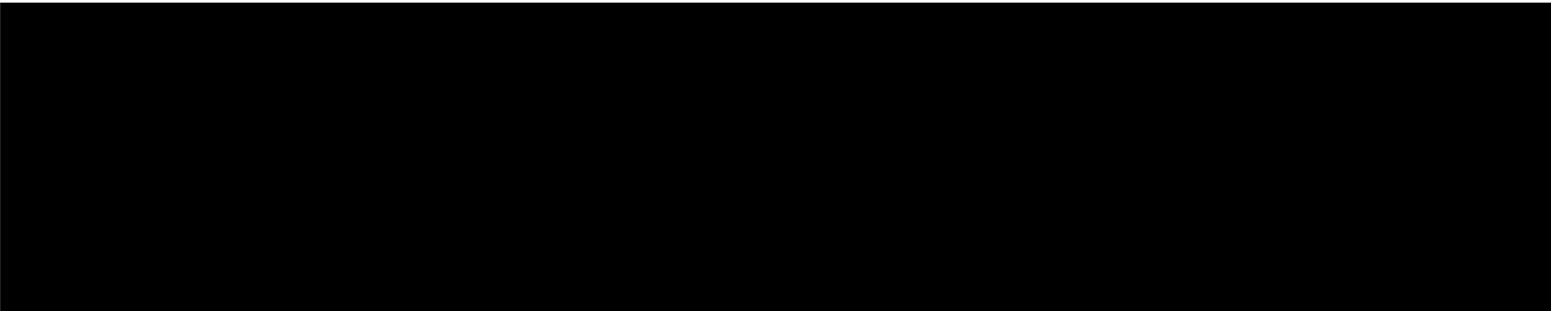

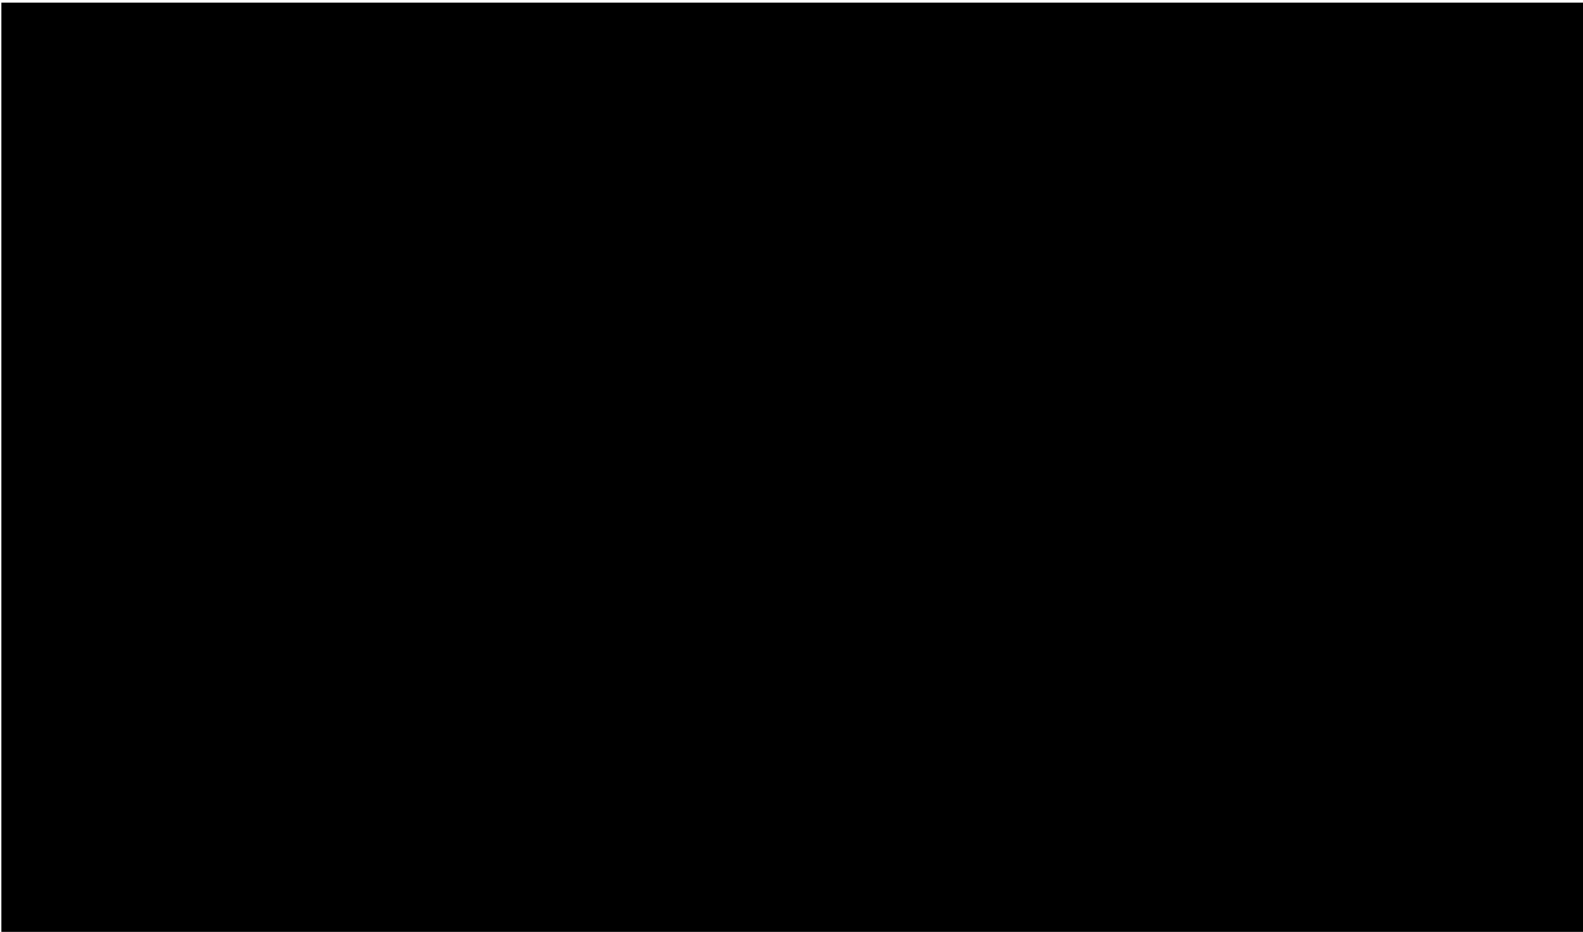

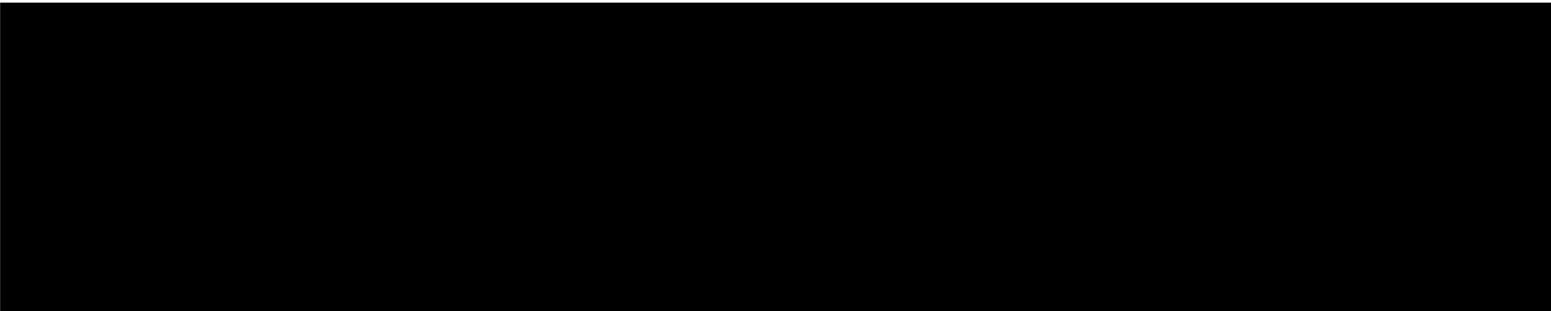

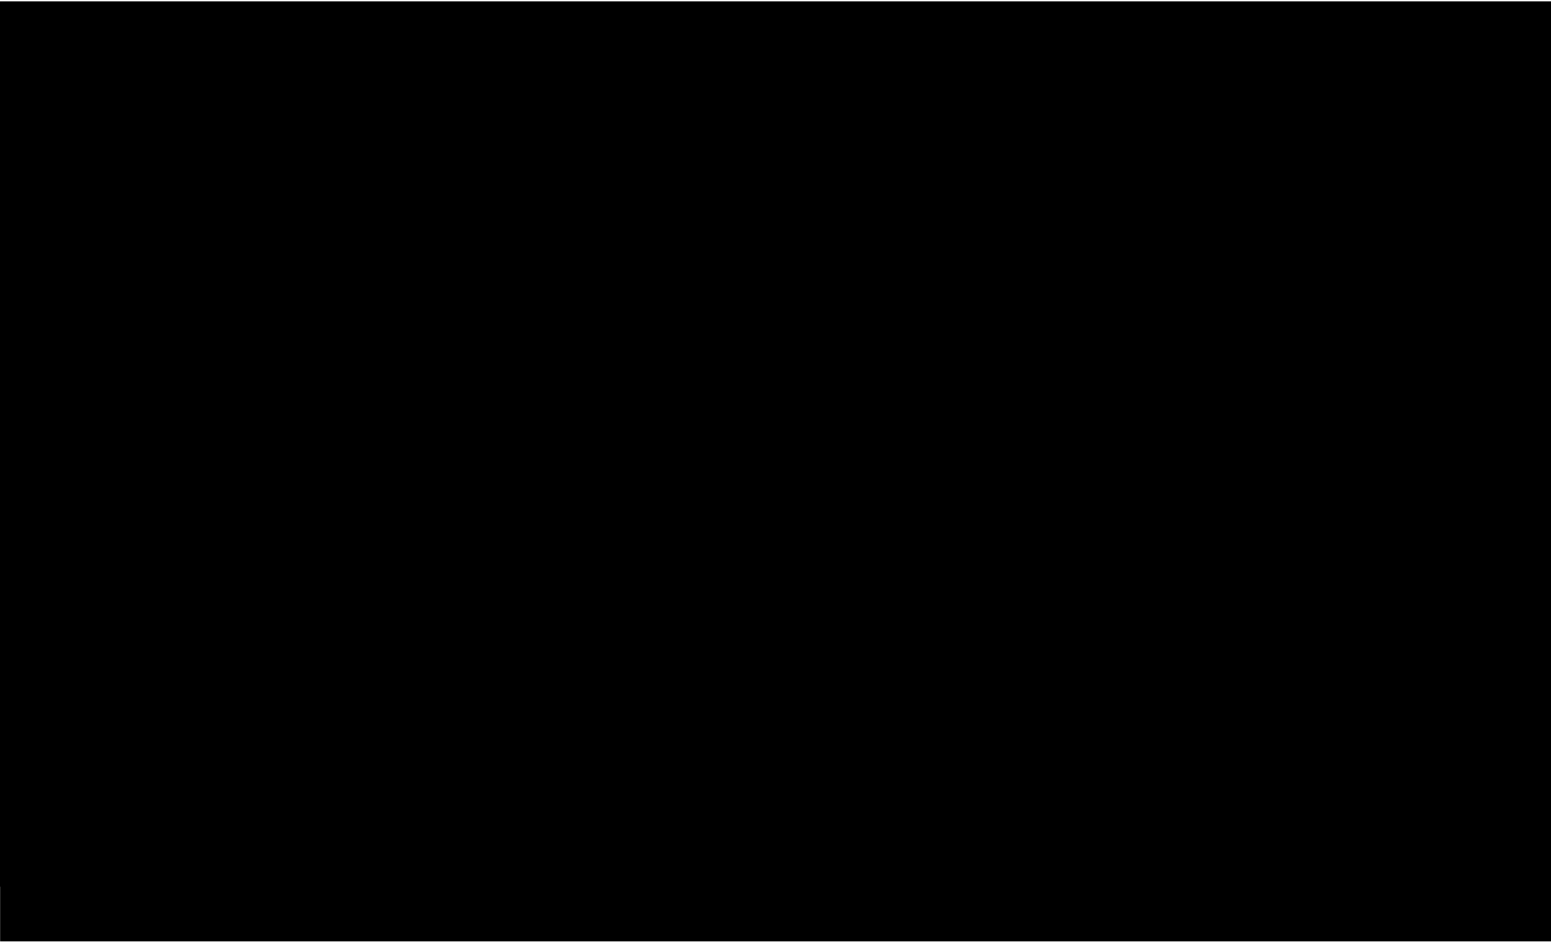

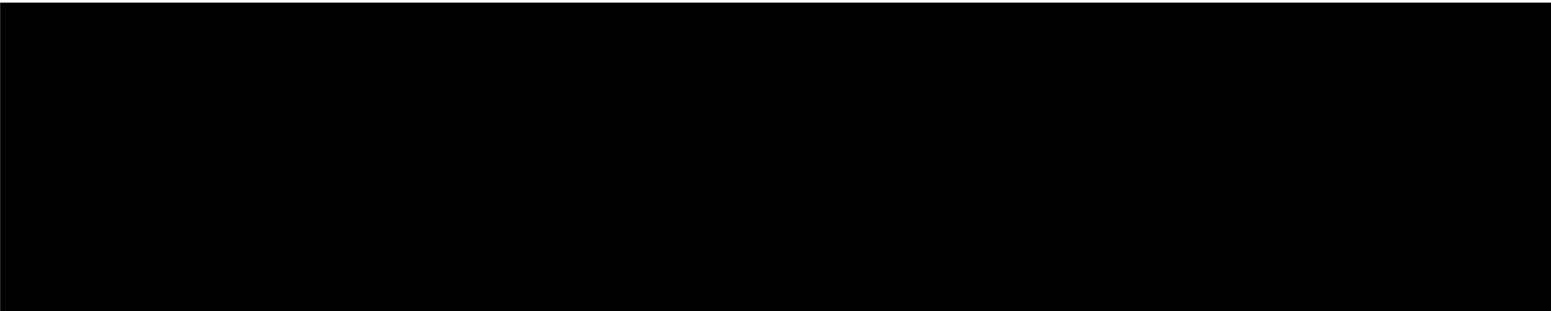

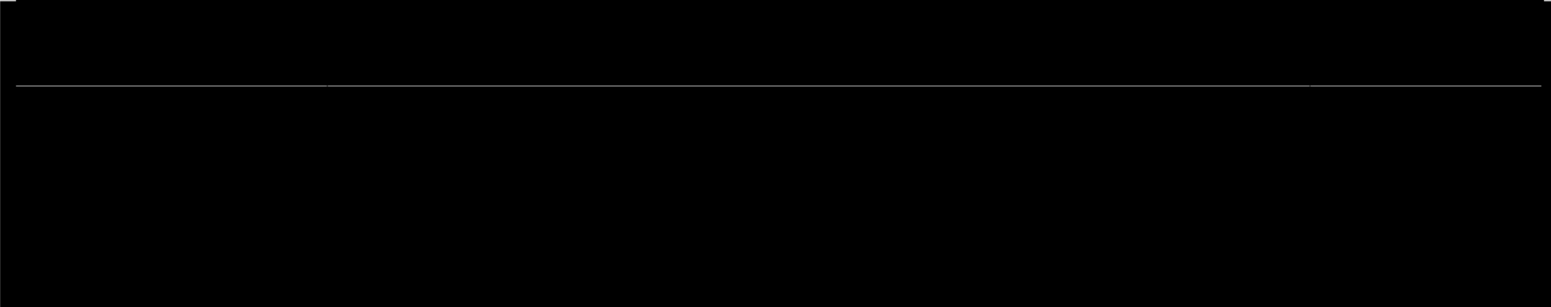

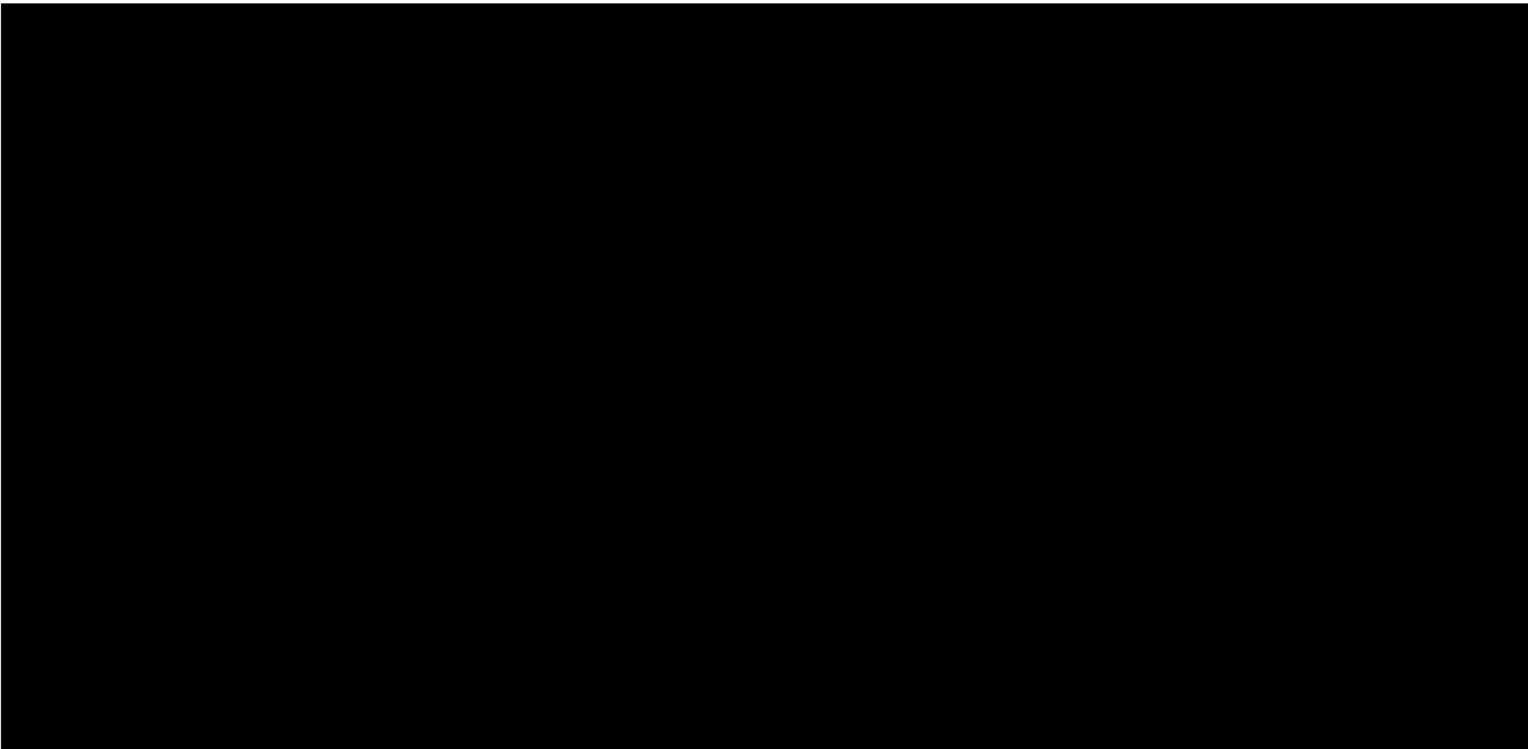

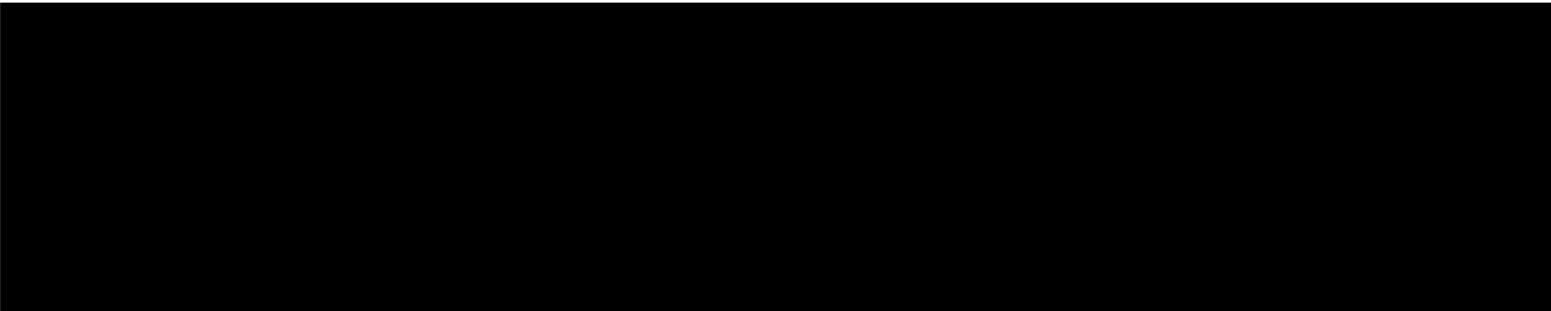

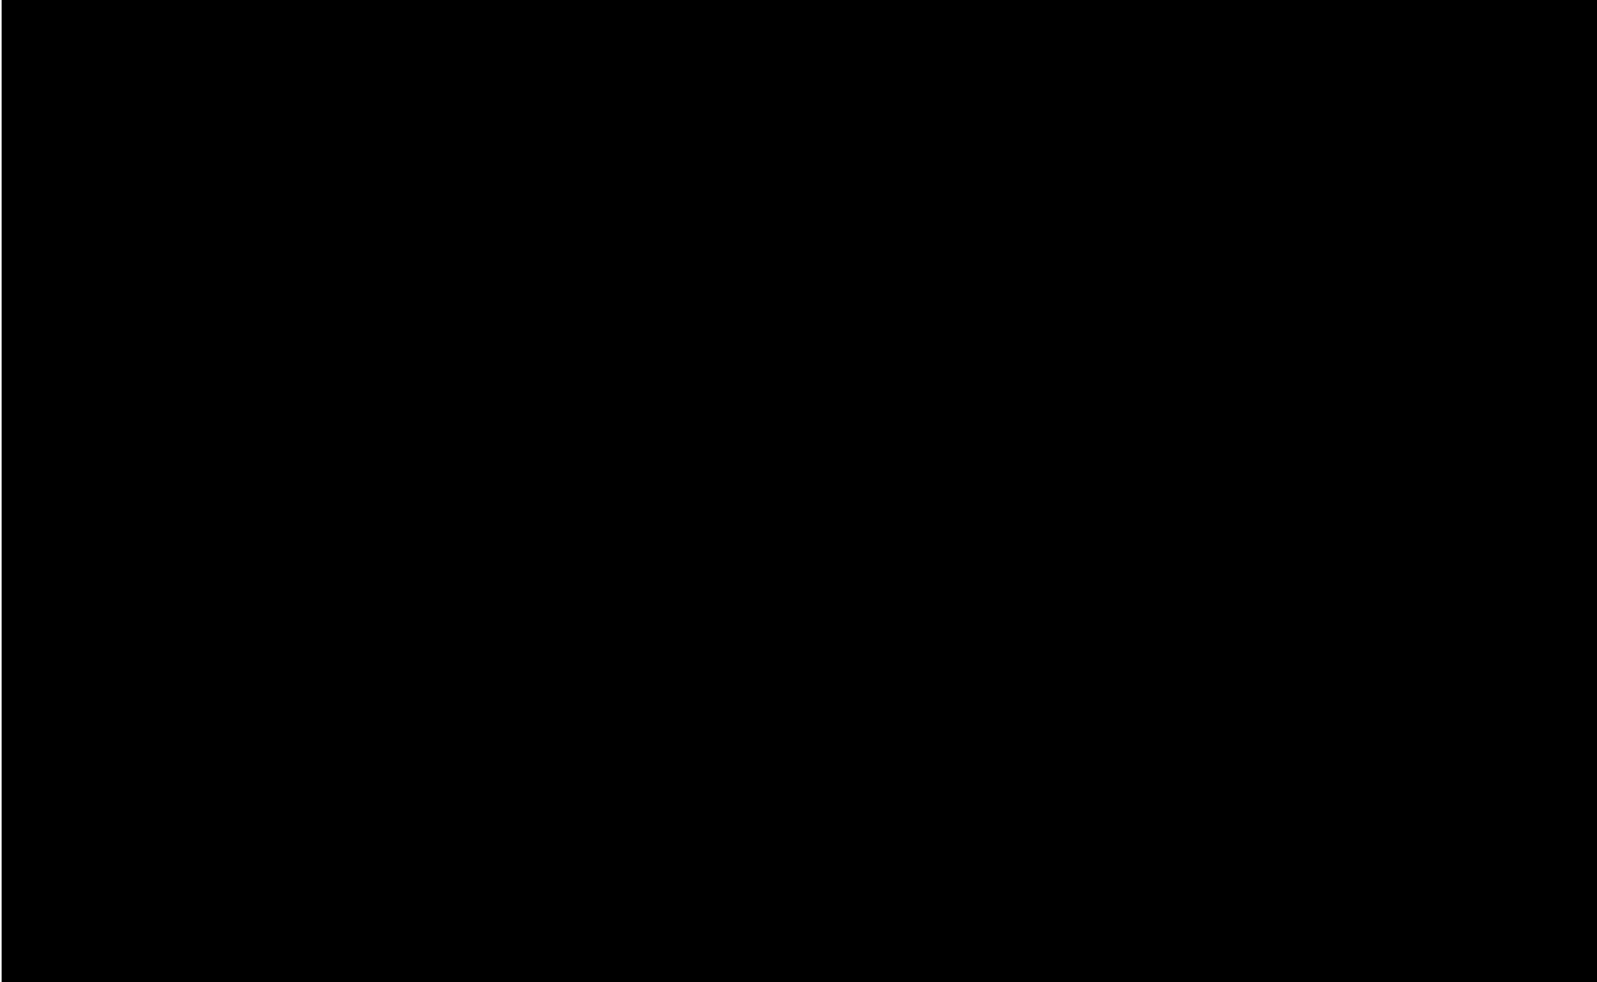

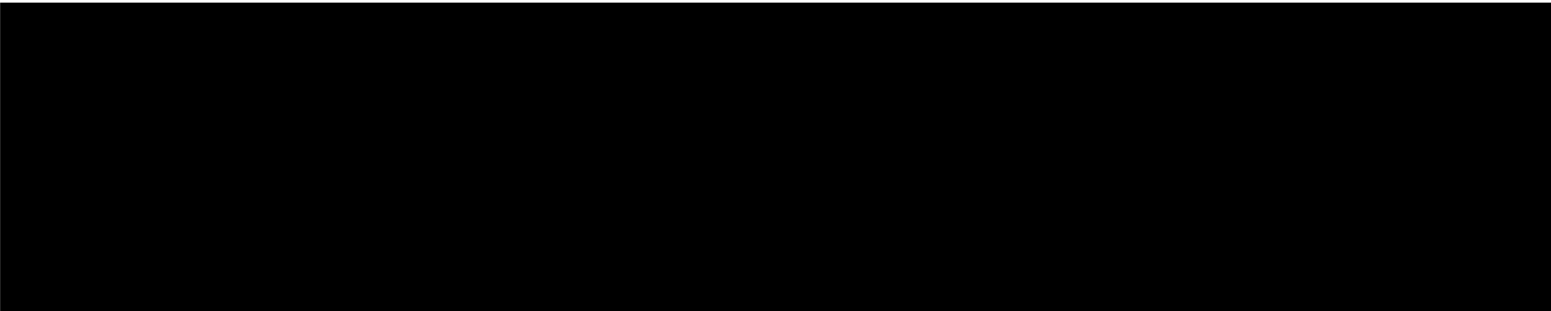

## User Privacy Principles

- *Respect our users. Respect their privacy.*
- Provide users with simple, discoverable, easy-to-understand controls for access to sensitive data
- Provide users with visibility to what apps and services have access to their location
- Location off means OFF
  - Don't store or deliver location to apps in Android or other end points when not requested, needed, or expected by user
- Google, OEM, Vendor, and Carrier location use cases must all meet the same standards
