**Re: Third Response to March 9 letter**

Dear Ms. Wright:

This is a follow up to the responses provided to you on March 23 and 24, to your letter of March 9, 2022. The Recorder and the Elections Department have no additional policies or procedures related to signature verification that have not already been provided. Three documents which were produced previously are attached to the letter. The Recorder's office thought an explanation of how the Recorder utilizes the Verus Pro system as part of the signature verification process, would be beneficial to your understanding by supplementing the written materials provided.

There are no written procedures provided to or created for staff as it relates to batching into high or low confidence because Runbeck does the batching with Verus Pro. The low confidence batch are those envelopes with insufficient pixels or no signatures. Where there is a signature that is sufficient for the software to read and match to, it goes into the high confidence batch. Importantly, every envelope in both batches is reviewed by signature verification staff members. The staff level review is limited to designating a good signature or "exception" meaning it needs manager review. The staff members are trained to ignore the high and low confidence labeling and work these queues equally, with the same protocols established for all signature review, as noted in work documents already provided.

The exceptions go to managers who are high level staff with additional training. Restricted access is in place for the manager review function, so only the higher-level staff can perform this review. There are both manager and user job aid documents, which outline the process for the manager to follow.

The audit function is restricted to specific limited manager level staff. The audit queue is populated by a random 2% sampling of all records set with a disposition, regardless of the disposition designated. This audit function occurs prior to further sorting of the envelopes.

This process has been explained to agents from your office but has not been provided to you specifically. If you need further explanation, please ask.

The Recorder and the Elections Department are continuing the search for Runbeck contract documents and emails. That search should be completed this week or early next week. With regard to the email search, we will advise on the volume and seek some guidance if the volume is too great for review purposes.

Sincerely,

A handwritten signature in black ink, appearing to read "E. Novak", written over a light blue horizontal line.

## Standard Work-Signature Verification in Early Voting Returns (EVRT) Module

Purpose: This document outlines the user level role working in the low and high confidence queues of the EVRT module.

Important Steps	Key Points	Notes:
<p>Access the Early Voting Returns (VB10) (32) module. This system is referred to as the EVRT system.</p>	<ul style="list-style-type: none"> <li>• Open the ShortCutsVRAS folder on your desktop.</li> <li>• Double click the EVRT shortcut.</li> <li>• A box “We can’t verify who created this file. Are you sure you want to open this file” appears. Select the ‘Open’ or ‘Run” button</li> <li>• The EVRT system will open and the screen will appear.</li> </ul>	 <p>EVRT - Early Ballot Returns Processing (.NET) Database: VRASPROD User ID: NABORC (32) Build: 2020.05.28.0626          Functions 7/7/2020 10:38:07 AM</p> 
<p>Select the ‘AFF returns’ button.</p>	<ul style="list-style-type: none"> <li>• A pop-up screen will appear allowing you to open a batch.</li> </ul>	 <p>EVRT - Early Ballot Returns Processing (.NET) Database: VRASPROD User ID: NABORC (32) Build: 2020.05.28.0626          Functions 7/7/2020 10:38:07 AM</p>

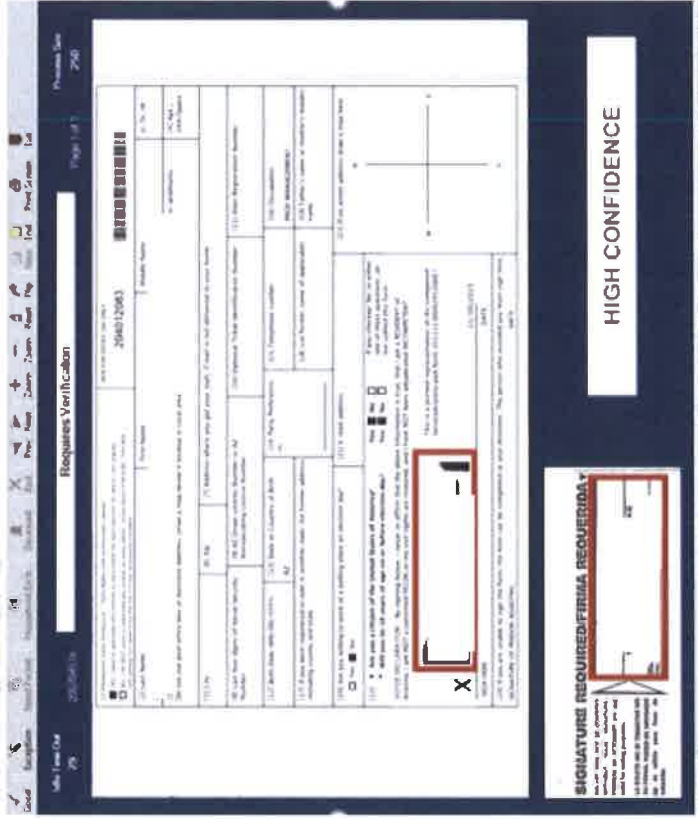

Important Steps	Key Points	Notes:
<p>Open a signature verification batch.</p>	<ul style="list-style-type: none"> <li>• Select the 'New' folder (yellow folder icon).</li> <li>• Selecting this button will assign a batch of signatures to the user for verification.</li> </ul>	
<p>Viewing the batch screens</p>	<ul style="list-style-type: none"> <li>• The batch screen contains two images.</li> <li>• The larger image is an historical affidavit with a known approved signature.</li> <li>• The smaller image is a clipping of the signature on the green affidavit envelope (current election).</li> </ul>	
<p>Selecting the mode</p>	<ul style="list-style-type: none"> <li>• The mode includes four options: High confidence, Low Confidence, Manager and Audit.</li> <li>• Select the file option at the top of the screen.</li> <li>• Navigate to mode, hover the mouse over the mode.</li> <li>• Select the mode as directed by the supervisor</li> </ul>	

Important Steps	Key Points	Notes:
Verifying the voter	<ul style="list-style-type: none"> <li>Review four key points on the screen to ensure the historical affidavit and the ballot affidavit belong to the same person.</li> <li>Use the check mark method in the following order: preprinted name on the affidavit envelope on the lower left part of the screen (current election), signature on the affidavit envelope (current signature), signature on the historical affidavit, and name on the historical affidavit.</li> <li>If the four points do not match, click the exception button at the top.</li> <li><u>Be aware of family members in the same household signing the other family members affidavit envelope. This is an exception.</u></li> <li><b>Tip:</b> Right click the mouse to magnify</li> </ul>	

Comparing the signatures

- Analyze the broad, local characteristics, and letterforms
- If the signature on the historical affidavit and the signature on the affidavit envelope (current election) match, click the good button.
- If the signatures can not be verified click the exception button.
- If the affidavit is not signed by the voter click the exception button.
- Refer to the signature verification job aid.

NOTE: All signatures that cannot be verified will go through a second level review in the manager queue.

Reviewing the batch before ending.

- Use the **PREV** and **NEXT** buttons to review signature dispositions. You can change the disposition if necessary **BEFORE** you complete the batch.
- This review step is critical to ensure the correct disposition was selected.

<p>Closing a batch before completing all signatures.</p>	<ul style="list-style-type: none"> <li>• If you cannot complete the full batch of all signatures, select the 'End' folder (Yellow Folder) the close batch. This is critical to ensure batches do not prevent a file from being completed. Another user can then complete the remaining images in the batch.</li> </ul>	 <p>The screenshot shows the top toolbar of the software. The 'End' button, represented by a yellow folder icon, is highlighted with a red rectangular box. Other buttons visible include 'Good', 'Exception', 'Need Packet', 'Household Exch.', 'Deceased', 'Bad', 'Prev Next', 'Zoom', 'Reset', 'Flip', 'New', and 'Print Screen'.</p>
<p>End the batch after successfully dispositioning all signatures.</p>	<ul style="list-style-type: none"> <li>• Once the review process is complete, select the 'End' folder (Yellow Folder).</li> <li>• Select the 'New' folder (yellow folder icon) to begin working on another batch.</li> </ul>	 <p>The screenshot shows the top toolbar of the software. The 'New' button, represented by a yellow folder icon, is highlighted with a red rectangular box. Other buttons visible include 'Good', 'Exception', 'Need Packet', 'Household Exch.', 'Deceased', 'Bad', 'Prev Next', 'Zoom', 'Reset', 'Flip', and 'Print Screen'.</p>
