**Cc:** [REDACTED]

Hi [REDACTED]  
We're still working on Q4 OKR planning, but it's safe to say at this point that any work on this issue will not be tackled next [REDACTED] (At the moment we're [REDACTED]  
[REDACTED]

Just sent you both an invite for Thurs (9/29) to discuss immediate-term solutions.

Hi Marlo,

I wanted to check in with you to see how the PRD is coming along? This is becoming to be [REDACTED] so we might have to do any quick fix/hack for us for our launch. we are already on our way to capturing the [REDACTED] client being used, so we can send somehow to the server so that [REDACTED] maybe just returns the location of that client back.

Cheers,  
[REDACTED]

Hi Marlo,

Quick follow up after I spoke to our [REDACTED] (cc'ed). I know you are still working on the PRD and are open to the idea for some quick fix/hack before Q4, given that this is a high priority for [REDACTED] Here's some ideas:

[REDACTED]

Cheers

## 2016-09-20 - Sync between Multi-device effort and [REDACTED]

Attendees: [REDACTED] marlom

- History
  - Marlo is tasked with working on multi-device issues
  - There have been anecdotal reports [REDACTED] that location history is picking up the location from the wrong device
  - There's also some U confusion on the Android settings page
    - Some people (including even Googlers) don't know that there is a global switch and a per-device switch
  - There are different places at Google that have a notion of "primary device classification"
  - [REDACTED]
- Options
  - Consolidate primary device classification
    - There are at least three places at Google that have this notion.
    - There are currently no updates and hasn't been any recent improvements to device classification algorithm
  - UX treatments
    - The team is still debating on how to improve the UX.
      - Should the user select which one is the primary device?
      - Let the user only say "this device reports" and the server-side we determine which one is the primary based on activity?
- Timeline
  - Right now, Marlo/[REDACTED] are only tasked with coming with product plan;
    - any long-term fix/implementation probably won't start until after Q4
  - Plan to have an approved technical and UX/PM design proposal in Q4
  - This Friday, [REDACTED] and Marlo do the prioritization
  - [REDACTED] TL on this

- Next
  - marlom: find out if primary device classification is any better [REDACTED] since Location Sharing A [REDACTED]
  - [REDACTED] see if we need to escalate this further
